FRIDAY, JULY 7 - 1899.

ACTIVE BOHEMIA.

The following is a clipping from the "Oregonian" of July 1st 1899:

Great activity is predicted for the Bohemia mining district in Lane and Douglas counties this coming season. It would hardly be proper to describe to mining men used to operating in other camps on the coast the actual extent or amount of ore in sight in the Bohemia district, for it probably would not be accredited for even one-half the actual showing; but sufficient development work has been done to prove the permanency of the ledges, and what is here said is based upon actual facts, proved by tests, and is not the expression of opinions based upon surface conditions. There can be said of Bohemia what is hard to say of any other camp, and that is that there has not been a single case where development work has been on ledges, either by sinking or drifting, that marked improvement has not been shown with depth.

Five years ago the Musick mine was started. There are now about 4700 feet of tunnels, drifts and development work on this property, which shows valuable ore throughout the mine. On the Musick mine the surface ore averaged from \$5 to \$20 per ton gold, 18 inches wide; and at a depth of 75 feet the vein was four feet wide, and assayed from \$40 to \$200 per ton.

Harlow, Stocks & Brush, who own a group of five claims on the west slope of Fairview mountain, built a five-stamp mill last year. They have developed their property by running a cross-cut 180 feet, cutting an eight-foot vein of free-milling ore. They drifted east about 300 feet, showing ore all the way from two to seven feet wide.

The German Mining Company owns a group of six claims on the southwest slope of Fairview mountain, including the well-known Vesuvius mine, which, a few years ago, promised to become famous on account of a rich strike made on the surface, and which caused some fancy prices to be offered for the ore claim. But litigation soon followed, and until recently this claim has been tied up. The present owners have run a cross cut about 40 feet, cutting the ledge, which shows a wide vein with a three-foot pay streak of fine free-milling ore, averaging from \$8 to \$70 per ton, select samples running into the thousand of dollars. They have drifted west on this ledge about 170 feet, with ore all the way from 30 inches to 4 feet wide. One chute shows an average width of 4 feet of \$300 ore per ton, carrying but a small per cent of base metals. A drift east from a cross-cut 100 feet shows ore the entire distance never less than two feet wide in the face of the drift, being wider at the floor of the tunnel than at the roof.

The Anaconda Gold Mining Company, which owns a group of claims on Fairview mountain expect to begin active development work in the near future. It is expected that at least \$3000 will be expended on the claims within the next few months in running tunnels, drifts, etc. The development work so far done on this property consists of a 70-foot tunnel which has been run on a pay streak averaging from 18 to 30 inches all the way. Assays on ore from this vein have yielded returns varying from \$4.95 to \$450 gold per ton, a 60-pound lot of selected ore going as high as \$5 per pound free gold. A 10-ton lot of the ore gave a return of \$500 free gold from the plates.

The Sweepstake group on Elephant consists of three claims and with the amount of development work done gives every evidence of being the making of another rich mine for Bohemia. One short cross-cut cutting the ledge at a depth of 20 feet shows a vein nine feet wide with a pay streak four feet wide and averaging \$8 per ton gold. A 20-foot shaft in another place shows nine feet between walls with a 3-foot pay streak averaging \$10 per ton gold.

The White Iron mine, a west extension of the Sweepstake, is being prospected by a shaft now down about 35 feet. It shows four feet of free milling ore which gave an average assay of \$37 gold and \$5 silver to the ton.

(Continued next week.)

Cottage Grove had a celebration that was a celebration. Everybody had a good time and everybody was patriotic.

Nailed to the front of F. B. Phillips' hardware store is an advertising picture gotten out by the McCormick reaper and binder company which is a good illustration of the scenes which will occur in all Oregon upon the arrival home of the boys from Manila. The scene is laid in the harvest field. The father has stopped his team and left them standing hitched to the binder, while he rushes 'cross-field with open arms to greet his son who is "coming home" in U. S. uniform with his gun and camp equipments on his back. The little sister, all smiles, trots at his heels, while the house dog playfully jumps in his face, showing his pleasure upon the return of the soldier boy. Many a team will be left standing in the field and many a tear will be shed on occasions not unlike that of the McCormick reaper picture before July 1899 fades away.

