BRITISH TROOPS NEARING CAMBRAI

Dominating Ground is Taken From Germans After Two-Day Struggle.

With the British Armies in the Field—General Byng's guns were battering down German defenses around Cambrai.

His men were fighting their way onward despite a concentration of German reserves that fairly flooded the depot city. The fighting was the most desperate since the great surprise attack of last week.

British troops have captured the high ground in Bourlon wood and now dominate the region about Cambrai. This success came after two days of the most vicious fighting and its importance is indicated in part by the fact that German traffic southeast from Cambrai has been heavy, the probability being that the civil population of the town has been removed.

General Byng and the third army have broken the Hindenburg line, taken a score of villages, secured the dominating position west of Cambrai and overrun territory equal in area to that gained in the first three months of the drive in the Ypres salient. Nearly 10,000 prisoners, 100 guns and much war material have been captured.

British tommyes using the enemy guns against the Germans were reported at several points, illustrating the speed of the British onslaught. At one point two enemy '77s were seized from the enemy, their carriages twisted around and the fire from their two throats so speeded against the enemy by the British gunners that the muzzles glowed redhot and jammed the shells.

U. S. WARSHIPS CAPTURE U-BOAT

Washington.—Forty German U-boat sailors are American prisoners of war and their vessel is at the ocean bottom—the result of a daring drive by United States destroyers in the war zone.

The American destroyers, cruising through the war zone, sighted the white streak of a submarine. Full speed ahead was ordered as the vessels sped toward the target. Passing forward of the spot where the tell-tale foam was sighted, one destroyer dropped a depth bomb.

This wrecked the U-boat's horizontal rudder and made her powerless to guide herself except to come to the surface.

She came up only about 500 yards from the waiting destroyers.

The destroyers circled about the U-boat, firing until the crew, clambering out of the hatches, raised their hands in surrender.

A tow line was passed, while the prisoners were taken off the captive vessel. But while this operation proceeded one German opened the submerged valves and the submarine went down.

CZAR'S DAUGHTER ESCAPES

Girl Reported on the Way to the United States.

New York.—Miss Tatiana Nicolaevna Romanoff, second daughter of Nicholas Romanoff, deposed emperor of Russia, has escaped from Siberia through a fictitious marriage to a son of a former chamberlain of the emperor and now is on her way to the United States, according to information made public here by persons connected with the Russian civilian relief committee.

The former grand duchess, who is 20 years old, made her escape from Tobolsk, the present home of the exiled emperor, to Harbin in Manchuria and thence to Japan, where passage was taken on a steamship for the Pacific coast.

Russians Would Fight for U. S.

Washington.—John Sookine, first secretary of the Russian embassy and an officer of the Russian army, and Ferdinand De Mohrenschildt, the second secretary, who married Secretary McAdoo's daughter last May, have offered their services to the American government for the war against Germany. They resigned rather than serve the Bolsheviks.

British and French Aid Italians.

Italian Army Headquarters in Northern Italy.—Solid ranks of Franco-British infantry with artillery and supply trains were seen by the correspondent within sound of the battle on the Italian northern line. They had been on an eight-day march.

Government May Take Coal Mines.

Washington.—Michigan coal operators were warned by Fuel Administrator Garfield that the government will take over and operate their mines if they carry out their threat of refusing to sell coal at the government fixed prices.

British Take Mizpah.

London.—The site of ancient Mizpah, 5000 yards west of the Jerusalem-Nabulus road, has been stormed by the British.

WM. B. WILSON

William B. Wilson, secretary of labor, who is on the Pacific Coast investigating labor conditions.

BOLSHEVIKI PEACE PLAN IS MATURING

Petrograd, via London.—Leon Trotsky, foreign minister in the Bolshevik cabinet, has sent a note to the diplomatic representatives of neutral powers in Petrograd, according to the official news agency, informing them of the measures taken by the government to obtain an armistice.

At a meeting of the central executive committee of the workmen's and soldiers' deputies the Bolshevik premier, Lenin, in reply to criticism directed against the order that the soldiers open negotiations for an armistice, declared that Russia did not contemplate a separate peace with Germany; that the belief that an armistice on the Russian front would make it possible for Germany to throw a large force on the French front was groundless, and the Russian government, before signing a treaty for an armistice, would communicate with the allies.

