

# Women who have the Blues

Responsiveness in women a mental condition readily traceable to some distinctly female ill. All women don't have blues, but comparatively few people understand that the right medicine will drive them away.

Dr. E. Pinkham's Vegetable Compound promotes the blues, because it is the safeguard woman's health.

It regulates the entire female organism as nothing else does. When dragging sensation of the backache go, the blues will go also.

Read the letters from women appearing in this paper—women who have had it and know. There is a million such women.

## FINANCE FOR INVESTORS.

Report Upon the Property of the Chiapas Plantation and Investment Co.

The report of the committee of business men sent to Mexico to investigate the property of the Chiapas Rubber Plantation and Investment Company has been made public. The document is an interesting one and gives reliable data concerning the enterprise owned by the company named.

The property of the company consists of a plantation of 24,000 acres of the best rubber land of Mexico, upon which over 700,000 vigorous young trees now thrive. On the plantation also are numerous mahogany trees, some of which are of prodigious size, thus demonstrating the richness of the soil. The property is located in the department of Chiapas, and it is unquestionably adapted to the production of rubber and the growth of hardwood timber of great variety.

The committee of investigation consisted of Judge Lucien Shaw, Postmaster O. W. Mansby, Rev. L. M. Gray of Redlands, Cal.; E. A. Girard and C. A. Westenberg. They visited the property during the current year, and in their report the information is given that the rubber tree variety known as the Castillia tree is indigenous to the country especially to the lands lying along the river Michol, on which the property of the company has a wide frontage. Under one of these trees 1,467 rubber plants were counted, all of which had sprouted from the seed that had fallen from the tree during the present year. The trees bloom for the first year, and may be safely said to have established for the propagation of rubber trees, and all are doing well.

A large force of men are engaged in building roads, planting and developing the property. The director J. W. Ellsworth is in the property, and his careful attention to the affairs of the company received the warmest commendation of the directors. The committee favors the proposition of the Chiapas Rubber Plantation and Investment Company to produce rubber for export by cultivating the trees in large areas as a feasible and practicable enterprise. The only trouble thus far entered has been the scarcity of labor, but plans for overcoming this have been perfected. It offers excellent returns for the investment of small capital, and an investment of \$2,500 will for forty-eight months will insure a fine annual income after six months. The company has a guarantee deposit of \$100,000 with the National Bank and Trust company of San Francisco, as an evidence of good faith with investors.

The officers of the company are: L. Honestell, president; L. S. Sherman, first vice-president; George T. Dudley, second vice-president; Dudley Sherman, secretary. The offices of the company are rooms 63-64-65, Crocker Building, San Francisco. Send for prospectus.

## THE QUESTION OF DIET.

Claim that the Secret of Longevity is to Eat What You Please. "I am inclined to be a little dyspeptic," said one of a party of gentlemen who had just taken seats in a restaurant, "and I used to be very careful about my diet; but since moving to my present place, down the river, I have had all my preconceived ideas in that regard knocked higher than a kite. There is a big canning factory on the left bank of the river, and the gulf coast not far from my plantation," he continued, "and among other things they put up immense quantities of shrimp. All the light work is done by young women, and their favorite lunch consists of shrimp and butter-milk."

"Shrimp and butter-milk! What a murderous combination!" exclaimed one of the party, shuddering. "That's what I thought myself at first," said the gentleman from down the river. "It seemed like sudden death, but it isn't. On the contrary, the girls are all the personification of health. I never saw such rosy cheeks, bright eyes and dimpled arms! Why, the packing-room is a regular bower of beauty! And they eat a great deal, too! A quart of shrimp and half a gallon of butter-milk is considered a mere snack."

"But that wasn't the only thing that shook my faith in dieting rules," the planter went on. "The luggermen down there are the hardest fellows in the world. They have muscles like gnarled oak, and they don't know the meaning of sickness or fatigue. During the season they generally work until late at night; then they come in and eat a tremendous supper and go directly to bed. The supper consists of fat bacon, fried, cold cornbread topped in the grease, and black-jack molasses. They seldom eat fish or oysters, because they get tired of them. To top off with, each man drinks from two to four big tins of coffee, strong enough to float cannon balls. Then they lie down and sleep the sleep of happy, peaceful infants. In the morning they get up and devour more fat bacon."

