ENGLAND MUST BORROW AGAIN CZOLGOSZ ON TRIAL

ASSASSIN OF PRESIDENT M'KIN-LEY PLEADED GUILTY.

the Plea to Be Recorded "Not Guilty" -Case May Be Concluded in Two Days -The Physicians Gave Important Testi-

Buffalo, N. Y., Sept. 24.-Leon F. Czoigosz was placed on trial yesterday charged with the murder of President William McKinley. He entered a plea of guilty, which was subsequently changed to "not guilty," by direction of the court. All the events of the day indicated that the trial will be short. Court convened at 19 o'clock said he had formed an opinion on the case was excused by the District At-Those who acknowledged Justice Truman C. White, one sides. colleagues, ex-Justice Robert C. Titus and Cariton E. Ladd, they were ready

to act in behalf of the prisoner.
"I thought it best," he said, "for my colleagues and myself, that I should say something regarding our presence here as attorneys for the defendant. At the time my name was suggested 1 was out of the city, and knew nothing of what was transpiring here with reference to the selection of counsel for the defendant. When the circumstances of my selection were told to me, I was extremely reluctant to accept. But the duty has been imposed, and I considered it my duty, in the light of all the circumstances, to deschoorn from welcoming the Duke of Cornwall at Cape Town.

"Lord Kitchener's message clears up the mystery as to the location of in the land.

"I am familiar with these circum-stances," said Justice White, in reply, "and I wish to say, I will give you every assurance that the prisoner will

mands in any criminal case."

The work of securing the jurors was then undertaken, with a celerity that then undertaken, with a celerity that was amazing. Before the day was over the entire panel had been sworn, the jurors had listened to a description of the Temple of Music, where the crime occurred; had seen photographs of the interior of the structure, and had been told by three surgeons what had caused the death of the President and the effect of the assassin's shot and the effect of the assassin's shot on the various organs of the body, They had also learned why the fatal

bullet had not been located.

The probable duration of the trial, fense, was non-committal, however, and merely said: "That depends upon office of the council it is reported the turn things take." It is not prob that two molding shops have settled able that any defense will be put in owing to the character of the prisoner and his refusal to help his attorneys The Nome banks have given out union, and 20 men have returned in any way to procure evidence which an estimate of the output of gold to work. Murder in the First Degre:

Buffalo, Sept. 25.—Leon F. Czol-gosz, alias Fred Nieman, was found guilty of murder in the first degree by a jury in part III. of the Madisonville, Ky., Sept. 26.—The ciation it was stated that a number of supreme court, in having on the 6th union teamsters were returning to in check the terbulent coal mine work. afterwards resulting in the death of the president.

The wheels of justice moved swiftly. The trial of the assassin consumed eight hours and 26 minutes, and covered a period of only two days. Practically all of this time was occupied by the prosecution in presenting a case so clear, so conclusive, that even had the prisoner entered the plea of insanity it is doubtful if the jury would have rendered a verdict differ

ent from the one rendered today. The announcement this afternoon by the attorneys of Czolgosz that he eminent alienists summoned by he Erie county bar association and by the district attorney to examine Czolgosz and to determine his exact mental condition had declared him to be perfectly sane destroyed the only vestige of a defense that the attorneys could have put together.

Better Fuel Than Coal.

Mexico City, Sept. 25 .- Daniel Guggenhelm, chairman of the executive poard of the American Smelting & Refining Company, is here with a party of leading manufacturers engaged in the lead industry. The party will make careful inspection of smelters in this country controlled by the trust. Regarding the substitution of Texas oil for coal in this industry, Mr. Gug-

genheim said:

"We have proved beyond all doubt that crude oil is by far the best fuel. It has passed beyond the experimental stage." stage.

WORSE FATE THAN DREYFUS.

General Hernandez of Venezuela, is Being Tortured in Confinement.

New York, Sept. 25.—According to the story told here by a Venezulean who reached New York a few days ago, General Jose Manuel Henrnandez, the head of the Conservative party in Venezuela, and who is a political prisoner, is undergoing treatment even worse than that of Dreyfus on Devil's Island. His political and military strength was recently shown, says the Tribune, in the organization of lutionary movement on the frontier, under the leadership of General Gar-brane. This uprising which President Custro called a Colombian invasion, was, in reality a Henrnandez move-ment, it is said.

"Immediately following this," said one of Hernandez's former fellow-brisoners now here, "began the sys-tematic attacks on General Hernandez, which his friends fear will end the veteran's career. The first move was to transfer him to the darkest dun-geon in the foul-smelling old fort. A huge ball was fastened to his ankle He is not permitted to see anyone, nor is he permitted to communicate with the outside world. He is even denied the usual exercise about the prison yard. His keepers take a fiendish delight in throwing live rats, spiders and other vermin into his dungeon, particularly when he sleeps. The rations allowed General Henrnandez are only half those required by a man of his physical condition."

