GREETING:

1900 will soon be here. Practice writing 1900

While you are practicing it, think about our Store, where you are able to do your buying and start a bank account upon what you save. Those who pay cash for what they buy can, without any doubt, save money by buying of us.

We still have some nice Christmas Presents!

We still have some nice Christmas presents—although the gift is small you should remember your mother, father, sister, brother, wife, husband, sons and daughters, uncles, aunts, nieces, nephews, and mother-in-laws, we still have the goods that are suitable.

GARMAN & NEWLAND, Cottage Grove Oregon.

My son has been troubled for years with chronic diarrhoea. Sometime ago I persuaded him to take some of Chamberlain's Colic, Cholera and Diarrhoea Remedy. After using two bottles of the 25-cent size he was cured. I give this testimonial, hoping some one similarly afflicted may read it and be benefited.

ADVANCE IN MINING METHODS.

The mining industry of the country is going forward with amazing strides. Not only are new discoveries being made and new mines developed, but the advance in mining methods within the past twenty years has been little less than marvelous. At that period, in most of the silver camps in Colorado, ore that ran less than \$30 a ton was thrown on the dump and would not bear the expense of transportation and treatment. Now, with the advance in mining methods, ore that runs \$4 a ton is milled at the mine and treated. This reduction in cost has been a fair price for the advance in mining methods.

Spanish mine, in Nevada county in the month of November, 1898, a total of 4047 tons of ore was mined and milled in thirty working days. Including every detail of expense, the mining cost 31.4 cents per ton, and the milling 20.8 cents per ton. The value of the ore was 65 cents per ton, the net profit being 13 cents per ton, or a profit of 25 cents on the cost of operation. This so nearly approaches a realization of the hope of the alchemist, on a slightly different basis, as to inspire something of respect for his dreams. The ingenuity of man as illustrated in methods for the extraction of every particle of the precious metals from the coarser material that imprison them, keeps his eagerness to discover new deposits.
