We positively have the largest line of Wool Hose for Ladies, Misses and Children and also Men—that we ever had in stock.

Blankets at from 65c to \$3.00 per pair.

Rubber Goods are much cheaper than last year.

## SMELTER TO BE BUILT.

SPECIALLY ADAPTED TO ORES OF BOHEMIA DISTRICT.

It Will be Erected in Portland by the Time the New Railroad is Completed.

P. J. Jennings of the Helena Consolidated Mining Company Bohemia district returned yesterday from a visit to the mines. The company has withdrawn all its shares from the market on account of the rich strike made in No. 1 tunnel, ore from which assays up to \$800 to the ton in gold, exclusive of considerable values in copper and silver. The extent of this valuable ore body has not been determined as yet, though enough has been blocked out to satisfy the management that it would not be business prudence longer to continue the sale of stock.

"The railroad survey to the mines is progressing rapidly," Mr. Jennings said, "and by the time the road is completed next July or August, so that one can ship ores to Portland, we shall have a smelter here to treat them. We shall not erect a big 1000-ton smelter, however. It will be of about 300 tons capacity, and will be specially adapted to the ores of the Bohemia district. If we find it advisable afterward to add stacks for the treatment of ores of other tributary districts, we will do so, but at first we shall have only our own properties in view. Without transportation facilities and the means of treating its products, no mine is worth anything. With these adjuncts our Southern Oregon mines will be found as valuable as any in the west, and our own necessities compel us to supply them.

"I have been today arranging for a shipment of ore to Omaha. Rock assaying \$500 or more to the ton must pay freight charges of \$1.35 per 100 pounds, one of less value 95 cents per 100 pounds. From this it will readily be discovered that self-interests compel us to own our own smelter, and we shall build it at Portland, because we believe its value to the mining interests of the state will soon be so apparent that its enlargement will be demanded by the business men of Portland." In other words, the smelter we shall build for our own use will be the nucleus, we believe, for one of much greater pretensions.

"The actual mileage of the branch railroad from Cottage Grove to Bohemia is only 34 miles no matter which side of Row River it traverses, and we feel sure that the track will be completed by July or August of next year. While we are now employing a great many teams in hauling ore to Cottage Grove, our actual shipments are a mere bagatelle to what they will be when cars may be made use of, and other mines of the Bohemia camp will likewise be liberated from their bondage, and as all the ores of that region are similar in character, we shall have all the rock we can handle with a smelter of a capacity of 300 tons.

"There is one thing concerning smelters and smelting which is not

generally understood by the public. For example, if we send to the Tacoma smelter ores from our mine, we must elect for what particular metal we desire it treated. Gold, of course, predominates in our rock, but it also carries an average of \$29 in silver and copper. The value of these two latter metals is lost to us entirely, as the smelting company will not allow us anything for these. With our own smelter this would not be the case, and \$29 per ton is an item worth considering."

The Bohemia district is rapidly advancing to the front among the mining regions of the west.

A winter trip to Southern California and Arizona via the famous Shasta Route is one never to be forgotten. Renewed acquaintance with this section will ever develop fresh points of interest and added sources of enjoyment under its sunny skies, in the variety of its forests and added industries, in its prolific vegetation and among its numberless resorts of mountain, shore, valley and plain. Two trains leave Portland daily, morning and evening for California. These trains are equipped with the most improved pattern of standard and tourist sleeping cars, and the low rates place the trip in reach of all.

For illustrated guides of California and Arizona winter resorts, address: R. E. MILLER, Gen. Pass. Agent, Portland, Or.

## TO RECLAIM HARNEY COUNTY LAND.

The French-Glenn Livestock Company has about completed a large dredger which it has been building all summer for the purpose of dredging a large swamp formed by the Biltzen River and numerous other small streams that are fed by the snows of Stein Mountain. The swamp is about 25 miles long by three to five wide, and is estimated to contain 4500 acres of swamp land, which is not fit for anything except a habitation for wild game. If the present undertaking proves a success it will be one of the finest hay-producing sections in the county. Wild hay where there is plenty of water produces two tons an acre, so there will be about 100,000 tons of hay put up where at the present there is nothing but water.

This company have about 75,000 head of cattle, besides a large number of horses, and when there is a severe winter thousands of head of stock are lost owing to the shortage of hay and pasture.

The ditch is to be 60 feet wide and 9 feet deep. It is to follow as nearly as possible the channel of the Biltzen river which flows into Mallheur Lake. A company from San Francisco has the contract to run the dredger, and it is estimated that it will require two years to complete the ditch.

A captive balloon, containing nine people, one woman and eight men, broke from its fastening at Eleventh and Folsom streets, San Francisco on the evening of November 3 and floated to the neighborhood of Redwood City, about 50 miles distant. The occupants of the balloon are reported to have landed unharmed. The balloon had been sent up several times during the afternoon with passengers. It was fastened to the ground by a 1000-foot rope cable, one and a quarter inches in diameter. While descending on the fifth trip, about 500 feet from the ground, the rope broke 50 feet from the balloon. To the horror of the spectators, the balloon rapidly shot up in the air to a height of 2000 feet or more, and floated away in a southerly direction. It landed in the hills near Redwood City, and a brief report from that place says none of the passengers was hurt. The balloon had a lifting power of 4000 pounds.

Read the Bohemia Nugget.