GHASTLY SCENES AT WRECK.

Persons Injured in Hungarian Collision Were Burned Alive.

Bucharest, Sept. 25.—The collision resterday at Palota, between the Vienna express and the petroleum trains, appears in the light of latest events, to iave been a most terrible affair. In a ew seconds the whole arena of the collision became a huge lake of burnng petroleum. Trees and everything inflammable within an area of quarter of a mile were destroyed.

There were some ghastily scenes A girl was burned to death in sight of both her parents, who escaped.

M. Dinu, a Roumanian millionaire,
got his foot jammed in the wreckage and begged one of the train guards to sever the foot with an ax, promisthe trial of the most meager criminal ing him a large reward if he would do so. Before the guard could help him he sank into the flames and was burned to death. Schwartz, the con-

ductor, who was similarly jammed, every assurance that the prisoner pur-bave a fair and impartial trial. Dur-tried to extricate him that his would-ing the progress of the trial he will tried to extricate him that his would-ing the progress as the law de-be rescuer had to be dragged away just as Schwartz perished in the flames. Most of the 22 who were killed were burned to death.

BOERS APPEAL IN VAIN.

Administrative Council Will Declare Itself In competent to Pass on Issues Involved.

The Hague, Sept. 25 .- It is undertood that the administrative council of the arbitration council will declare itself incompetent to deal with the Boer appeal for arbitration upon the issues involved in the South African

Comment of German Press.

London, Sept. 25.-The Berlin corespondent of the Times says:

"The news of the British reverses n South Africa is discussed on the whole with much moderation in the more serious organs of the German press. The less responsible papers make no effort to conceal their exultathat the chief importance of the recent Boer successes is in the encouragement they will afford to the burghers and their effect upon the Cape Colony loyalists. The paper re-gards the new activity and daring of the Boers as a crushing reply to Lord Kitchener's latest proclamation,"

Ten Killed in Collision.

Warren, Mass., Sept. 25,—Ten were killed and 21 injured in a collision on the Boston & Albany railroad today, between a switching freight and a gravel train. All the killed and injured were gravel train em-ployes, who were in the caboose eating dinner when the collision occurred. The caboose was telescoped by a gravel

Big Insane Asylum Fire.

Norfolk, Neb., Sept. 25.-The asylum for the insane in this city was almost completely destroyed by fire today. It is believed that three inmates were burned to death. The fire originated from some unknown cause in the west wing of the institution. Loss on buildings and contents will probably reach \$300,000. Owing to the early hour and the unpreparedness of the fire depart-ment but little could be done in the effort to save the institution. There was 600 inmates in the main building and the efforts to rescue them were difficult in the extreme

Coming to His Father's Side. Silverton, Or., Sept. 25 .- T. W. Davenport, who was injured a few days ago by falling in the running gear of his wagon, breaking his lower jaw and receiving other injuries, is reported better today. His friends, however, have little hopes of his recovery.

In view of the serios condition of

For Fastening Horses. some horses there is always onstant trouble when they are at the manger, by getting their feet over the rope which fastens them to the stall. Of course, this can be obviated by shortening the rope, but this is not advisable where the horse is locked up for the night after the feed is put in the box, for the short rope does not give him the opportunity of lying down in a comfortable position. The trouble indicated can be remedled by use of a halter ring fastened on the strap going over the nose of the horse instead of under the jaw as usual. The rope is

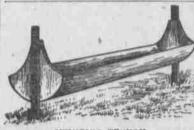

GOOD HORSE FASTENER.

attached to this ring, and then run through a staple in the wall directly in front of the horse in the back of the taching a weight of some kind to the end of the rope to keep it taut, there will be no trouble caused by this rope getting in the way, for when the horse moves toward the manger the weight to pass through on to the block. This will carry the rope down. The weight should not be heavy enough to incon venience the animal when he is lying down at the full length of the rope.

Care of Winter Apples. Apples marketed during the winter always bring a much higher price than when offered for sale just after harvest. Of course, it is well understood that it is impossible to keep apples through the winter for the high prices of early spring unless they are kept in cold storage, but with an ordinary storehouse, or a good cellar, it is possible to keep the fruit several months longer by handling it properly. It should be carefully picked from the tree, and be free from imperfections or bruises. In putting it into the barrels, the barrels should be laid partially on one side so that the fruit may be turned into it from a small basket and roll to Great care al between the specimens, and they should possible without enough pressure to bruise them. After the barrel is filled, It should be carefully hooped, and the head put in so that it will hold the top layer firm, but not with much pressure. Apples packed in this way can be kept until midwinter easily if stored in a building where they will not freeze, and where the air is reasonably dry.-Indi-

anapolis News. Simple Swinging Trough. I have a feed trough which I made myself out of a piece of galvanized iron, writes a correspondent of Poultry Keeper. It is three and one-half feet long. To make it, get two pieces of wood and shape them to fit the inside of the trough for the ends as shown in the diagram. Nail well with lath nails. If you want one for water, make it Ridgely, whose appointment to the shorter, and before putting the end controllership of the currency was pieces on paint a piece of cloth and announced at Canton yesterday, will place between the end pieces and the trough. Then after you have your end presidency of the Republic Iron & pleces on, get a plece of lath just long steel company and leave Chicago enough to fit between the ends and nall

SWINGING TROUGH.

