- Class 7—showmanship

**Planting project for Kids**

The purpose of the activity is to provide kids, and their parents as well, the opportunity to plant their own edible plants (vegetables and herbs) to take home with them. Log House Plants supplies the planters, plants and soil, and the kids plant what they choose. We offer information on what they plant and caring for their little garden. The kids love getting their hands dirty, and knowing that they are able to eat what they grow. Its really great to see kids, and adults having fun, and they seem to love it!
