## BOHEMIA NOTES.

### A General Write-up of the Camp---Continued From Week to Week.

Then comes the Traveler owned by Nunn, Morgan & Reed which while doing assessment on one of the claims an open cut was run from one wall to the other showing the ledge to be just 15 feet wide. A sample taken from across the entire ledge showed a chemical test value of gold \$4.82, silver 116 oz., copper 7 1/2 percent, platina 32 per cent. This is destined to be one of the best paying properties in the great Bohemia district.

Just below the Traveler is another valuable group of 3 claims and owned by Snapp, Jones & Snapp, now undergoing some extensive development and are disclosing some flattering results. Ore in this mine runs high in lead and copper with a good value of gold per ton. These gentlemen have a good thing and they know it, and they are just the kind of men to make a camp take on a business like appearance. They have a change of formation found no where else in camp, it being a deep blue gneiss. Their ledges of which they have 3 parallel are strong and well developed with good gauge and free from both walls.

Continuing down Horse Heaven Creek one comes in contact with a fine group owned by Pierson & Ely which is a well developed property consisting of 5 claims lying in what is known to Bohemians as Pouch gulch. This property has so far as development is concerned showed far better than the owners anticipated, it being in a serpentine dyke of chert. Lying at the foot of this dyke is yellow porphyry in a state of oxidization, and assays so far obtained, show this to be very rich in free gold besides silver and copper. The company has grades completed for a mile and are at present working on a trail from the Noonday mill a distance of 1 1/4 miles. Just as soon as completed a mill will be put in. Water and timber are in abundance and being below the deep snow line operations can be carried on throughout the entire year.

On below this valuable camp there are a number of other claims of minor importance with various amounts of development all of a substantial nature and proving beyond a doubt the stability of this end of the camp.

The Ridge Hotel country lies about 4 miles to the northwest of the Noonday mine and is rapidly coming to the front as a mining community. A number of fine locations have been made this summer some of which are gaining the notice of the public from recent development by almost what might be termed tenderfoot prospectors. There is enough ore in sight to justify the erection of a mill which is rapidly nearing completion. This group consists of 4 full sized claims owned by Frank P. Slavin, Phil Spong and others. The ore is identical with the other well developed mines of this camp which shows the camp to be almost without limit, with large well defined leads free from both walls and of a free milling character.

There are many other locations of minor importance but not sufficiently developed so far as to show just how far down on the north this continues, but from all appearances it continues to Blue River and on to the Santiam.

Situated on Grizzly mountain are a number of good mines owned by prospectors in every walk of life from banker to farmer. Many of this great mountain's claims are developed more or less by tunnels, shafts and cross cuts showing ore continuously. Not only one lead but the entire mountain is a series of quartz leads all of which are heavily mineralized and show as good a grade of smelting ore as can be found anywhere on the Pacific Slope. On this mountain are situated the Montana Mine & Milling Company's fine group described elsewhere in this work.

There are a number of other locations on this famous mountain but space won't admit of a general description. Situated in the canyon between Grizzly and Fairview mountains is the famous Grizzly group recently sold to London capitalists, but formerly owned by Byrne Bros., Johnston & Klopheinstein one of the finest in the west. The ledge so far shows a strong continuous lead 6 feet from wall to wall of almost solid galena. This company has ample water power for any reduction works needed, there being a natural fall of over 60 feet with timber for sawmill purposes till the end of time. The Laura owned by Leroy Bros is also just across the canyon from the Grizzly. This lead is strong and continuous throughout the entire length of their claims.
