MADE TO Commissioner of the U.S.

General Land Office. Washington, D. C.

by a geologist and mining expert of world-wide reputation, Prof. Benjamin Silliman, who spent several months there, then being connected with the United States surveying corps, and in his official report says:

"Here are countless millions of of which the gold derived from the ages, and now lies ready for extraction by the most approved methods of river mining. The thickness of the Rio Grande gold gravel exceeds in many places 600 Feet, or nearly THREE TIMES address that of the like beds in California, while the average value per cubic yard is believed to be greater in the New Mexico beds than in any other such accumulation yet discovered. "I have made a reconnaisance of

the whole of this gravel along the Rio Grande, and have examined with all the care possible in the time at my command, the character of the gravel and its contents of gold. Nothing, I am persuaded, since the discovery of California and Australia is comparable for its measurable resourses of gold available by the laywill ever develop fresh points of interest draulic process to the deep placers
