Gunboats Dislodge Rebels

Concealed in a Jungle or the Rio Grande.

HEAVY FIRING AT SHORT RANGE

Americans Opened With Rapid-Fire Guns and Put the Enemy to Rout—Twenty of the Natives Killed.

Manila, May 16.—The tinclad gunboat Laguna de Bay and Cavadonga and a launch, under Captain Grant, ran into a nest of insurgents concealed in the bushes on both sides of the Rio Grande, three miles above Calumpit, yesterday afternoon, and were received with heavy volleys at short range. A sergeant belonging to the Utah battery was killed, and one private was wounded.

Opening with their rapid fire guns, the Americans killed 20 of the natives and wounded several others, filling the jungle with a hail of shot for half an hour, until the enemy fled.

Flanked the Enemy.

Manila, May 16.—Two companies of the Second Oregon volunteers, and the same number of Minnesota men, with 20 American scouts, under Captain Case and Berkheimer, flanked the insurgents at San Ildefonso this morning and captured the place.

The Filipinos, in terror and panic, fired 20,000 rounds of ammunition, but only slightly wounded one scout. One insurgent officer was killed and six men wounded.

The insurgents retreated and are now at San Miguel, six miles north of San Ildefonso.

A CHECK TO RUSSIA.

China Refuses a Demand for Railway Concessions.

Shanghai, May 16.—The tsung-liaman (Chinese foreign office) has replied to the Russian minister at Peking, M. De Giers, that the government is unable to accede to the Russian demand, made last Wednesday, for a new railway concession connecting Peking with Russia's present system in Manchuria.

Not since the taking of Port Arthur by Russia have the Chinese been so agitated as over this demand. Whether M. De Giers named a specific route is not yet ascertainable, some officials asserting that only a preliminary notice was given for a line direct from Peking to Shan Hui Kwon.

Certainly the British legation in Peking had no previous knowledge that such proposal was coming from St. Petersburg. The concession asked for would ruin the existing northern railways, in which British capital to the amount of £2,000,000 is invested, but there seems to be no alternative route without interfering with plans for railway extension which the Chinese themselves have in mind.

It is believed that Russia's action in this matter is intended to demonstrate to the world that the recent convention with Great Britain respecting spheres of influence in China, which was notified to the Chinese government almost before this last convention was demanded, has not fettered the action of Russia at the court of Peking, and also to strengthen Russia's prestige with the Chinese, which was unfavorably affected by her withdrawal of her late protest respecting the northern rail-

ways.

SITUATION ON THE ISLANDS.

Otis Gives Orders for Receiving the Filipino Negotiators.

Washington, May 16.—The following dispatch from Major-General Otis, giving the status of the military situation, as it now exists, in the operations against the insurgents, was received at the war department today:

MacArthur remains at San Fernando, covering the country.

"Yesterday a messenger came from Aguilao expressing a wish to send a commission to Manila for a conference with the United States commission to arrange terms of peace. Directions have been given to pass a body of representative insurgents to Manila, should they present themselves.

WENT OVER A BANK.

Freight Train Wrecked in Cow Creek Canyon—Heavy Engine Spread Rails.

Roseburg, Or., May 16.—Through freight train No. 822, from Portland to San Francisco, was wrecked in Cow Creek canyon, at Rattlesnake point, six miles south of Riddle, at noon today. James McCalley, the engineer, was killed, and James Merriman, the fireman, seriously injured. It is reported that a boy tramp who was stealing a ride was killed, and that another boy is under the wreck. The names of the boys are not known.

The train was drawn by locomotive No. 18, of the Astoria-Portland system. It is one of the heaviest on the road. Its great weight caused the rails to part.

The locomotive and five loaded cars left the track and plunged over a perpendicular bank 25 feet high. The engine turned over twice, and a carload of flour piled on top of it. The tank was bottom side up, with Fireman Merriman underneath.

When Conductor Everton rushed through the smoke and steam he found Engineer McCalley standing erect, with one hand on the lever and the other over his mouth. When carried out he looked at his scalded hands, and exclaimed, "My God, this is awful." He lived only a few minutes. He was terribly scalded.

Fireman Merriman was unconscious when released. On regaining consciousness he said Engineer McCalley told him not to jump. He is badly cut about the head, and his body is bruised, but he is not considered in danger.

WILL ASK MILLIONS.

British, French and German Demands on Cuban Account.

Washington, May 16.—The state department has been informally advised that claims aggregating a considerable amount have been made by British, French and German residents in Cuba during the recent insurrection, and that these ultimately will be presented against the United States government.

The claims themselves have not yet been presented, but are being collected by the several foreign offices as the claimants send them in. In some cases, schedules have been made, and the aggregate stated to the authorities here. The French claims aggregate between \$12,000,000 and \$15,000,000 francs. The German claims are understood to be slightly under those of the French, while the British claims are said to be considerably more than either the French or the German.

NEGRO COLONY.

Black Men from the South to Settle in New York.

New York, May 16.—According to a plan now on foot, Long Island is soon to have an industrial colony made up of negroes from the South. It will be a municipality in itself, conducted according to its own rules, and will start its existence with a population of 1,000, all negroes. No white person will be permitted to live within its limits, but the factories which will furnish the industrial life of the town will be owned by whites.

Lynch law, as practiced in the South, is the determining cause of this colony, the colonists being from the states of Georgia, North Carolina and South Carolina. Should this experiment prove a success, other Northern settlements for Southern negroes may follow. The promoters intend to buy at first a tract of 8,000 acres, and they have an option of 3,000 acres more. The first purchase will be made soon as title has been thoroughly searched.

Professor Brewer is an eminent authority on forestry, and he will especially study the forests of the Northwest coast, and also the botany and the glaciology of that region. The party will be conducted by H. Harriman, of New York, who has chartered a vessel to sail from Seattle in the course of two weeks. The expedition will return in August, 1900.
