BOHEMIA NOTES.

Devoted to Mines and Miners---A Nugget Correspondent's Batch of News.

BOHEMIA, July 16.

Everything booming in camp. More strangers in camp than ever before. D. B. Murray, the superintendent, and Mr. Adkins, general manager of the Noonday mine came in this week. George Kerr of Wildwood is spending a few days in camp. Mr. S. Roy is now engaged building the long tramway for the Noonday Mining Co. Miss Annie Cooper and brother of Portland are visiting their father Mr. F. C. Cooper of our camp and will remain about three months. Mr. E. S. Holderman and J. D. Fletcher took their departure for Cottage Grove today to spend a few days with their families. George Brumfield and George Griffith came in on the stage this mail to spend a few days in camp. Albert Churchill is now employed at the Helena mine where they are building the new mill. A remarkably rich strike has been made in the Musick mine this week which rivals the famous Helena for richness. The strike was made in No. 2 west at a depth of about 120 feet and for coarse heavy gold Klondike can't beat it. The streak is about 8 feet in thickness and shows gold in splotches clear across the vein. This remarkable discovery is only another indication that the mines of Bohemia are here to stay. J. I. Jones of Cottage Grove was in camp this week looking after his mines. Mr. Jones has a crew of men doing a large amount of development. This is a group of fine claims that is well developed on a ledge 50 wide and is sure to be a bonanza before many moons. Luck to you Isaac. E. C. Lockwood & Co., are erecting a commodious mansion on their valuable group of claims just east of the Noonday mine. They intend to do a large amount of development this summer. The Ely Co., are doing a big amount of grading and other development. Preparatory to putting in a mill in the near future. This group is favorably situated with plenty of timber, water and ore of high grade free milling and will in the near future be another bullion producer for Bohemia. Zinaker, Graber & Co., are pushing development on the Vesuvius and are almost ready to commence grinding out the yellow metal in large quantities. The remarkable richness of this mine is a wonder to all who see it they are in on the ledge about 300 feet, the pay shoot is from 4 to 6 feet in width and so far there has never been a fault. W. H. Shane from Mentareka Ridge showed ye correspondent some very fine galena ore from his mines on that side of camp which only proves that pay ore is all over camp and not right around the Musick and Helena as was generally supposed. Mr. Felix Kern from Row River is in camp looking after his mines east of Noonday where a very rich streak of black manganese was recently uncovered, and which shows by panning, a large amount of coarse gold. Mr. Kern is a prosperous farmer of Row River which show people in all walks of life have caught the yellow fever. The Grizzly group is showing better all the time as depth is attained. There is some of the finest copper ore in this mine to be found anywhere and if located anywhere in 500 miles of Butte City or Denver. there would be a smelter of large dimensions in short order. This is excellent chlosinating ore and in sufficient quantities to make Marcus Dailye's eyes turn green. The Wall Street group will begin active operations this week on their claims situated on City creek under the management of Mr. Mann of Portland. There are a large amount of undeveloped claims in Bohemia that show fine croppings of ledges from 8 to 40 feet in width and with proper facilities for the reduction of ores. This camp can be made to Rival Cripple creek for we have everything needed to make a success and as there has never been a failure where a mine has been half way managed we think a smelter would be sure of making a success.

The civil engineering crew who have been running out the lines in camp met with an obstacle in the shape of a man with a gun when they started down the side line of the Helena, who broke up the crew and left the transit stakes, chains and old hats and tripods, and excited men were found scattered over a large scope of country; when they got together again they disbanded and surveying is dull at present.

Ross.