BRIEF WAR NEWS

More than 100 guns were captured by the British during the recent offensive toward Cambrai, including numerous heavy pieces.

Normal artillery and normal patrol activity — but abnormal mud — expresses the trench conditions on the "American front" in France.

After hard fighting the British forces are now in possession of Bourlon and the greater part of Bourlon wood, west of Cambrai, giving them a dominating position over the much-sought-for railroad center and the surrounding country.

The Germans are resisting desperately the British advance around Cambrai, which is being pressed most energetically. General Byng's evident intention is to drive in behind the main Hindenburg line, breached in last week's surprise attack.

In Palestine the British are closing in on Jerusalem, their official statements claiming added interest because of the increasingly frequent mention of Biblical names. The site of the ancient Mizpah, some eight miles west of Jerusalem, was carried by storm.

The Italians are more than holding their own against the savage attacks of the Austro-Germans from the region of Lake Garda eastward to the upper reaches of the Piave river. The invaders have switched their main offensive to the Asiago plateau sector, but have been held by the Italians without the gain of a yard of ground. The fighting along the Piave river has been sporadic, but at one place where the enemy attempted to cross the river on pontoons he was wiped out by the fire of the defending artillery.

Gompers A. F. of L. President.

Buffalo, N. Y.—Samuel Gompers, president of the American Federation of Labor for 35 years, was re-elected virtually without opposition. The reelection of Gompers was complete endorsement of the federation's strong pro-war policy which he had espoused. It marked the overwhelming overthrow of the pacifist factions.

Austria's Black and Yellow.

The Austrian black and yellow were the colors of the Holy Roman Empire. They were adopted, so the story goes, by Frederick Barbarossa, whose fancy was captured at a ceremony in Mayence by the black and gold flooring of the hall.

That Made a Difference.

A cartman charged with overloading his horse was asked how heavy a load he had on his truck. "About a ton," he replied, "but it was all light stuff."—Boston Transcript.

Sure of It.

"I have looked over this girl Will is so crazy about, and I tell you she won't answer." "Oh, yes, she will, if anybody asks her."—Baltimore American.

Letter Writing.

De Quincey advised "all who would read our noble language in its native beauty, racy in its phraseology, delicate yet sneaky in its composition, to steal the mail bags and break open the letters in female handwriting!"

After reading this it was not a surprise to find that credit is given for the invention of letter writing to a woman—a woman of royalty—the Persian princess, Alossa. According to one of the old writers, this invention was a marvelous "easement" to the absent lover and anxious friend.

Southey said, "A letter is like a fresh billet of wood upon the fire, which, if it be not needed for immediate warmth, is always agreeable for its exhilarating effect."

In her "Sonnets From the Portuguese" Mrs. Browning says: My letters! All dead papers, mute and white, And yet they seem alive and quivering Against my tremulous hands which loose the string, And let them drop down on my knees to-night.

Hurled Into Sunshine.

"I was in Petrograd just after the revolution, during the first appraisal of the new assets," writes Isaac F. Marcossian in Everybody's. "Like prisoners long immured in the dark and suddenly hurled into the sunshine, the people blinked in the strange light of their unfamiliar emancipation. The one time balliwick of the czars was a study in scarlet—animate like an American city during a national convention. Its great thoroughfare—the Nevski Prospekt—once the street of sacrifice, was now the highway of happiness. Never was there such glad reunion. It was like the meeting of lost tribes after much wandering in the wilderness. Exiles streamed in from Siberia under the general amnesty; Jews came forth from their long restraint, for creed lines were down; delegations of troops flocked from the front. Equality was the password that loosed every tongue."

A Siberian Wonder.

The geologists have for years been perplexed over the wonderful frozen well at Yakutsk, Siberia. As long ago as 1828 it was announced that the ground was frozen to an abnormal depth at the place referred to. In the summer of 1829 a Russian merchant set a gang of men to the task of ascertaining the depth of the frozen stratum. They gave up the job after digging some thirty feet in solidly frozen ground. The Russian Academy of Sciences took the matter in hand and between 1838 and 1844 dug to a depth of 382 feet and then abandoned the shaft because the earth was still frozen as hard as a rock. Natural cold could never penetrate to such a depth, and the phenomena is still unexplained.

Tortoise Shell.