Bohemia Fireworks.

The boys up in Bohemia camp nearly 40 miles away sent word down last Friday that they had purchased some fireworks and at 10 o'clock they would do their best to make them visible to Cottage Grovettes. It being too late to get notice to the citizens through the columns of the papers. A number of dodgers were printed at the Nugget office and circulated, acquainting the people with the fact. Accordingly at the appointed time some 250 people went down the track to test the experiment. True to their promise the boys up in the hills let'er go at 9:35. Cottage time. The red fire was plainly visible making a very pretty illumination. The rockets which were fired shortly afterward were also distinctly seen, and answering signals were made here.

Ornamental.—A number of the business houses ornamented their business fronts with young fir trees cut for the occasion and placed in position early in the morning. It made a very refreshing picture, and was especially inviting to the partakers of "I-scream" and lemonade. Bunting and flags were everywhere profusely flapping, and among other interesting displays was that of Dr. Snapp, who had at his office window, a large stuffed eagle with wings a-spread bedecked with Old Glory.

Pushing Along.

Superintendent I. H. Bingham, of the Musick mine, reports to a Nugget man that things are going along in excellent shape at the diggings, he having started the 10-stamp mill while there last week, and in the course of a short time the new company will make music.

Installation of Officers.

The following elective officers were installed last Saturday night in Cottage Grove Lodge No. 63 I. O. O. F. by Ira Wimberly, D. D.; N. G., Ike Thomas; W. G. G. W., Sutton; R. Sec., R. Griffin; Per. Sec., J. W. Gowdy; Treas. C., Stevenson.

Oakland Fire.

On the morning of July 5, two of the business blocks of Oakland were destroyed by fire. The loss is estimated at \$40,000. The cause of the fire is unknown.

Fishing Party.—A fishing party left town Thursday evening for a Friday sport, consisting of Messrs. James Benson; Dr. Petrie, John Aiken and Frank Phillips.

Quite a number of Drain people arrived Tuesday morning in the Grove to celebrate the glorious Fourth.

Joe Cole the pioneer freighter of the Bohemia route was a caller at the Nugget office Wednesday.

Vern Grinnolds came up from Brownsville Sunday on his "bike" and remained a few days to visit old friends.

Mrs. Cogswell and daughter Nellie of Los Angeles, Cal., are in the city visiting Mrs. Cogswell's mother Mrs. E. A. Sears.

Mr. J. G. Buchanan and sister Miss Mary of Corvallis were visiting their sister Mrs. H. H. Veatch the first of the week.

Quite a lively bout took place between Marshal Miller and some men on main street on the fourth. For a while it looked as though there would be a grand mix-up, but the marshal didn't spare much for wind, and landed the fellows in the cooler.

Lurch!

LURCH!

Lurch!

Thanks to the Public for your liberal patronage during the winter season.

We are now giving the

Grandest Bargain Opportunity
In SILKS, SERGE, and BROCADE DRESS SKIRTS

Our Spring Stock will soon be ready and open to your inspection.

Absolutely no misrepresentation of goods

LURCH!

THE RAIN DOPS.

Did you ever consider the effect of the rain drops on Mother Earth and her vegetation? As they descend from the clouds they are charged with the gasses of the air. Thus they carry life's own energy to the soil and all vegetation. Radams' Microbe Killer, a combination of disinfecting gasses and waver, has the same effect upon the human body, that the rain drops have upon the soil and vegetation. Call of send for pamphlet.

A. F. Howard, Ag't,

Cottage Grove, Oregon.

Residence with J. K. Barrett.
