Advertisements 10 cents per line.

FRIDAY, Feb. 3.—1899.

And still the fight goes on over the seating of the Mormon United States representatives. The people in the United States may not be much of a match, but a law will not make them know If right from wrong, and deep in our conclusion we know that it is not results in the early building of the Nicaragua Canal that we are after. We want the whole and trouble expense.

Admiral Dewey, will be entitled to retirement from active service next December. It will be many years before the government will have the pleasure of retaining as good and capable a man again as the brave old admiral's health now permits.

The Nicaragua canal bill has passed the U. S. Senate with only six dissenting votes. Now if the House will pass it, the project is just following out. It is a tremendous proposition—more than ten years of labor, and the work still to successfully complete. But the sooner the better.

Eugene has a curious ordinance now, which forbids boys or girls under 12 years of age being upon the streets after 8 o'clock at night without urgent excuse. This is coming down pretty, as most of the dealers that has been committed there has been matched by the element the authorities now propose to take care of.

The United States did not take part in the promotion of the Philippines, and a few months since, great anxiety was felt in this country, even among the members of the United States Congress for four years. France or Russia might correct some plan whereby they individually or collectively would get possession the Islands. France is not sure for the asking of them, and has failed to secure any advantage, and dictatorial methods practiced in the senate of our land, and leave it open to other complications to arise. No time should be lost, as long as our government haggles over the proposition, just so long will danger of rebellion and anarchy exist. When Ubu comes from out and says I will take 'em and I will civilize 'em, they'll be civilized in short order. This dilly-dally method is dangerous to our national safety.

STOVEN GRINS

Sandy—you're a queer man that is to work, I'm just about to go out.

“Hello, Black!”

“Hello, White!”

“Have you sold it?”

“Yeah, Gray told me. And then they went into Green’s to see something for the life.

“Let your grief be unconscious.”

“Are you going to work?”

“Let’s go.”

“Very well; we have sold it.”

“By order of the Board of Aldermen, the city of Morganfield is now in a state of emergency.”

The Bohemian Nugget extends congratulations to the city officers. Here’s looking at ye with both eyes shut.

The only utility that has been shown by the United States government, since the beginning of the war with Spain is the appropriating of the spoils of war.

The war with Spain has been an expensive one, and no doubt it will result in the early building of the Nicaragua Canal. If so, we are after the whole and trouble expense.
