Technical Upgrades Coming to London

Some of the South Lane Television audience will remember that a year or more ago, SLTV had to make some technical changes to our Hansen Butte location in order to clear an FCC mandated path for the expansion of cellphones and 5G technology in our area. The work on Hansen Butte went pretty smoothly, and now it is time to do the same work at our London Springs location. These technical changes will require that channels on the London system be interrupted for a brief period of time. It is difficult to predict the exact length of the outage but we are hoping everything will go smoothly and interruptions will be minimal. Once the modifications are made, you will need to rescan your television in order for it to work properly with the new system.

This work is a part of the FCC's "repack" of television stations, including translators, all across America. The work will be occurring in the next few days. As mentioned, once the technical modifications are completed, you will need to rescan your TV. After your rescan, you should see no changes in your channels or favorite programs. If you happen to accidentally scan prior to completion of the work, you will simply need to rescan again once the work has been completed.

All repack work has been completed on the main Cottage Grove (Hansen Butte) site and at the Dorena/Culp Creek site. We appreciate Londoner's patience and understanding during this time, as we strive to keep your system up-to-date.

Happy viewing,
Lloyd Williams, President
SOUTH LANE TELEVISION
