

SEE MOODY and SEE BETTER

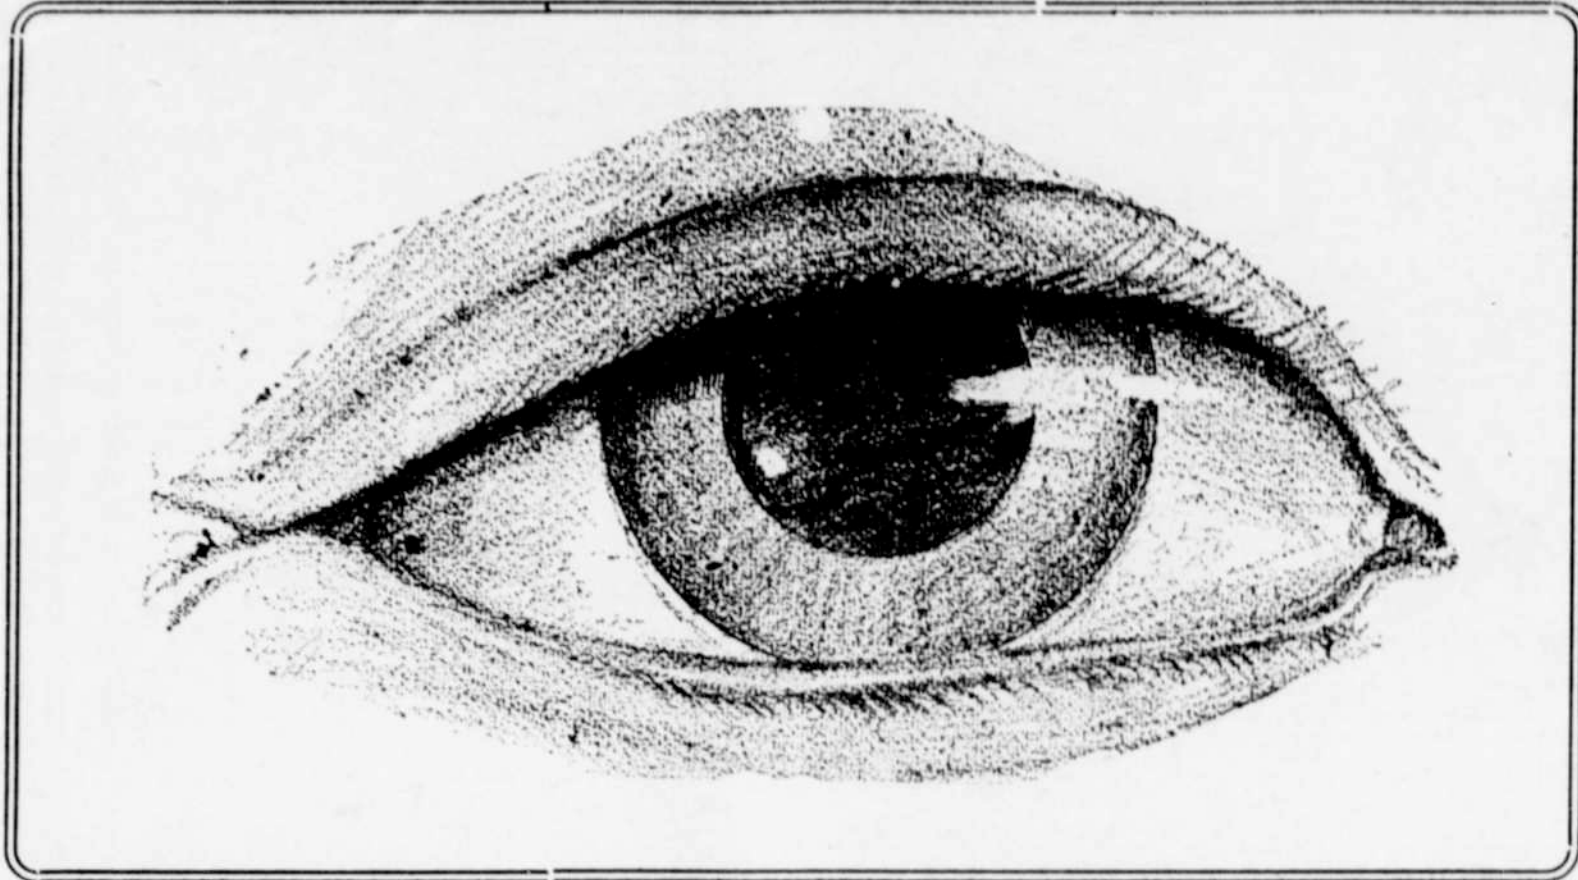

This is called a surfacing machine and is used in grinding the surfaces of either flat or curved rough glass blanks to obtain in the finished lens the exact result required by your individual prescription. This operation requires careful, skilled workmanship.

After the lenses have been cut to approximately the desired shape and size they are placed in one of these automatic edging machines and ground to accurate shape, with smooth, even edges.

