LORANE ITEMS.

John Farman is home after two year's absence in Idaho and Washington.

Rolla Doty is home from California. He reports crop short down there.

Dr. Petrie and wife of the Grove are visiting at the old "homestead" for a few weeks.

John Settle and family have gone to Eugene for a couple of week's visit with relatives.

H M Doty went to Eugene Tuesday. His sister returned with him Wednesday.

Threshing will begin in this neighborhood Thursday August 2.

Mr Fawc is up from Salem for a few day's visit with his family.

There was a jolly crowd of youngsters gathered at the residence of Mr and Mrs Devaney. The evening was spent in singing. They will meet with Mrs I P Luman next Sunday evening.

GOOD WORK.

District Deputy A. M. Young of the Modern Woodmen of America, who has been working here in the interest of the local lodge, the past two weeks, left Wednesday morning for his home at Sejo for a few day's visit, when he will return here and complete his work so successfully begun. Deputy Young has already increased the membership of the Modern Woodmen Camp here 40 members, and says he will have no trouble running it up to 50. An important feature in the matter of a sick and accident benefit plan has just been adopted by the order which makes it all the more attractive. Deputy Young will organize a camp at Locane in the near future.

George Clark, one of the old-time miners of this coast, and one of the pioneers in many of the mining camps of Nevada when its bonanzas were heralded the world over, was in town this week after a visit to Bohemia, and was favorably impressed with what he saw there that he has outfitted himself for a more extended examination, and left for that district on Wednesday.

A MOTHER TELLS HOW SHE SAVED HER LITTLE DAUGHTER'S LIFE

I am the mother of eight children and have had a great deal of experience with medicines. Last summer my little daughter had the dysentery in its worst form. We thought she would die. I tried everything I could think of, but nothing seemed to do her any good. I saw an advertisement in our paper that Chamberlain's Colic, Cholera and Diarrhoea Remedy was highly recommended and sent and got a bottle at once. It proved to be one of the very best medicines we ever had in the house. It saved my little daughter's life. I am anxious for every mother to know what an excellent medicine it is. Had I known it at first it would have saved me a great deal of anxiety and my little daughter much suffering.—Yours, truly,

Mrs. Geo. F. BURDICK, Liberty, R. I. For sale by BENSON DRUG Co., Cottage Grove, Lyons & APPLIGATE, Drain Druggists.

Griffin & Veatch Co. carry a full line of Canton Clipper and John Deere Plows. None better.

STORY OF A SLAVE.

To be bound hand and foot for years by the chains of disease is the worst form of slavery, George D. Williams, of Manchester, Mich., says: "My wife has been so helpless for five years that she could not turn over in bed alone. After using two bottles of Electric Bitters she is wonderfully improved and able to do her own work." This supreme remedy for female diseases quickly cures nervousness, sleeplessness, melancholy, headache, backache, fainting and dizzy spells. It is a godsend to weak, sickly, run-down people. Cure guaranteed. Only 50c. Sold by BENSON DRUG Co., druggist.

## MINES AND MINING.

The Seventh of a Series of Articles on the Geological Construction and Formation of Mineral Zones.  
[CONTRIBUTED.]

The Cretaceous system closes the long succession of Secondary or Mesozoic formation. The rocks which come next in order are classed as Tertiary or Cainozoic. When these names were originally chosen geologists in general believed not only that the divisions into which they grouped the stratified rocks of the earth's crust corresponded, on the whole, with well defined periods of time, but that the abrupt transitions so often traceable between systems of rocks served to mark geological revolutions in which old forms of life as well as old geographical conditions disappeared and gave place to new.

One of the most notable of such breaks in the record was supposed to separate the Cretaceous system from all the younger rocks. The importance of this part of the geological chronicle may be inferred from the following facts:

During Tertiary time the seabeds were ridged up into land to such an extent as to give the continents nearly their existing area and contour, the crust of the earth was upturned into great mountain ranges and notably into that long band of lofty ground stretching from Alaska to Cape Horn, now the Pacific Coast of North and South America. Portions of the Tertiary seabeds now form mountain peaks 15,000 feet or more above the sea.

The generally warm climate of the globe now slowly passed into the modern phase of graduated temperatures from great heat at the equator to extreme cold around the poles. At the beginning of the Tertiary periods the climate was mild, even within the Arctic Circle, but at their close it became so cold that snow and ice spread far southward over Europe and North America.

The plants and animals of the Tertiary time are strikingly modern in their general aspect. The vegetation consists for the most part of genera that are still familiar in the meadows, woodlands and forests of the present day. The assemblage of animals too, become increasingly like that of our own time.

If the Secondary periods could appropriately be grouped together under the name of the "Age of Reptiles," Tertiary time may not less fitly be called the "Age of Mammals." As the manifold reptilian types died out the mammals, in ever increasing complexity of organization took their place in the animal world.

There are three divisions to the Tertiary period; the first is called Eocene or recent; the next Miocene or more recent; the next Pliocene or most recent.

In North America the rocks classed as Eocene present two contrasted types, down the eastern and western borders of the continent from the coast of New Jersey to the Gulf of Mexico on the one side and along the coast ranges of California and Oregon on the other. They are marine deposits, though occasionally presenting layers of lignite with terrestrial plants, over the vast plateau which supports the Rocky Mountains. However, they are of lacustrine origin, and show that it was in the heart of the continent the bed of the Cretaceous sea was upraised into a succession of vast lakes, round which grew a luxuriant vegetation. In these lakes a total mass of Eocene strata estimated at not less than 12,000 was deposited, entombing and preserving an extraordinarily abundant and varied record of the plant and animal life of the time.

Masses of Nommulitic limestone and sandstone several thousand feet thick have been upraised, folded and fractured, and now form important parts of the great mountain chains which run through Europe and the north of Africa. Similar rocks have been uplifted along the flanks of the great chain of heights that sweep through the heart of Asia, reaching to the Himalaya range a height of 16,500 feet above the sea level. We thus learn not only that a large part of the existing continents lay under the sea during Eocene time, but that the principal mountain chain of the old world have been upheaved to their present altitudes since the beginning of the Tertiary period. The great Eocene lake basins of North America survived till a much later part of Tertiary time.

THAT THROBBING HEAD-ACHE.

Would quickly leave you, if you used Dr. King's New Life Pills. Thousands of sufferers have proved their matchless merit for Sick and Nervous Headaches. They make pure blood and build up your health. Only 25 cents. Money back if not cured. Sold by BENSON DRUG Co., Druggist.

IT HELPED WIN BATTLES.

Twenty-nine officers and me wrote from the Front to say that for Scratches, Bruises, Cut Wounds, Sore Feet and Stiff Joints, Bucklen's Arnica Salve is the best in the world. Same for Burn Skin Eruptions and Piles. 25c. box. Cure guaranteed. Sold by BENSON DRUG Co., Druggist.