The finest of tortoise shell is said to be that which comes from the Indian archipelago, although much of that obtained on the Florida coast is of the very best quality, says the Scientific American. There are three rows of plates on the back of the animal called "blades" by the fishermen. In the central row are five plates and in each of the others four plates, the latter containing the best material. Besides these, there are twenty-five small plates around the edges of the shell, known as "feet" or "noses." The biggest turtle does not furnish more than sixteen pounds of shell. Formerly the undershell was discarded as worthless, but now it is much esteemed for its delicacy of coloring.

Loose Clothes Are the Best.

To keep the body healthy clothes should not be tight, declares the National Safety Council, quoted in the Scientific American. In cold weather we should wear lightweight clothes while in the house. Upon going out of doors put on heavy outer clothing. Do not wear a tight hat. It cuts off the blood from the skin of the head and makes you bald. A soft hat is the best. Do not cripple your feet with tight shoes. Shoes that fit cost no more.

New Experience.

"You seem very patient with shoppers, young man; don't mind showing the goods." "I used to canvass from door to door," explained the new clerk. "It's a novelty to me to find people even willing to look at the stuff."—Louisville Courier-Journal.

The Division.

Redd—So they are divorced at last? Greene—Yes; at last. "What sort of a division did the judge make?" "Oh, she got the custody of the car, and he's allowed to look after the mortgage."—St. Louis Post-Dispatch.

Porpoise and Whale.

Whales and porpoises are mammals, like cattle and sheep, and their flesh is "meat," not "fish." In texture and appearance it resembles beef, though the color is darker red, and the flavor is closer to that meat than to any other. It is devoid of all fishy taste.

Hot Applications.

As a substitute for hot water bags in ordinary ailments, such as toothache, earache and other minor pains, use common flannel bags made in convenient sizes, with drawstrings. Fill them with hot sand or salt and they are safer than a cheap rubber bottle, just as efficacious and much handier to use. Keep half a dozen ready. They are of great help in time of aches and pains.

in the Court.

"Now, my good woman, I will take up the subject of your dispute with your husband." "But you can't take it up, your honor." "Why can't I, madam?" "It's the parlor carpet, sir."—Baltimore American.

Death.

Death opens the gate of fame and shuts the gate of envy after it; it unloosens the chain of the captive and puts the bondsman's task into another man's hand.—Sterne.

Training Children.

Do these things for your children, says Leo Tolstoy, if you would properly train them:

Let them do all they can for themselves—carry their own jugs, wash up, arrange their own rooms, clean their boots and clothes, lay the table. Believe me, that unimportant as these things may seem, they are a hundred times more important for your children's happiness than a knowledge of French or of history.

These things train the children to simplicity, to work and to self independence.

If you can add work on the land, if it be but a kitchen garden, that will be well.

Believe me, that without that condition there is no possibility of a moral education, a Christian education or a consciousness of the fact that men are not naturally divided into the classes of masters and slaves, but that they are all brothers and equals.

Sand Dunes in Gascony.

One of the most interesting and remarkable of the many regions for the observation of sand dunes lies between Bordeaux and Bayonne, in Gascony. The sea here throws every year upon the beach, along a line of 100 miles in length, some 5,000,000 cubic yards of sand. The prevailing westerly winds continue picking up the surface particles from the westward slope, whirl them over to the inward slope, where they are again deposited, and the entire ridge by this means alone moves gradually inward. In the course of years there has thus been formed a complex system of dunes, all approximately parallel with the coast and with one another and of all altitudes up to 250 feet. These are marching steadily inward at a rate of from three to six feet a year, whole villages having sometimes been torn down to prevent burial and rebuilt at a distance.

When Ice Covered Europe.

During the long tertiary epoch, when opussins sported themselves on the site of Paris and mastodons tramped along the valley of the Thames, the earth was in the throes of mountain making. The Alps, the Himalayas, the Alleghenies, the Andes, attest the power of her activity in those days. At their termination our continents stood greatly higher than they do now, and this aided their glaciation, although it does not fully account for it. But as they became loaded with ice Europe and America gradually and we may venture to say contemporaneously sank. This was inevitable. Owing to the extreme heat and pressure prevailing in its interior the earth is an eminently elastic body. Its surface actually bulges in or out with a very slight increase or decrease of the load upon it.

Swapping Horses.

