## Ordinary Common Sense— Sensible Thrift—and Maxwell Motor Cars

Common sense says to you, "Buy a Maxwell Car and use it."

The American people are going forward—not backward.

That is the purpose of the great war in which we are now engaged.

The success of the Nation depends on healthy business activity over the country—and sensible thrift.

Healthy business depends on the utilization of every possible labor-saving, time-saving, money-saving device known.

The light-weight, economical Maxwell—in passenger service—taking you where you have to go on business, helping you relieve delivery congestion—is one of the greatest known labor-saving, time-saving, money-saving devices.

#### PEDIGREE AND GUARANTEE.

An animal is like a machine. To make a good machine requires that each part be of good material and just the right weight and strength. The good animal must have its parts developed in the right proportion to make the type desired. The adaptability of a machine and the proportioning of its parts can be largely determined by looking at it. However, the make of the machine is the guarantee as to its possessing or lacking quality. Likewise in the animal a good deal can be determined as to its type by looking at it. Its real quality, however, cannot be determined in this way. To get at this it becomes necessary to go further back. The quality was put into the animal by its parents, its grandparents, etc. This makes it important to know that all these parents had qualities that would contribute to the making of a good animal of the type wanted. A pedigree is a scheme for keeping track of the parents of an animal. It is a guarantee of what is back of the animal, of what has contributed to its make-up. It is this fact that makes the purebred animal valuable.—North Dakota Experiment Station.

#### DEHORN CALVES WHEN YOUNG

Treatment is Painless if Applied Before Animals Are Week Old—Directions to Follow.

(By CARL J. MENZIE, Ferndale, Wash.)  
Young calves can be painlessly dehorned if the treatment is applied before they are one week old. Anyone can do it if they follow directions:  
Procure from a druggist a stick of caustic soda or caustic potash—it usually comes in sticks five inches long and the size of a lead pencil. Now clip the hair off over the place where the horn can be felt. After this is finished, wash with soap and water and thoroughly dry with a towel. Take the stick of caustic and wrap some paper around the end that is to be held in the hand. Now moisten the other end and rub on each clipped spot alternately, two or three times, allowing time for it to dry between each application. Don't get the stick too wet and rub only where the horn is to appear, because if it gets on the surrounding skin it will eat the flesh away and cause pain. After the treatment protect the calves from rain, as water on the head will cause the caustic to run on the surrounding skin.

#### ESSENTIAL TO LIFE OF SOIL

More Vegetation Must Be Turned Under to Replace That Burned Out by Heat of Sun.

The time has come when we must turn under more vegetation to replace that burned out by the heat of the sun and intense cultural methods. Vegetable matter is essential to the life and yield of the soil. Regardless of the amount of plantfood in the soil, before a good yield can be expected the land must have enough organic matter to make it light, mellow and friable. The first essential is vegetation, then moisture, and next cultivation. Do not be too persistent in leaving the fields clean. A few weeds may not be altogether objectionable.

## POULTRY FACTS

### WINTER QUARTERS FOR HENS

Fowls Should Not Be Given Same Ground They Have Been Running Over All Summer.

No flock of chickens should go into winter quarters on the same old ground they have been running over all summer. Sprinkle the runs with lime water and then turn it under either with a spade, fork or plow. Rake it smooth after the surface has been turned and the fowls will soon make it firm by their tramping. Where fowls are confined in limited runs, this rule is imperative for complete sanitation. On larger runs it should be done if possible. The chicken house should be gone over with a hose or with a good pump

Open Front Poultry House.

spray to remove the accumulations of summer germ-laden dust. All the trash should be cleaned out and spread on some distant field or orchard, and the floors should be cleaned and sprayed. Clean, dry litter must be had for the exercising rooms. If the cloth curtains are dusty and dingy, take them down, spread them on the clothes line, and spray them with clean water until white and clean. The germs of contagious diseases are very apt to linger in the cloth hangings. The droppings boards should be spread out on the ground and scrubbed clean with water and allowed to dry thoroughly in the sun. Lime water run over them at the last helps to make them ready for a long winter's use.

#### START WITH LITTLE CAPITAL

Small Shack in Back Yard, Few Good Fowls and Business Is Begun—Attend to Details.

What most always attracts people to the poultry business is the fact that one can start with little capital. A little shack in the back yard, a few good fowls, and the business is begun. Such a start has been the beginning of many a man's success in the poultry line, and some of the greatest poultry successes in the country have had their start in this way. Of course, they supplemented their start with intelligent effort, attention to all the details, and sound business judgment. You can do the same.

#### PROPER FEEDING IN WINTER

Practice of Confining Fowls to House During Cold Weather necessitates Extra Care.

The general practice of confining the laying stock to the house during the winter necessitates extra care and attention if good results are to be had. The houses must be kept clean and the birds supplied with the important feeds they find on the range. Plenty of minerals, in the form of grit and shell, and a liberal supply of green feed must be provided in addition to the regular feeds. Exercise is best supplied by feeding the whole grains in a deep litter of straw.

#### WATER SUPPLY HELPS EGGS

Automatic Fountain Is Most Sanitary Way of Giving Hens Water During Winter Season.

Plenty of pure, fresh water should be supplied daily. An automatic drinking fountain is the most sanitary way of supplying water. In cold weather, when the water may freeze quickly, the difficulty may be overcome by heating the water. The fountain being air tight, except the space from which the hens get the supply, the water remains warm sufficiently long for them to get all they wish. The can, however, should be emptied every day, to keep it from being injured by frost.

#### DUST BATH VERY IMPORTANT

Common Road Dust Will Answer Purpose—Place in Hen House Where Sun Can Reach It.

