The Broadway Mining Company, Griffith & Reed propostors are pushing the development work on the Broadway tunnel to the east, and the company is making rapid progress. They will soon reach the Billy Phe- nix which is on the east end of the Broadway claim. When this is topped, the company will be on the verge of a new financial proposition, with a venture of some seven thousand dollars, although the same is worked to the limit by the Charles Channing Company. It shows a large body of very rich free milling ore. Other lodea on this property range from five to twenty four feet in thickness, with some remarkable workings. The value of this property is being realized by the company, as they are in the process of putting it into the hands of the Miners. The operation is expected to bring a large profit to the company.

A new gold mine has been opened up near the town of Eugene, and the company expects to make a very large discovery. The property is worked by the Oregon Mining Company, and the prospects are very promising. The company has been working hard to develop the property, and it is expected that the mine will be in full operation within the next few weeks. The ore is of high grade, and the company is confident that they will make a very large discovery.

The Oregon Mining Company is also working on the property of the Sprague Brothers near the town of Eugene. The company is making rapid progress, and it is expected that they will soon be in full operation. The ore is of high grade, and the company is confident that they will make a very large discovery.
