Stone of this city for damages in the sum of \$100 and costs, alleging that defendant had maliciously and without cause assaulted plaintiff and beat with fists, hands and a plank, the plaintiff thereby causing him much physical suffering which retarded him from the performance of his daily vocation for a period covering three weeks, and in consideration of the above allegations the plaintiff asks for a judgment as aforesaid. The trial was set for Friday afternoon.

TO DRUG PATRONS.

To do justice to your physician and at the same time relieve the suffering of the sick, to much consideration cannot be given the quality of drugs used in the compounding of prescriptions. A BRIGHT PROSPECT.

The business men of Cottage Grove are looking forward to one of the busiest seasons in the history of the town this year. Already large orders for goods are filled and on the way, and store room is contemplated by many. The prospects for crops give encouragement to the farmers, and indications for a bustling year in Bohemia were never better.

THE SUNRISE MINE.

A Newsy Letter—How Work is progressing—A Good Showing.

Sunrise Camp, Bohemia, Ore., March 9th, 1901.

Ed Nugget: The work at the Sunrise Mining Co's. camp has been going steadily forward all winter and on March 1st we could show 325 feet of tunnel and the ore is good all along the line.

No. 1 drift is in about 250 feet with a good looking face of ore and No. 2 is in 35 feet also very good looking all the way.

In crosscutting the ledge, north from No. 1 drift, we found the foot wall about 40 feet from starting point. There was low grade ore in part, but every three feet or so, there would be a streak of good free milling ore of from 1 to 3 inches wide, until we reached a distance of 20 feet, when we found a 2 foot pay streak of extra fine ore; then again some 6 or 8 feet of low grade ore, when we struck a fine body of base ore about 10 feet wide right on the foot wall. We have had no assays on these newly discovered streaks, so we cannot say how many dollars and cents the ore will go per ton, but it is safe to say that it will pay well for working.

The base in this mine is principally sulphides of iron and copper with some galena and zink blend.

Yours Very Truly,
A. J. ANDERSON.
