PRICE \$35

E. L. KING,

General Agent for Oregon, Washington and Idaho. Albany, Ore.

NOTICE FOR PUBLICATION.

United States Land Office, Roseburg, Ore.
July 6th, 1901.
Notice is hereby given that in compliance with the provisions of the act of Congress of June 3, 1878, entitled "An act for the sale of timber lands in the States of California, Oregon, Nevada, and Washington Territory," as extended to all the Public Land States by act of August 4, 1892, Nathaniel G. Pennel, of Kelse, county of Cowiite, State of Washington, has this day filed in this office his sworn statement No. 1721, for the purchase of the S 1/2 SW 1/4, NE 1/4 SW 1/4, SW 1/4 SW 1/4 of Section No. 14 in Township No. 20 South, Range No. 2 West, and will offer proof to show that the land sought is more valuable for its timber or stone than for agricultural purposes, and to establish his claim to said land before the Register and Receiver of this office at Roseburg, Oregon on Monday the 16th day of September, 1901.
He names as witnesses:
W. S. Bales, J. B. Bales, of Cottage Grove, Ore., Frederick Bloomfield, of Eugene, Ore., H. L. Paimel, of Kelso, Wash.
Any and all persons claiming adversely the above-described lands are requested to file their claims in this office on or before said 16th day of Sept., 1901.
J. T. Batrooms, register.

FOR SALE.

Lavendar sticks for making fans and other designs, for sale, 10 cents per dozen. Enquire of Mrs. C. J. Howard.

Take the Bohemia Nugget.

CAME TO VIEW BOHEMIA

Massachusetts Men Inspect the Mines.

They Spent Five Days in the District and were Well Pleased with What they Saw

Have Returned East and Will Make Favorable Report on Their Investigations.

Last week, through the invitation and under the guidance of G. W. Lloyd, eight gentlemen came here from Massachusetts to look over the great Bohemia mining district with a view to future investment in some of the fine properties in that district.

They were conveyed up into the hills in two of the fine coaches of the Chrisman & Bangs stage line, which rigs were at their disposal throughout the entire trip, and they were afforded every opportunity for a close and thorough inspection of a goodly portion of the mines and prospects by the way.

One of the party was E. S. Harris of Boston, who is a mining expert, mineralogist and geologist, having taken a special mechanical course at Teck in Boston, and finished his education and graduated with high honors from the Michigan School of Mines. He has since built and successfully managed two mills, developed several mining properties and has had a wide and thoroughly practical experience as a mill man and assayer.

Mr. Harris, when questioned by the Nugget reporter, said that he was more than satisfied and delighted with what he saw, and predicts that Bohemia has a future second to no other mining district on the Pacific coast.

He found all the veins and ledges he visited to have the same trend and dip toward a central body. They were in every instance true fissures with smooth and well defined hanging and foot walls free from contact. Before going into a mine Mr. Harris was told by owners what he would see, and he says that in no single instance was a property misrepresented, for on inspection he found more and better results in every property than the owners claimed for it.

He thinks that the development work done in many instances has been most too scattering and superficial and that had the efforts been concentrated on one opening, instead of so many short tunnels and crosscuts, that the district today would have been far in advance of its present status and would long ago have attracted the attention of capital.

Mr. Harris took with him east a number of specimens of ore from several ledges, which he will analyze and determine the component parts and the full value of each mineral therein. When this is learned the best methods will be sought out for securing the values.

His investigations lead him to say that the mines of Bohemia can be more easily and cheaply worked than mines of any other camp he has ever visited. No shafts are necessary and consequently no expensive hoisting works need be erected. The ore bodies can all be taken out

through tunnels, the hills being very steep and the canyons very deep.

The members of the party, one and all, were most emphatic in their declarations that Bohemia and Cottage Grove have a great destiny before them, and say that if the people here will manfully put their shoulders to the wheel and with a united effort do all they can, that it will be but a short time before abundant capital will come to their aid and a prosperity such as the most sanguine have not dreamed will be the rule in this section.

WEEKLY CROP BULLETIN.

The past week in Oregon has been the warmest of the season and it averaged nearly 6 degrees warmer than the previous one. Numerous small showers occurred in Southern Oregon during the first days of the week, but they were not general or heavy enough to be of much benefit, and no rain of consequence has fallen elsewhere since the latter part of June. General rains are now badly needed for corn, hops, potatoes, gardens and pastures. The second crop of alfalfa is being cut in Southern Oregon, and the yields are about the average. The second crop of clover in the Willamette valley is not as promising as usual, on account of dry weather.

The grain harvest is well advanced, but thrashing in the western sections has not yet become general, although well begun east of the Cascade mountains. The wheat crop in Umatilla county is turning out much better than expected and the grading will be good.

Some lice are reported in the hop yards, but they are not causing any damage of consequence and the weather is unfavorable for the spread of this pest, and the hop outlook continues favorable. Corn is making good progress and early potatoes are maturing rapidly. The potato crop, although needing rain, is doing fairly well and there are no complaints of blight. Pasturage is getting poor, and there is a slight shrinkage in the milk supply reported from Curry and Coos counties.

The weather has been favorable for fruit, which is making good advancement. Tame blackberries are plentiful, and plums, peaches and early apples are in the market.

DIVIDE ITEMS.

The woodyard at the Divide is a scene of great activity at present, teams constantly coming in with wood and returning.

Mrs. Ed Coffin has been staying a few days at Mr. Roy Coffin's.

Grain is about all cut and threshing will begin in a few days.

A lively dance last Saturday night, but no one injured.

Richard Tapp visited Mr. and Mrs. Isaac Wilcox and family at Lynx Hollow on Sunday, while several others from here went down the valley.

MARTIN CREEK ITEMS

Miss Eva L. Meyer is visiting with her sister, Mrs. Cora Hartley, upon Martin Creek and Hope mountain. She is a very successful teacher in the Decatur, Illinois, public school. She has just come from Frisco where she has been attending the Epworth League Convention. She will return to her home in Decatur via Idaho and Yellow stone park.

Everything is looking good on Martin creek and we look forward to the time when this will be the best part of the camp.
