SHOP NEAR S. F. DEPOT

NOTICE.

We want wood on subscription. That means we want it now, not after the rainy season sets in. Bring it in, Bentonia Street.

A year subscription to the American lumberman, gives without exchange subscription, at $5.00, to Bo- 
miea Nugget.

KANSAS IS PROSPEROUS.

The people of Kansas have no reason to complain of conditions. The cotton crop of the state is phenomenal. The general problem is how to store and ship the crop when it is harvested, for the volume of the crop is far beyond the capacity and transportation facilities of the state.

This is but one element of the state’s prosperity. Everybody is making money. The farmers have it, the merchants have it, the veteran says: “I have been in the state thirty years, and I have never seen the farmers to be in the condition they are in now.” Herron, when I have contracted for the cotton or for the wool the farmer has wanted money as early as possible. His purpose was getting the crop delivered or the stock paid for. This year, as I make contracts, I get checks. I notice that is most common the farmer waits until he is going to town for some

Central Oregon State Normal School, Drain, Oregon.

Will open its doors for the new school year on September 15, 1899. The buildings have been thoroughly renovated and the grounds, new apparatus added, and the school is now in splendid order for the reception of students. We have a splendid and experienced faculty. In connection with Normal, we also take in preparatory work and give a solid preparation for the teaching profession. There are also a number of non-resident students, who work here the winter months, and take classes at their homes during the summer months. The school is well stocked with books, and has a very large library. The room is large, commodious, and well lighted, and is adapted for the purposes of study. The school is well managed, and the teachers are well qualified, being men of ability and experience.

BOHEMIA NOTES.

Devoted to Mines and Miners—A Nugget Correspondent’s Batch of News.

At present there are three smelting works operating in the Bohemia, the Stock & Harlow, five stamps, the Moon, seven stamps, the Noddy down.

The Noddy Mining Company started up their 20 stamp mill last week. They have many thousands tons of ore in the mill and it is the intention of the company to keep the mill in full capacity.

All churches have returned to the Helens after a few days lay-off at Cottage Grove.

Development work is still going on at the Broadway, Mr. F. J.
Harding mining expert from Colorado, was looking over the Broadway property; but he, in so far as he is concerned with the purchase of the same, he is reported as very favorably impressed with it, and he is on record as saying that Bohemia is in every respect a Cripple Creek.

Superintendent I. H. Bingham after a few days visit to Portland arrived at the Moon last Sunday.

The recent rules have had a tendency to check travel in and out of the mining district, but there is in conclusion the fact that a few days movement will live the mountain roads with travelers again.

The freighters are to be commended for the very wise position they took in pulling off freight teams as much as possible during the recent road. This leaves the roads smooth and with a few days sunshine, the road will be found to be almost as good shape as before the "winter." Had travel continued, it would have required considerable work and not a little time to smooth them up again.

Hirt isbright.

S. N. Adams of New York who has been looking after mining claims in the Helens has, in his stated location 7 claims near the Ridge hotel, and the assayers run from $28 to $38.

Considerable excitement exists at the Ridge hotel owing to the rich discoveries recently. Among the many glowing prospects is that of the Helens, which is a half mile north of the Ridge hotel, the area is free mingling and is chuck full of the yellow stuff. It is said that it assay 3000 to 4000 dollars per week, or more if gold is on the assay and the last report says they were 658 feet into the ridge and not near through yet. According to the cropping the ridge is about 10 feet wide.

Visitors galore are in the camp each week, demonstrating the general interest taken in the mines throughout the several mining sections.

Chester F. Lee, mining expert, who has been in the diggings for several weeks, left Tuesday for your city, having finished his labore here for the present.

IT IS HERE!
