BOHEMIA, July 16.

Everything booming in camp.

More strangers in camp than ever before.

D. B. Murray, the superintendent, and Mr. Adkins, general manager of the Noonday mine came in this week.

George Kerr of Wildwood is spending a few days in camp.

Mr. F. C. Cooper and Mr. J. Carrier will come up about the 10th of August.

Mr. E. S. Holderman and J. D. Fletcher took their departure for Cottage Grove today to spend a few days with their families.

George Brumfield and George Griffith came in on the stage this

to mail to spend a few days in camp.

Alloy steel is now employed at the Helena mine where they are building the new mill.

A remarkably rich strike has been made in the Mussick mine this week which rivals the famous Helena for richness. The strike was made in No. 2 at a depth of about 170 feet and for coarse heavy gold. Klondike is not likely to be bettered. The rock is quite hard and yellow and gold shows in splashes clear across the vein. This remarkable discovery is only another indication that the mines of Bohemia are here to stay.

J. J. Jones of Cottage Grove was in camp this week looking after his miners. Mr. Jones has a crew of men doing a large amount of de-

velopment. This is a group of fine claims that is well developed on a ledge to wide and is sure to be a bonanza before many months. Look to

you Isaac.

E. C. Lockwood & Co., are erecting a commodious mansion on their valuable and beautiful claims just east of the Noonday mine. They intend to do a large amount of development this summer.

The City Co., are doing a big amount of grading and other develop-

ments, and are getting into a new stage of having a mill put in in the near future. This group is favorably situated with plenty of timber, water and of high grade free milling and will in the near future be another financial producer for Bohemia.

Coecker, Gruber & Co., are pushing development on the Vesuvius and are soon ready to commence grading out the yellow metal in large quantities. The remarkable richness of this mine is a wonder to all who see it and are on the ledge about 300 feet, the pay shoot is from a 16 to 4 feet in width and so far there has never been a fail.

Mr. H. Shagon from Montana took his gold to Montana City almost some very fine galena ore from his mines on that side of camp which only

points that pay are in all over camp and not tight around the Munich and Helena as was generally supposed.

Mr. Felix Kern from Row River is in camp looking after his mines. They are on the finest copper claims to be found any

where and if located anywhere in 500 miles of Butte City or Denver, there would be a matter of large dimensions in short order. This is an excellent commodious ore and in sufficient quantities to make Marcus Daly's eyes turn green.

The Wall Street group will begin active operations this week on their claims situated on City creek under the management of Mr. Mans of Portland. These are a large amount of undeveloped claims in Bo-

hemia that show fine cropping of ledges from 8 to 50 feet in width and are with good facilities for the reduction of ores. This camp can be made to rival Cripple creek for we have everything needed to make a success and if fortune has not been in favor of the miners beam half way managed we think a smelter would be sure of making a suc-

cing.

The civil engineering crew who have been running out the lines in
camp met with an obstacle in the shape of a man with a gun when they

were a few miles over the side line of the Helena, who broke up the crew and

10 to the tram tracks, chains and old hats and tripods, and excited men on the top of the world. A miner who was on a mission was not a mile away and got together again they disband and surveying is all at present.

Rifles.

STEVE S RIFLES AND PISTOLS

RIFLES FOR MEN WHO NEVER CELEBRATED FOR THEIR EXCESSIVE AMMUNITION

Margaretta, the long-legged lady, has been shot to death.

This means that there must be some other way of protecting the rights of the miner and the miner's family.

We make a full line of rifles; Prices from $8.00 and up.

Our guns are made to take a shot and make a man.

SAFE, SOLID AND ACCURATE.