If You Can't See—See Moody for Better Optical Service

In every trade, profession or branch of work there are found a few men who, from special fitness or education, or both, are better prepared to serve you in their line than the multitude of others in the same field.

Since Optometry requires especial ability in both professional and mechanical work, men that are fitted to do both equally well are scarce.

Therefore you cannot be too particular about the selection of the man to whom you entrust your eyes.

The professional work—the examining and measuring of your eye defects—must be skilfully done.

The mechanical part—the making and adjusting of your glasses—is no less important.

Competent advice must rest on adequate experience.

The little details others overlook receive our most considerate attention—a reason why our glasses are above the average in quality at the same price others ask for inferior glasses.

SEE MOODY and SEE BETTER

This little machine is used in cutting lenses to any desired shape and size. The cutting is accomplished with a diamond set in the machine.

The holes for use in setting the lenses in eyeglasses or spectacle mountings are smoothly and accurately bored by this diamond drill.

With this instrument the operator locates the optical center of the lens and also marks the axis of the cylinder, if any. It is also employed to check the accuracy of every completed pair of glasses. We call it the "policeman" of the shop.

Society

The Social Twelve club met last Thursday with Mrs. H. A. Miller. The raising of Cottage Grove's share of the war library fund was discussed and Mrs. L. S. Hill and Mrs. B. R. Job were appointed a committee to confer with the commercial club on the subject. Each of ten members pledged themselves to secure pledges aggregating \$5 for the fund. Cottage Grove's share is about \$200. The club voted to take up Red Cross sewing, instead of the usual fancy work. Refreshments were served.

The Emanon club was entertained last Thursday by Mrs. Hiram Griggs, the time being spent with fancy work, after which refreshments were served. The question of taking up Red Cross work at the regular meetings will come up at the meeting to be held with Mrs. W. B. Cooper next Thursday. Mrs. Martin Foster, of Lorane, sister of Mrs. Griggs, and Mrs. C. E. Frost were guests of the club.

The Woman's Missionary society of the Christian church will observe Guest day in the church parlors next Wednesday. A program, including good music, will be given, and refreshments will be served.

The M. P. G. club met Tuesday with Mrs. Albert Helliwell. Red Cross sewing took the place of the usual fancy work. Dainty refreshments were served. Mrs. Albert Smith was a guest of the club.

The Ladies' Welcome club, of The Cedars, gave their last meeting day over to the picking of blackberries, the receipts from the sale of the berries being turned over to the Red Cross.

The Constellation club meets this afternoon at Masonic hall with Mrs. Van Allison and Mrs. Elbert Bede as hostesses.

Invitations are out for a bonfire party in the Latham school yard Saturday evening.

The Eastern Star held its first social session of the season Friday evening.

Hebron Society.
Mrs. N. W. White gave a birthday dinner Sunday in honor of her mother, Mrs. D. C. Baughman, who was 79 years of age. Those present were the N. W. White family, Mr. and Mrs. W. G. Mas-

sey, of London; Mr. and Mrs. J. A. Powell and daughter Ruth, Mr. and Mrs. A. S. Powell, Mr. and Mrs. F. H. Callison and daughter Lucille, Mr. and Mrs. Alfred White and baby, Mrs. Sweeney, D. C. Baughman and Stanford Bartle.

Silk Creek Society.
Mr. and Mrs. A. Woolcott gave a reception for their friends Saturday evening. They are preparing to remove from the neighborhood.

Mr. and Mrs. W. G. Bittinger entertained Mr. and Mrs. L. B. Slagle and their son Carl, lately from Lind, Wash., and Mrs. O. C. Davis, of Lorane.

RED CROSS NOTES.

The following new members have been received since the last published report: Mrs. Amelia Phelps, Mrs. E. Fulmer, Mrs. Gottfried Graber, Mrs. W. B. Cooper, Mrs. George Hall and Mrs. John Bader. The name of Mrs. Leon Des Larzes was omitted from the last list furnished for publication. Fifty cents of each membership fee goes for the purchase of supplies to carry on the work of the local Red Cross. The other 50 cents go to the National Red Cross.

The regular sewing day each week is Friday, from 2:30 to 6 p. m., at room 7 in the high school building. The average attendance has been 20.

Yarn for the making of sets for the soldiers in Europe is expected to arrive this week.

The society is now working on pajamas, operating leggings and hot water bag covers.

It is expected that all the social clubs of the city will give over their regular meeting days to Red Cross work. The elimination of all refreshments is also under consideration.

Statement by William Howard Taft, chairman of the central committee of the National Red Cross: All of us sometimes wonder just what the Red Cross is doing these days as a result of the generosity of our people in both money and service. Here are a few things it is doing:

Sending more than \$100,000 worth of Red Cross supplies to Europe each month.

Providing \$200,000 for immediate relief work in Roumania, and a like amount for the same purpose in Italy.