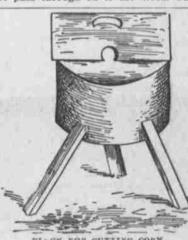

trough. This will keep the chickens out of the water. Put two eyes on the top of the end pieces to hang it by. Drive stakes in the ground just far enough apart to let the trough swing. Put pins in the top of the stakes to fit the eyes on the end pieces of the trough. The top of the trough should be about six inches above the ground. You can use your judgment about painting it. 10 you do, put some water in it and let it thick brown extract is obtained. One stand about a day before allowing the pound of tobacco stems should yield chickens access to it.

peaches, which must be planted in the plants may remain in this mixture for spring, there is to be said in favor of several minutes and need not be washfall planting, that the soil can be put ed off after being taken out.

in better condition at less expense of time and labor than in the spring. The planter generally has more time to devote to the work in the fall, and hence can do it much better. Then, too, the trees from the nursery are generally in better condition than after they have passed through a winter. The nurserymen also have fewer orders in the fall, and can give more care to filling orders at this senson, and generally furnish better stock. Even with the more ten-der sorts it is possible to give them needed protection during the first winter by throwing a furrow toward the trees on either side. Unless there is a large area to be planted and other work seriously interferes, everything is in favor of fall planting.

Breaking Dry Ground. In our haste to break fallow land for wheat we often break the fields when the dry weather has so hardened them. that the plow throws the surface into a mass of clods, with little or no soil to act as a seed bed. While early breaking for wheat is very important, the greatly increased labor of breaking dry land and preparing it for planting should have considerable weight in determining whether or not the ground should be plowed when dry. When broken ground consists of nothing but large clods, it is not fallow land. It will not hold moisture until the clods are mashed into fine soil. As a rule, the breaking of wheat ground should be delayed until it may be done when the turned soil mellows from the plow. It is very important to be ready to do such work when the proper conditions do prevail, for good rains may be followed by sufficient drought to make the ground work cloddy again.-Exchange.

Block for Cutting Corn. When it is necessary to cut the ears of corn into small pieces for economical feeding, unless one has a device for it, manger, as shown in the cut. By at- there is considerable danger of the person cutting the corn being injured. One plan is simply to attach a board to a chopping block, cutting a hole in one edge large enough for the ears of corn

BLOCK FOR CUTTING CORN board should be about ten inches wide. the bottom rather than fall. In this By slipping the ear of corn through the way there is little chance of the apples hole, the chopping is done on one side The concensus of opinon is be taken to see that the fruit is so pack- held on the other side, so that it is imed that there will be little or no space possible for one in any way to injure the hand holding the corn. An opening be packed into the barrel as firmly as in the board above the hole is made for convenience in handling the block.

> Flavor 'n Falf- krown Chicks. There is considerable complaint every year on the part of consumers that the half-grown chicks marketed as roasters. have a very undesirable flavor. There is no doubt that in nearly every case it is due to a poor quality of food given the growing chicks. Meals of various kinds, usually cornmeal, is fed largely to growing chicks in some sections, When bought at the low price it is generally found that it is filled with worms This sort of food given to chicks will taint the flesh every time. It is hard to understand why those who raise fowls for market will persist in buying cheap foods. If the chick is worth raising at all it is worth being fed on the best obtainable. If given the best grains in variety, and a good grass range, there is no reason why the flavor of the growing chick should not be all that is desired.-Exchange.

Prevention of interfering. The interfering of borses can oftentimes be remedled, especially if the animal interferes in front. The feet should be trimmed so that they are level, and the animal should be shod with a small outside calkin at the heel outside. The inside heel should be plain and short. Have the calkins placed on each side of the shoe about two inches from the toe. Interfering sometimes comes from general debility of the horse, and when this seems to be the case the animal should be brought up in every way possible, feeding it on oats and bran with good bay. Of course the interfering which is brought about by general debillty, is caused by the weakness of the unkles. This, however, is not often the

Tobacco ecoction.
Tobacco decoction for use as an insecticide can be made by reducing some of the extracts now on the market or by boiling cut or broken stems until a one gallon of extract in two hours' bolling. If it bolls down to less, add water Fait Piseting. ing. If it bolls down to less, add water With nearly all fruit trees, except to make up before using. Strawberry