Do not forget that the hens need a dust bath. Common road dust will suffice for this purpose. At your first opportunity gather a barrel of dry dust from the road and place it in the hen house in a well-made dust box where the sun's rays can reach it throughout the day. An occasional adding of ashes from the stove will keep it in good condition.

#### HOARDERS OF SUGAR ARE TO BE PUNISHED

To prevent hoarding of sugar by short-sighted or unprincipled individuals, Acting Federal Food Administrator W. K. Newell has issued instructions to all the retail grocers of Oregon, restricting the sale of sugar as follows:  
Sales to family consumers are limited to \$1.00 lots, unless to repeated only at reasonable intervals.  
Farmers living at a distance from purchasing points will be permitted to purchase in 25 pound lots.  
Hotels, restaurants and boarding houses are limited to a ten days' supply at one purchase.  
Sugar shall not be used as a leader for special sales or to encourage the sale of other merchandise.  
In exceptional cases, where purchasers live at great distances, special arrangements may be made for sales in such lots, such sales to be reported with all details to the United States food administration at Portland by the grocer making same. This exception is only to be made in cases where repeated trips for additional sugar in the winter season would work a real hardship to the purchaser.  
The restrictions will be in force until further notice.  
Persons discovered hoarding sugar are subject to penalty for obstructing the administration of the food control law, and the hoarded sugar is subject to confiscation.

#### WILL ANSWER QUESTIONS ABOUT ARMY AND NAVY

Assistant Surgeon J. S. Saurman, U. S. navy, and Chief Postmaster's Mate D. Warner will be here Saturday for the purpose of giving free information to all those who are in doubt as to any of the provisions of the new draft act, which takes effect that day, and also as to the new insurance laws for men of the army and navy. They will freely answer any other questions they are able to in regard to any other branch of army and navy work and the laws governing the same. Those who wish to know whether or not they are physically fit for the army or navy will be given free examinations upon request and without obligation upon the part of the person examined to join any branch of the service.

#### Apply Tar and Feathers.

Hugo, son, Dec. 11.—Henry Dutsch, said to be a Denver man, was seized by a mob of citizens here tonight, following alleged pro-German utterances by him, strangled his beard and a coat of tar and feathers applied. His clothing was put on over the tar and he was placed on a Denver-bound train in charge of an armed guard named Kaiser, with instructions that he be turned over to the federal authorities at Denver.  
Dutsch was here on a business trip, and during the evening his remarks, including pro-German sentiments, it is said, aroused his hearers. Ten men seized Dutsch, handcuffed him, and led him a mile out of town, where the tar and feathers were applied. A rope was placed around his neck and he was made to kneel and kiss the Stars and Stripes.  
Dutsch's clothes were placed on top of the feathering covering, and with a sign, "On to Berlin," on his back, he was led to the railway station, where he was placed aboard a train in charge of Gottlieb Kaiser and Al Fitch, two young men, who were instructed to turn him over to the federal authorities.

#### Geo. Walker Will Engage in Fishing

Eugene Register. G. O. Walker, well known resident of Walker station, is preparing to open a wholesale fish business in Eugene. He intends to put boats on the Siuslaw and Umpqua rivers and ship the fish direct to Eugene, thence distributing them to the outside points from this city.  
Mr. Walker plans to have the fishermen turn over their catch each morning after they are through with their night's work, instead of placing them in cold storage as is now done, and will ship them to Eugene on the train which arrives here at 1:35 o'clock in the afternoon, thus arriving here only a few hours after they are caught.  
Later on it is the intention of Mr. Walker to equip a boat for deep-sea fishing and engage in catching halibut for the trade. There are halibut banks off of Malina, and the coast that are only awaiting development.

#### Teachers' Examinations.

Warner will be here Saturday for the purpose of giving free information to all those who are in doubt as to any of the provisions of the new draft act, which takes effect that day, and also as to the new insurance laws for men of the army and navy. They will freely answer any other questions they are able to in regard to any other branch of army and navy work and the laws governing the same. Those who wish to know whether or not they are physically fit for the army or navy will be given free examinations upon request and without obligation upon the part of the person examined to join any branch of the service.

#### Apply Tar and Feathers.

Hugo, son, Dec. 11.—Henry Dutsch, said to be a Denver man, was seized by a mob of citizens here tonight, following alleged pro-German utterances by him, strangled his beard and a coat of tar and feathers applied. His clothing was put on over the tar and he was placed on a Denver-bound train in charge of an armed guard named Kaiser, with instructions that he be turned over to the federal authorities at Denver.  
Dutsch was here on a business trip, and during the evening his remarks, including pro-German sentiments, it is said, aroused his hearers. Ten men seized Dutsch, handcuffed him, and led him a mile out of town, where the tar and feathers were applied. A rope was placed around his neck and he was made to kneel and kiss the Stars and Stripes.  
Dutsch's clothes were placed on top of the feathering covering, and with a sign, "On to Berlin," on his back, he was led to the railway station, where he was placed aboard a train in charge of Gottlieb Kaiser and Al Fitch, two young men, who were instructed to turn him over to the federal authorities.

#### Geo. Walker Will Engage in Fishing

Eugene Register. G. O. Walker, well known resident of Walker station, is preparing to open a wholesale fish business in Eugene. He intends to put boats on the Siuslaw and Umpqua rivers and ship the fish direct to Eugene, thence distributing them to the outside points from this city.  
Mr. Walker plans to have the fishermen turn over their catch each morning after they are through with their night's work, instead of placing them in cold storage as is now done, and will ship them to Eugene on the train which arrives here at 1:35 o'clock in the afternoon, thus arriving here only a few hours after they are caught.  
Later on it is the intention of Mr. Walker to equip a boat for deep-sea fishing and engage in catching halibut for the trade. There are halibut banks off of Malina, and the coast that are only awaiting development.
