Explosion of a ship near Nome, Alaska, on September 27, 1900, resulted in the death of several people and the destruction of a large amount of property. The ship, the S.S. Peninsula, was en route from Seattle to Nome with a cargo of explosives, including dynamite and gunpowder. The explosion was so violent that it was heard for miles around.

The cause of the explosion is still unknown, but it is believed that it was caused by a spark from a steam-driven pump. The ship was carrying a large amount of explosives on board, and it is possible that the explosion was caused by a reaction of the chemicals on board.

The ship itself was a large and well-constructed vessel, and it is believed that it was not carrying any other type of explosives, except for the dynamite and gunpowder. The explosion caused a large amount of damage to the surrounding area, and it is believed that several people were killed in the explosion.

The area around the ship was searched thoroughly, and it is believed that the explosion was caused by a spark from the pump. The pump was being used to pump water from the sea into the ship, and it is believed that the explosion was caused by a reaction of the chemicals on board.

The ship was carrying a large amount of explosives, and it is believed that the explosion was caused by a reaction of the chemicals on board. The ship was carrying a large amount of explosives, and it is believed that the explosion was caused by a reaction of the chemicals on board.
