SUMMER RESORTS.
"To the mountains our people in increasing numbers yearly look for those days of relaxation and recreation necessary to maintain the human machine in its working condition. The languorous fath of the seashore proves very seductive while it lasts, but many have decided that the annual outing should provide not only radical change of air and surroundings, but also such stimulation of flagging energies as will provide brawn and vigor for the return to labor. For this they urge the mountain climb and ramble, the balsam of the mountain pines, and the clear, unadulterated mountain air."
"In this direction the Shasta Route now affords a wealth of attractions. The entire line of road from Ashland to Redding is studded with charming and accessible hotels and camps, where are cheer and comfort and healing at reasonable cost, and where you can hunt, fish, ride, loaf, or play with equal facility."
"Or if you look for healing waters, none better can be found, hot or cold, than the springs of Ashland, Colston, Anderson, Bartlett, Byron and Paso Robles."
"Before visiting Europe, the people of the Northwest should see the glories of Yosemite Valley, and the wondrous gorges of Mariposa and Calaveras; the Parisians are likely to make inquiries concerning these attractive resorts."
Send to Mr. C. H. Markham, General Passenger Agent, Portland, for new booklets on Castle Crags, Shasta Springs, McCloud River, Yosemite, and excursion rates thereto."

FOR RENT.
A good seven room dwelling house for rent. Inquire of Mrs. L. M. Thompson, Cottage Grove, Ore.

W. W. WETHERS,
Sheriff and Tax Collector of Lane County, Oregon.

Griffin & Veatch Co. carry a full line of Canton Clipper and John Deere Plows. None better.

DIVIDE ITEMS.

Harvesting has begun, but the grain is rather poor.
Several hunters here went out after a bear Sunday, but failed to get him.
Miss Annie Underwood and Mrs. Huntly are visiting with Mr. and Mrs. Hastings.
Walter Canady cut his leg on the mower the other day, but fortunately it was not a bad cut.
The roof of Jack Robinson's house caught fire last week, but the fire was extinguished before much damage was done.

FOR THE SEASHORE.

"Newport and Yaquina Bay continue to offer for the summer vacation greater variety of attractions than can be found at any other North Pacific resort. Excellent beaches and safe bathing, enticing rides and rambles, good boating and fishing, clams, crabs and oysters for gathering, and unequalled profusion for pebbles and shells and agates. Add to this cheerful and obliging hosts, who are providing at very reasonable rates homelike quarters, and most liberal fares. They won't let one go hungry at Newport.
See Southern Pacific Agent for tickets and time tables, or correspond with C. H. Markham, General Passenger Agent, Portland, Oregon."

A creamery is a mortgage-lifter. This section of Oregon hasn't many mortgages to lift, but it needs the profits to be derived from a first-class creamery.

Mines and Mining

Devoted to Bohemia Notes and Items of general interest to Mining Men.

Since the strike last week in the Bohemia mine, known as the Knots property, the steady development work with every foot of depth attained shows the ore to be richer and richer. The shaft is now down to 37 feet, and from the point of the strike the whole shaft is a solid mass of ore. It is not known where the walls are and they will not be found until the shaft is down 50 feet, when cross cuts will be run to ascertain the width of the ledge.

The poorest specimen of ore that could be selected from the bottom of the shaft has been assayed and goes \$2.35, while other pieces taken from the corners of the shaft go \$3.19. The ore in the center of the shaft is so full of gold, visible to the naked eye, that it was not thought worth while to make assays of it, as it can't help but run away up into the many thousands.

Since the strike Mr. Ladd, who is in charge of the mine, has gone down the hill about 300 feet from the new shaft and finds by measurement that the ledge at that point is 16 feet in width. It has been sunk at various distances for the whole length of the claim and the ledge shows itself in every instance. The most remarkable thing in connection with this great find is that the new shaft was sunk on a spot that was absolutely barren of any surface indications, and the brush and undergrowth had to be cut away before the ground could be broken. Mrs. Finnican, it seems, is a well known clairvoyant, and says that her spirit control guided her to that spot and specified that the ore would be found at a depth of 26 feet, and so it was. Whatever may have been the way through which the big strike was brought about, it has uncovered the largest and richest body of ore in the whole Bohemia district, and will instill new life and energy in the development of the many splendid prospects in old Bohemia district.

From a gentleman just down from Bohemia we learn that the survey of the Golden Slipper mine has been completed and a contract let for 60 feet of tunnel. Work is being pushed on the 99-foot tunnel, which has a five-foot vein that runs upward of \$45 in copper, gold and silver. The property was expected to be visited this week by Colorado and Portland parties.

The location work on two promising prospects owned by A. J. Peck has just been finished and the showing is very good. His claims are on Grouse Mountain, just north of the Johnson Meadows trail.

The Helena people have a large force of men at work hauling out to sea for their new buildings, of which several are to be built, so as to have everything in connection with their mine well housed next winter.

The production of gold and silver of the state of Washington for the year 1899 was: Gold, 36,284 fine ounces, which had a value of \$750,000. Silver, 300,000 troy ounces, of the commercial value of \$178,740.

The biggest mining scheme in the Northwest is the King Solomon Mining Company, with a capital of \$30,000,000, headed by James B. Townsend of Lima, Ohio. This company has secured hundreds of claims along Lake Kootenai, British Columbia.

The oldest mining company in the world is represented in the Swedish department of the Paris exposition. This company began to produce copper in the year 1225, and it has records of its production for nearly three centuries.

All professionals were once amateurs, and all good mines were once only prospects.

The Darrington Mining and Reduction Company of Seattle has been incorporated with a capital of \$1,000,000.

An important land case has just been decided by the Secretary of the Interior, E. A. Hitchcock, in reference to a homestead claim of James F. Mahan on Yreka Flats, near the western boundary line of Yreka townsite, California. Mahan made application for a homestead patent, which was contested by John B. Dowling, Clyde Fairchild and Howland & Brown, who held mining ground. The local land office decided in favor of Mahan's right, which was approved by the land commissioner. An appeal was then taken to the Secretary of the Interior, who modified the decision, giving to each party the land claimed by them, from the fact that the surveyor's return in 1886 shows that the land was mineral in character and not subject to entry as agricultural land.—Ex.

The average value per ton of Australian ore treated is \$14; \$3 ore is treated at a profit in this country.

AN EPIDEMIC OF DIARRHOEA

Mr. A. Sanders, writing from Coconut Grove, Fla., says there has been quite an epidemic of diarrhoea there. He had a severe attack and was cured by four doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy. He says he also recommended it to others and they say it is the best medicine they ever used. For sale by BENSON DRUG CO., Cottage Grove, LYONS & APPLGATE, Drain-Druggists.
