the following alternatives and mitigation measures to be taken to minimize adverse impacts and to restore and preserve natural and beneficial values:

Alternatives:  
No Action: Not viable; does not correct the undersized conveyance system.

Replace Existing Gravity Main; Not economically feasible and would produce larger footprint causing more floodplain and wetland disturbance.

Direction Drill Force Main; Not permitted in floodway by funding agency.

Mitigation Measures:  
Restore trench surface grades to pre-construction grades.

Place original top soils in the top 12 inches of trench area.

Install pipe zone impervious check dams at 20 foot intervals to prevent draining of ground water.

Proposed action has no impact on existing structures upland of project site.

Completed project will comply with all FEMA Floodplain regulations.

The **City of Yoncalla** has reevaluated the alternatives to building in the floodplain and has determined that it has no practicable alternative. Environmental files that document compliance with steps 3 through 6 of **Executive Order 11988 and 11990**, are available for public inspection, review and copying upon request at the times and location delineated in the last paragraph of this notice for receipt of comments. This activity will have no significant impact on the environment for the following reasons:

Trench surface grades will be restored to pre-construction grades. Original top soils will be placed in the top 12 inches of trench area. Pipe zone impervious check dams will be installed at 20 foot intervals to prevent draining of ground water.

There are three primary purposes for this notice. First, people who may be affected by activities in floodplains and those who have an interest in the protection of the natural environment should be given an opportunity to express their concerns and provide information about these areas. Second, an adequate public notice program can be an important public educational tool. The dissemination of information about floodplains can facilitate and enhance Federal efforts to reduce the risks associated with the occupancy and modification of these special areas. Third, as a matter of fairness, when the Federal government determines it will participate in actions taking place in floodplains, it must inform those who may be put at greater or continued risk.
