The Calapooya Bohemian Gold Mining & Milling Company owns a group of five claims on horseback, which have been undergoing development work for over a year. Some large bodies of gold have been developed from $20 to $100 per ton. The company has been incorporated recently. This group includes two parallel lodes, and another claim or lode, making a total of three claims, each including three claims or lodes. The company owns the entire property on the surface for the full length of the claims, and across any parallel or cross lodes. If your property is 40 feet in width, you have an average of $8 gold per ton. Other assays were determined at $3.50 for 40 feet or more. The company has an office in the courthouse.