An Indiana man was traveling down the Ohio on a steamer with a mare and two-year-old colt when by a sudden career of the boat all three were tilted into the water. The Hoosier, as he rose puffing and blowing above water, caught hold of the tail of the colt, not having a doubt but that the natural instinct of the animal would carry him safely ashore. The old mare made for the land, but the frightened colt swam lustily down the current with its owner still hanging fast. "Let go of the colt and hang on to the mare!" shouted some of his friends. "Booh!" exclaimed the Hoosier, spouting the water from his mouth, "it's mighty fine telling me to let go the colt, but to a man who can't swim this ain't exactly the time for swapping horses."—Ottawa Citizen.

Parallel Stories.

When Napoleon was a student at Brienne he happened to be asked by one of the examiners the following question: "Supposing you were in an investment town, threatened with starvation, how would you supply yourself with provisions?" "From the enemy," replied the subalternant of artillery. And this answer so pleased the examiners that they passed him without further questioning. Now, Napoleon's answer was by no means original, for one of Suvaroff's sergeants obtained promotion from the ranks by giving the very same answer when asked the very same question.

Hot Applications.

As a substitute for hot water bags in ordinary ailments, such as toothache, earache and other minor pains, use common flannel bags made in convenient sizes, with drawstrings. Fill them with hot sand or salt and they are safer than a cheap rubber bottle, just as efficacious and much handier to use. Keep half a dozen ready. They are of great help in time of aches and pains.

Paroisse and Whale.

Whales and porpoises are mammals, like cattle and sheep, and their flesh is "meat," not "fish." In texture and appearance it resembles beef, though the color is darker red, and the flavor is closer to that meat than to any other. It is devoid of all fishy taste.

in the Court.

"Now, my good woman, I will take up the subject of your dispute with your husband." "But you can't take it up, your honor." "Why can't I, madam?" "It's the parlor carpet, sir."—Baltimore American.

Death.

Death opens the gate of fame and shuts the gate of envy after it; it unloosens the chain of the captive and puts the bondsman's task into another man's hand.—Sterne.

Death.

Death opens the gate of fame and shuts the gate of envy after it; it unloosens the chain of the captive and puts the bondsman's task into another man's hand.—Sterne.

Does Your Horse Kick On His FEED?

A POORLY FED HORSE reflects discredit on its owner, but the owner gets the worst of the deal because economy in feeding the horse affects its working capacity as well as its appearance. If your horse kicks on his feed you can correct it by buying your feed here, as you get the best quality for the least outlay. Farmers, contractors and horse owners generally know that our feed is always up to the standard.

STERLING FEED CO.

Just a Tilt of the Pail

Women don't mind filling the knee-high supply can of the new Suction-feed. Only a few inches to lift. No straining of back or arms.

THE NEW SHARPLES SUCTION-FEED

Separator gets all the cream all the time. Any other separator will lose cream when the speed slackens. You can't always turn it exactly the right speed. No one can. It's impossible, speed indicator or no speed indicator. The Suction-feed skims clean, fast or slow, and delivers even cream. Capacity increases with the speed. Come in and let us show you how it works.

STERLING FEED CO

NOTICE OF FINAL SETTLEMENT.
In the county court of the state of Oregon for Lane county. In the matter of the estate of Hannah Deets, deceased.

Notice is hereby given that R. B. Woolley, the executor of the estate of Hannah Deets, deceased, has rendered and presented for final settlement, and filed in the above named court, his final account of his administration of said estate, and that Friday, December 7th, 1917, at eleven o'clock a. m. at the county court room of said court at the court house in Eugene, Lane county, Oregon, has been duly appointed by the said court for the settlement of said account and the finding and decree of the said court as to the heirs of the said estate and for the distribution of the residue thereof, at which time and place any person interested therein may appear and file or interpose objections to said account or decree.

Dated this 7th day of November, A. D. 1917. R. B. WOOLLEY, Executor.

The Sentinel has several inquiries every week for sample copies from out-of-the-state people figuring on looting here. Those having real estate for sale should put their ad, in The Sentinel, so that it may be seen by these prospective settlers.

NOTICE OF EXECUTOR'S SALE OF REAL ESTATE.

In the county court of the state of Oregon for Douglas county. In the matter of the estate of James B. Powrie, deceased.
