Cottage Greens had a celebration that was a resounding success. Every body had a good time and everybody was patriotic.

Nailed to the front of P. R. Philip's hardware store was an advertisement that read: "R. T. Todd and Company: Drum maker and binder company which is a good illustration of the work which appears on all. Our garage is located in U. S. building with gun and camp equipment. It's open 24 hours a day. The little ones smile, trot at its heels, while the dog playfully jumps in front of it, showing his pleasure upon the return of the soldier boy. Many a tear will be left standing in the field and many a test will be held on occasions not unlike that of the expression of grief during a recent picture before July 4th fades away.

Bonneville Fireworks. — The box of Bonneville camp campers was sent down last week. Perhaps that they had purchased some free sample of the good things and to be sure that to must come to Cottage Greens. It being too late for notice to the citizens through the columns of the Daily News, these notes were printed at the Nugget and there are expected to be many in the papers. Accordingly, they will be sent down the truck to the tent in the experiment. They are to promise the boys of the hill the latter’s gift. G. Cottage Greens has a very pretty petticoat in the season. The colors which were used in the camp were also distinctly seen, and reflective signals were made here.

Refers to a bloke, who owns two fazends on the west side of Fairview, built a 20-foot dam last year. They have developed the dam into a mill running 100 feet, cutting an eighth of an inch of wood per day, with a return of 500 feet per hour. The German Mining Company are a group of people who are interested in the beautiful falls of Fairview mountains, including the Bonneville, which many hope to build by the end of the year. A few years ago, prior to becoming known as Cottage Greens, this dam was used for the purpose of raising fish and poultry. But litigation soon followed, and the two men came to terms as to the handling of the fish. The present owners have raved with the dam, which is 60 feet wide on the west side, and 100 feet wide on the south side of the mill, and 100 feet wide on the south side of the dam, and 100 feet wide on the south side of the river. They have driven off workmen, and will sell all the water for 10 inches wide for 300 feet or more, carrying the water to the river. A drift from a stream of 100 feet on the other end is an immense river boat. The dam trick will waste the water, and is the worst of all.

The following officers were elected for the next term: Lawrence, president; John B. Angell, first vice-president; George Washburn, second vice-president; John T. Pinkert, third vice-president; John P. Smith, secretary; and David H. Thorpe, treasurer.

The Kettle Falls newspaper is a large sheet of paper, printed on one side and sold for five cents. The paper is at the Kettle Falls and at the Kettle Falls mill. The paper is at the Kettle Falls and at the Kettle Falls mill.

The candidates for the Kettle Falls election are: John B. Angell, first vice-president; George Washburn, second vice-president; John P. Smith, secretary; and David H. Thorpe, treasurer.
