BOHEMIA NOTES.

Devoted to Mines and Miners—A Nugget Correspondent's Batch of News.

BOHEMIA, July 28, 1899.

Strangers to numerous to mention in camp.

More business in Bohemia than in any camp in Oregon.

B. E. Hawley of the Calapooia Co., came in last week loaded for bear, with four four-horse loads of supplies. This looks like there is going to be something done in that end of camp.

J. E. Young our genial city attorney is in camp doing a large amount of development work on his claims just to the southeast of the Noonday. We are informed the workmen have struck a fine ledge 3 feet in width that shows gold and pans gold. This is another proof of the permanence of our camp. Everything that there is any work done on always shows that there is gold here to induce capital to invest here in the near future.

Albert Leroy is pushing development work on the Laura group situated on Champion creek. Here is a fine group but little spoken of, that if situated in Colorado would soon be gobbled up by men of money. There is ore enough on the surface of these 5 claims to keep a 20 stamp mill pounding for 12 months without going under ground and timber and water in abundance for all purposes. There is a great future for this group. We wish you success Albert.

The Oroplata, Baltimore, Gold Finch, Orphan Boy, Mountain Lion and Cottage Grove, owned by Jenks and partner have as far as development has been pushed showed up a very high grade of free milling ore in large bodies. This enterprising firm consists of practical mining men and they know a good mine when they see it. It is their intention to open up their mines and build a mill. This is the proper way to advertise a mine and success will surely crown their efforts.

The Arosta property of 6 claims is also owned by Mr. Jenks who is preparing to put in a mill there this fall. This group is already extensively developed and shows up fine in most places from 4 to 20 feet in width. This property is in the best location in Bohemia being below snow line and in a fine body of timber with ample water power for a large mill and if properly managed will surely be a veritable bonanza. We hope to see a mill soon.

There are many other claims in Bohemia of lesser note that are hardly known that will be extensively developed in the near future and all have good surface indications and if there was some way of working the ore from their large scope of country there would be a great difference. So far the prospectors are mostly men of small means and not able to put in reduction plants. But our day is coming as surely as the Fourth of July.

Zinaker & Graber Co., are grinding out gold from the Vesuvius. Now on the Stocks, Harlow mill under the management of Wilson Veatch who is a fine mill man, and Mr. Graber informed ye correspondent that the mill was doing good work. They own 5 claims situated on the west slope of Fairview mountain and if this mill test proves satisfactory they will put in a mill of their own. They have in all about 700 feet of work done.

The Musick, Noonday, Helena and Champion are to well known the country over to need a write up, their records are established and as deeper work is attained in any and all of these mines the ore gets better grade and more in place and larger bodies which is evidence enough of the permanence and staying qualities of the mines of Bohemia. Our intention is to bring some of the outside groups to the notice of the public. If our state legislature would get their wise heads together and formulate some laws of importance to the mining interests they could do more for the state than to build bicycle paths. This state needs a mining inspector and needs it bad and a law compelling superintendents to take out a license also foremen and timbermen and there would be more work and better work than under the present devil-may-care system of mining.
