MINES & MINING.

Devoted to Bohemia Notes and Mining Items of General Interest to Mining Men.

Of this great mineral belt which heretofore has been worked with varying successes by process of amalgamation, mostly by men who learned mining on the sheep ranges of some insolated part of our great domain and failures and black eyes to the community are in evidence on every hand. But when men of mining ability have hold of the helm success crown their every effort. What a pity our state legislature when in session don't devote a part of their 40 days time to creating a board of mining inspectors and pay them from state funds, but appoint competent men and make it their duty by law to examine all men aspiring to be superintendents to pass a rigid examination as to their ability and if found capable, license them \$50 per annum; also head foreman and timberman the same only not so high. This will not only put a more competent lot of men to managing mines but will give them better salaries and also stop speculative ideas about our mines not producing like other states. There are to our knowledge men in this state drawing pat salaries from companies who are willing to put up any amount of money for good management. But there is no one to condemn such bills and the consequences are always the same, a failure and a black eye to that camp. There are men who are in positions of envy to many competent men who will spend \$50 of company's money running to and from their respective places and not know one rock from another and then try to beat some poor man out of a days work and then look wise and study how they can economize by not paying anything and in the end their company gets tired putting up and shut down. There is to our knowledge three or four good paying properties in Bohemia that are shut down almost continually just from such causes.
