INDIANA'S BOY KING OF TRAP SHOOTERS.

Ray Graham, the 14-year-old son of Z. A. Graham of Washington, Ind. is by far the youngest member of the Indiana Trap Shooters' League, and is considered the best wing shot of his age in the United States. Previous to last Christmas morning he had never fired off a shotgon. On that day his father made him a present of a fine double-barreled gun, and within a week the boy had developed into a remarkably successful hunter. The local gun club became interested in the boy, and a few months ago elected him a member of that organization. Since then he has been practicing with them regularly, and, with the exception of John L. Winston, who holds the State championship, is the best

SAW ATTACHMENT.

Frans O. Helsten, of Larium, Mich., has obtained a patent on the saw-oiling device shown in the illustration. It is well known that in sawing heavy sticks of timber the saw is apt to bind in the crease, and the purpose of this invention is to keep the blade olled, in order that it may pass freely through the cut. The tip of the nozzle extends down

the blade and there is a spring-controlled piston inside the reservoir which forces the oil through the openings as often as the piston is pressed by the finger. The length of the piston stroke is regulated by raising or lowering the screw cap at the top of the piston. Pro vision can be made for automatic feed from the oil chamber, making it unnecessary to use the piston regularly, the size of the orifice in this case being regulated by partially closing the hole with the tip of the piston.

Scrofula Scrofula is an unwelcome legacy, but one which the children of blood poisoned parentage must accept, with all its humiliating consequences. It is an inheritance that makes one poorer; that brings wretchedness and disease instead of health and riches, for the child whose ancestral blood is tainted with Scrofula or the leathsome virus of Contagious Blood Poison is unfitted for the arduous duties of life ao long as any of the transmitted poison remains in its veins. Scrofula manifests itself in various forms; swollen glands about the neck and throat, catarrh of the head, weak eyes, hip bone disease, white swelling and offensive sores and abscesses are familiar symptoms, attended usually with loss of strength, poor digestion and pale or bloodless complexion. The skin is sometimes most dreadfully affected, eruptions breaking out on all parts of the body. Scrofula destroys bone, tissue and flesh; no part of the human system escapes its withering, beaumbing touch. Parents whore blood is poisned the places were lakeed and became open running

When nineteen years old, and about one year after the birth of my first child, the glands on the left side of my neck began to swell. Four of the places were lanced and became open running sores; risings came under my left arm, and the discharge was simply awful. The doctors said I had the werst case of Scrofula they had ever seen. I took icdide of petassium, but this nor the other drugs given for this disease brought raile. When the physicians advised me to have the glands removed, I decided to try S. S. S.