"Good Lord!" said a sailor man, at the other side of the table. "That's the prejudice talking," retorted the planter; "those excellent people have discovered the secret of long life, which is to eat what you please. Ignore dyspepsia and it grovels before you. Water, please bring me some pickled pig's feet and strawberry ice-cream."—New Orleans Times-Democrat.

## RECENT INVENTIONS.

Telegraph poles can be easily erected with a new machine, which has a crank shaft set on the top of a long tube, to rotate a screw-threaded sleeve, which projects a rod out of the sleeve to raise the pole into a vertical position.

A New York woman has designed a fastener for veils, comprising a double-ended wire loop, with prongs at the center to attach it to the hat or hair, safety-pins being provided with hooks to engage the loop after the pins are inserted in the veil.

A Texan has patented a folding bed which is suspended from the ceiling by four pulleys, the ropes running to a central shaft, which is turned by pulling a rope wound on a wheel carried by the shaft, thus drawing the bed up to the ceiling and holding it out of the way.

A Rhode Island woman has patented a neat skirt lifter, having pins arranged in the under side of the skirt, with loops on the pins, to which are attached strips of tape, threaded back and forth from the loops to the waistband, so that a pull on the ends of the strips gathers up the skirt.

To prevent wagons from twisting the wheels and breaking them in car tracks a new attachment is formed of a curved bar, lying close to the rim of the wheel, with the upper end held by a shaft, to be depressed by the foot and throw the bar down into the track to allow the wheel to turn out.

Life-saving apparatus which will not interfere with the wearer's arms or legs when swimming has been patented by a Californian. Two elongated air-tight cones are strapped to the person's back, with the small ends of the cones toward the head, to support the body in a nearly horizontal position.

Revising Mississippi Trade. It is not improbable that the line of 80-ton steel barges which is to ply between St. Louis and New Orleans, carrying grain at 3 cents per bushel, may prove formidable rivals to the railroads, which have so crippled the once enormous steamboat traffic of the Mississippi. These barges, which draw when loaded, only fifteen inches, will, moreover, probably be the precursors of light, strong, safe, swift steamers, which moving at the rate of an average passenger train, will revive some of the ancient glories of steamboating on the father of waters.

Paper Uniforms. Uniforms made entirely of paper are worn by some of the Japanese soldiers, and they are said to be as durable as if made from cotton fabrics. They are so cheap that it is not considered worth while to mend them, and they are thrown away when only slightly worn or soiled.

## Dainty Appetite

Easily satisfied, a feeling of distress after meals, and more or less nausea between meals, every day—DYSPEPSIA! No need to say anything about the belching, vomiting, flatulence, headache, pain in the stomach.

Dyspepsia cannot be cured except by what gives vigor and tone to the stomach, functional activity to the whole digestive system. The medicine that does this according to the results of its use in thousands of completely cured cases, is

**DEAFNESS CANNOT BE CURED**  
By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; the cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

# Scrofula

## THE OFFSPRING OF HEREDITARY BLOOD TAIN.

Scrofula is but a modified form of Blood Poison and Consumption. The parent who is tainted by either will see in the child the same disease manifesting itself in the form of swollen glands of the neck and throat, catarrh, weak eyes, offensive sores and abscesses and oftentimes white swelling—sure signs of Scrofula. There may be no external signs for a long time, for the disease develops slowly in some cases, but the poison is in the blood and will break out at the first favorable opportunity. S. S. S. cures this wasting, destructive disease by first purifying and building up the blood and stimulating and invigorating the whole system.

J. M. Seal, 115 Public Square, Nashville, Tenn., says: "Ten years ago my daughter fell and cut her forehead. From this wound the glands on the side of her face became swollen and burst. Some of the best doctors here and elsewhere attended her without any benefit. We decided to try S. S. S., and a few bottles cured her entirely."

**SSS** makes new and pure blood to nourish and strengthen the body, and is a positive and safe cure for Scrofula. It overcomes all forms of blood poison, whether inherited or acquired, and no remedy so thoroughly and effectively cleanses the blood. If you have any blood trouble, or your child has inherited some blood taint, take S. S. S. and get the blood in good condition and prevent the disease doing further damage.

Send for our free book and write our physicians about your case. We make no charge whatever for medical advice.
