SUCCESSFUL EXPERIMENTS ARE MADE IN THE SOUTH.

Some years ago a few farmers near the Southern States looked forward to what each season would bring, but always to keep, and opened to discuss the problems of growing tea. The reason was that there was no such thing as growing tea in the southern colonies. They were not denying it, so as to force a way into the cultivation of tea. Nevertheless, it is not being done, and the cultivation of tea has been successfully introduced into the Southern States, and is now extensively cultivated.

In less than fifteen years tea has been grown successfully in this part of the world. The growth was so successful that it is now estimated that more than a million pounds of tea are being grown annually. This is a remarkable accomplishment.

A further step towards the successful cultivation of tea in the United States is the establishment of a new tea company in New York. The company has been formed for the purpose of importing and marketing tea. It is believed that this company will be successful, and that the cultivation of tea will continue to increase in the Southern States.

The soil and climate of the Southern States are very favorable for the cultivation of tea. The climate is warm and humid, and the soil is fertile and well-drained. In addition, the Southern States have a long growing season, which is very beneficial to the cultivation of tea.

The cultivation of tea can be profitable, and there is a great demand for it in the Southern States. The price of tea has been rising, and it is expected that it will continue to do so. The cultivation of tea is likely to become a very important industry in the Southern States, and it is expected that it will continue to develop and expand in the future.

ROSE TUBA GARDEN WITH ASIAN-ASSYRIAN TASTE

In a garden in Japan, a small rose tuba garden with an Asian-Assyrian taste is being developed. The roses are of the species Rosa damascena, which is native to the Middle East. The garden is designed in a traditional Japanese style, with a small pond and a stone bridge.

The garden is surrounded by a low wall, and the roses are planted in a bed in the center of the garden. The roses are pruned and shaped to create a pleasing and symmetrical design. The garden is a tranquil and peaceful place, and it is a perfect place to enjoy the beauty of the roses.

In summary, the cultivation of tea is a promising industry in the Southern States, and it is expected to continue to develop and expand in the future. The cultivation of roses is also a profitable industry, and it is a perfect place to enjoy the beauty of these lovely flowers.
