BOHEMIA NOTES.

More men are working in the Bohemia and Blue river districts this year than ever before in the history of the camps. This is good evidence that the mining camps of Lane county are growing better and demanding more attention as they grow older. A good recommendation for the camps.

Heretofore, as winter set in, the miners commenced to flock in from Bohemia mines "for the winter." This winter nearly every available man is at work, and those who come out, do so to transact business and return to their "winter's work." The day is past and gone when work in Bohemia will stop for such a trifling thing as winter.

More development work has been done in Bohemia this year than ever before in the history of the camp, and the work planned for next year, aggregates more than has been done in previous years all put together.

It has been rumored that some marked improvements in the matter of roads leading into Bohemia will be made the coming season. This will be a necessity in view of the greatly increased traffic.

Every mine in Bohemia district, that has been properly managed has proved to be a dividend payer.

Next year Cottage Grove and Bohemia will undoubtedly be connected by telephone.

The Vesuvius and Stocks & Harlow properties now controlled by English capitalists under the management of C. H. Park, is destined to increase the reputation of the camp.

The Musick Mining and Milling Company have made a successful run this year and the end is not yet. In fact there is no let up on this property. The mill is still running and development work is being pushed.

Considering everything this fall has been an admirable one to get supplies into the mines and the opportunity has not been overlooked. Hundreds of tons have already been placed and the end is not yet.

An article in a recent issue of the Guard regarding the extreme richness of Mr. White's mine in the Blue River district, stated he was working the mine with a little hand mill manufactured by himself. The mill was made by Messrs. Ponnay Bros. & Davis, of Portland, who hold a patent on the same. These gentlemen write to the Guard under date of Nov. 24, stating that they have done satisfactory work with the mill for Chauncey Dale, Peter Kenniston and Louis Finn of the same district, and characterize their invention the "poor man's mill." Such a machine would certainly be an advantage to the prospector or mine owner of limited means.—Guard.

The Fashion Stables have established a way station at Glenwood on the road to Bohemia and have built a good stable and house for the accommodation of their teams and mail carriers.
