Babies

Hush! Don't you hear your baby cry? Babies often grow peevish, fretful, restless and sad, poor little things, without being able to tell you why. How much the little innocents suffer, unable to tell the cause of their distress! But you can help to relieve their trouble in their little infants, indigestion, wind-colic, belly colics, diarrhea, colic, bile complaints, that start the ills of childhood. CASARETS make mother's milk mildly purgative, and increase the flow of milk in nursing mothers. Mammy takes a Cascaret, baby gets the benefit.

In this way, Cascarets afford the only safe laxative for babies in arms.

VIN MARIANI
