Several persons became members of this young people's organization.
Shalwood sawed into stove wood lengths is being sold at Long & Bingham's saw mill at forty cents per few nowadays. An investment of a few dollars in this stuff will prove a wonderful saving in fuel as soon as it becomes dry enough to burn readily in a cook stove. Shalwood at forty cents per few will be a boon to the people here who are situated so as to take advantage of it.
T. W. Jenkins was a pleasant caller at this office Friday leaving the necessary coin to keep him supplied with this household necessity for the next year. Mr. Jenkins left Monday for Roseburg where he will remain a few weeks in the interests of the Modern Brotherhood of America. From there he will go over in the Cross Bay country, to remain during the winter in the interests of this lodge.

FROM THE MONMOUTH NORMAL.

Editor of the Bohemia Nugget: Dear Sir—Thinking that perhaps you would like some news from one of the state institutions I have ventured to write some items of general interest from the Oregon State Normal School located at Monmouth.
I entered the school at the beginning of the year. On the first morning, Sept. 16, at nine o'clock, President Rescher conducted chapel exercises in the assembly room on the second floor. Besides the students, a number of townspeople were present by special invitations. After an interesting talk by the president, we were given directions as to registration, etc. Those students who were fortunate enough to get their study cards made out before noon had the remainder of the day to spend as they pleased. But committees from the Christian Associations met every morning and helped the new students find congenial boarding places and render any other needed assistance. Then followed the regular routine work of the school. Most of the students feel that it is necessary for them to complete the required work in as short a time as possible and so take from five to seven subjects for a semester. This is of course more than they can do justice to although they seem to do fair work in all of them. We have just finished the five-week examination, not included, and the average of the work was good.
Many people would perhaps like to know something of our excellent corps of teachers, and so I will give their names and the subjects taught. President Rescher, special methods; H. B. Buckham, psychology, history and Philosophy of education; Miss Furbill, English literature, elocution; A. P. Campbell, history, mathematics; R. C. French, principal training dept. methods; Mrs. Pennell, rhetoric, grammar; Mrs. French, chemistry, biology; P. O. Powell, mathematics, book-keeping; G. A. Forbes, physical training; Miss Higgins, drawing, music; L. A. Robinson, physics, mathematics; Miss Smith, Mr. Mahoney and Mr. Allen, critic teachers.
We have several up-to-date student organizations such as literary societies and athletic clubs for both ladies and gentlemen, a prohibition league, Christian associations, oratorical associations, and a school band. Several of these brought honor to the school in their inter-scholastic relationships last year. We do not intend to be behind this year and our foot ball and basket ball teams are already hard at work preparing to win renown.
The music teacher is making a specialty of chorus practice once a week and the singing in chapel has noticeably improved in consequence.
I had meant to tell you of the pretty town of Monmouth, so well situated in this beautiful valley with the low-lying Coast Mountains on one side and the snow peaks of the Cascades on the other, to be the home of such a school; but I'm sure that space forbids. In my next I shall have had time to accomplish something worth the telling, but I'm sure that I've already had time to catch something of the fraternal spirit which characterizes every Monmouth student.
