among the best known of the many dangerous wild plants and shrubs. Touch or handle them and they produce swelling and inflammation with intense itching and burning of the skin. The eruption disappears, the sufferer hopes forever; but just as soon as the little blisters and vesicles appear the poison had reached the blood, and will break out at regular intervals and each time in a more aggravated form. This poison will linger in the system for years, and every atom of it must be forced out of the blood before you expect a perfect, permanent cure.

Mr. R. M. Marshall, bookkeeper of the Atlanta Gas Light Co., was poisoned with Poison Oak. He took Sulphur, Arsenic and various other drugs and applied externally numerous salves and ointments. After the swelling and inflammation were so severe he was blind. For eight years the poison would not go out every season. His condition was much improved after taking one bottle of S. S. S. and two bottles cleared his blood of the poison, and the evidences of the disease disappeared.

People are often poisoned without knowing when or how. Explain your case fully to our physicians, and they will willingly give such information and advice as you require, without charge, and will send at the same time an interesting book on Blood and Skin Diseases.
