

Paint and Pottery Clay Mine.— Ellis Simmons who lives near Walker station and who has for some time been experimenting with some ore which he discovered on his place, is now in possession of advices from Assayer Fisk of Portland and the Chicago Lloyd Iron Roofing and Paint Co of Chicago, which proves conclusively that Mr. Simmons has something that will attract considerable attraction and without doubt make him a handsome income. Assayer Fisk says: "The ocher is a first class quality. It is one of the best articles with lead for fire proof paint. The clay is only good for pottery, and is a rather 'fat,' so called. It has a large percentage of alumina in it. I can't tell you the exact ingredients without an analysis which is quite a job and worth \$20 to analyze it, but if the ocher was ground I can get you a cent a pound for all you send here. The Chicago firm tells Mr. Simmons that he has some very desirable ores, and advices him to get some coast firm interested in his proposition, affirming that their is a good thing in his find if he handles it right."

STORE ROBBED.

L. Lurch's Store Entered by Petty Thieves.

Last Tuesday night the general merchandise store of L. Lurch in this city was entered and a goodly supply of tobacco, two watches, pocket knives, cigars, etc., were taken.

At the rear of the store is a gate making an entrance from the street to the rear door of the store between the store building and the warehouse. Through this the robber or robbers, evidently tried to make an entrance, as the gate was found open, but the door proved too strong for them and they retraced their steps to the street and with the aid of a half round carpenter's chisel which was afterward identified as belonging to the tool bench in the old planing mill, succeeded in raising a rear window about half way up. Through this window the entrance was gained. The money till was taken out and deposited on the floor, but only a few cents were obtained from that. The light fingered gentry then went to the jewelry case and helped themselves to two watches, one ladies watch, then to the cigar case and partook of a liberal amount of smokes, then to the tobacco shelves, where a sample of each kind of smoking tobacco was appropriated, and then to the cutlery department, where several pocket knives were added to the stolen wares.

The chisel was found in the axe rack which set directly under the window through which the entrance was made.

TRIED A MILLINERY STORE.

About three o'clock in the morning Miss Annie Heinrich who resides in the rear rooms of her millinery store was awakened by a noise at the back door. The door was frosted glass and as she looked in the direction of the door a match was being lighted by the parties and an effort was apparently being made to procure an entrance. She also thought she heard talking. Miss Heinrich's awakening and stirring about alarmed the house breakers and they departed. They were probably the same parties who broke into Lurch's store.

Constable McFarland and his assistant Bob Yeatch and Marshal Miller are all at work on the case.

Good Position.