Maintaining two hospital ships for the United States navy.

Operating a motor transport service in France, thus reducing the enormous

strain on the weakened railroads of France.

It has raised and equipped fifty base hospitals, 15 of which are already on the field or en route.

James H. Mills, brother of Karl K. Mills, and who is second lieutenant of Eleventh company, of Marshfield, spent the week-end with his family, who are making their home here while Mr. Mills is in the service.

Lloyd Bisbey, who has been freight agent for the Southern Pacific, has been transferred to Myrtle Creek, and is moving his family there.

Mrs. R. D. Whipple, of Eugene, arrived from Eugene yesterday to visit Mrs. W. W. McFarland.

Miss Goldie Hays returned to Eugene last Thursday to resume her studies at the Bible university.

George Overholser, who spent the summer in Washington, has returned to enter high school.

Mr. and Mrs. I. H. Veatch and son Dale and Mrs. Ida Veatch motored to Eugene today.

J. R. Ford is in Eugene on business today.

First Church of Spiritual Science—Mrs. Nellie W. McKinney, pastor. Meetings at the D. W. McKinney home at the corner of Twelfth street and Washington avenue, Sunday evenings at 7:30 o'clock. Everybody welcome.

TESTED RECIPES

Honey Caramels—Pour one cupful of honey into a saucepan, add one cupful of brown sugar, one-half cupful of cream or milk, two tablespoonfuls of butter, and one tablespoonful of glucose or a pinch of cream of tartar. Stir over the fire until a little forms a hard ball when tested in cold water, or 252 degrees is registered by the candy thermometer. Take from the fire and add one teaspoonful of lemon extract and a few drops of red color. Pour into a buttered tin. When cold cut into oblong pieces, wrap in waxed paper and set aside to chill until you are ready to pack it.

Cream Almond Dates—Put into a saucepan one-half cupful of fondant and one-half cupful of ground almonds and stir and mix thoroughly over the fire. Turn out onto a board and knead in color and flavor as desired. Roll in oval portions and place in the centers of stoned dates. Decorate to taste with crystallized mint leaves, violets or rose leaves.

Celery is improved 100 per cent by soaking it in salt water an hour or more before serving.

Biscuits are improved and will brown more quickly if two tablespoonfuls of sugar are added to the flour when making them.

Left-over rice can be used successfully in rice croquettes or by frying in the same way as cold mush. In that way the rice is saved and the family is saved the disagreeable task of eating warmed-over rice.

A teaspoonful of vinegar added to the water in which an old fowl or a tough piece of meat is being boiled will cause it to cook tender much more quickly.

Do not throw away vinegar in which cucumbers or any other vegetable has been seasoned, and left clear; use it again for the same purpose.

Old stockings make the best stove and mop rags obtainable, if they are cut open and the foot cut off.

Old bread that has become hard tastes almost as good as fresh bread if it is dampened and placed in a hot oven a few minutes.

Use an ordinary coarse grater to scale fish. It saves time and there is no danger of cutting the hands as there is when using a knife.

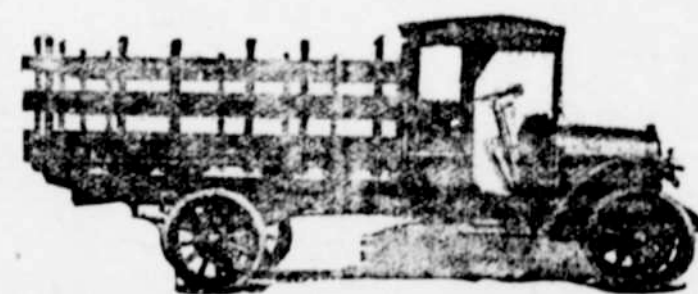

Cook potatoes with the skins on to preserve the real taste of the potato. If someone of the family objects to pota-

toes in their jackets, peel them after they are boiled and before putting them on the table. It is the time it takes to peel them that most people object to when served with potatoes in their jackets.

MAXWELL

Most Miles per Gallon

Most Miles on Tires

\$950

F. O. B. FACTORY

A motor truck must submit, and PASS, the acid test of COST.

That is the test we want you to apply to the one-ton Maxwell truck—its first cost—and its operating cost.

A Maxwell truck—which is a REAL truck, worm-driven—sells at a price that can not be met in any other motor vehicle of like efficiency, durability, and economy.

A Maxwell truck will cover 100 miles in a work day—twice the distance covered by two teams and two drivers. It will do this at an operating cost of less than that of one team of horses.

Moreover, it is of a size and capacity adapted to the needs of almost every form and phase of commerce, industry, or farming.

The question is not, "Can I afford to have a Maxwell truck?"

The FACT is, Mr. Business Man, you can not afford to be without one.

One-ton Truck Chassis \$865; Chassis with cab and windshield \$900; Chassis with cab, windshield, and Stake Gate Body \$950.
