In Kansas City recently the brewers agreed among themselves that they would not sell beer to a certain saloonkeeper until he had paid a bill he owed to one of them. The matter was taken into court and the court held that the combination was in restraint of trade and therefore unlawful. In Milwankee the beef dealers made a black list on which was the name of a retailer to whom they refused to sell meat un til he paid certain bills. This matter also went into court, but the court held that the black list was a privileged communication and was therefore perfectly legal.

It is said by experts that the finest antique, colonial furniture in this country comes from the South. Much of it has been discovered in the cabins of aged negroes who were formerly slaves. When these rare, carved old pieces of mahogany were discovered by their masters they were often given to the negroes, not understanding the valuation of them that would come later. A richly carved mahogany sideboard was found recently in a chicken roost in one of the Southern States. The chickens roosted on it every night and t was worn and battered. This was bought by a dealer for a small sum and after it was restored sold to a customer for \$250.

The gun crews on our warships are doing some extraordinary accurate shooting of late. On the Illinois, firing at a stationary target while the vessel was moving, a score of twelve hits out of thirteen shots was made with her thirteen-inch guns at a distance of five miles. The gunners of the lows, steaming at twelve knots past a stationary target, made thirty alts out of thirty shots with six pounder rapid fire guns. This feat was accomplished by three gun crews, each baving ten shots. It beats all records. At San Francisco the subnarine torpedo boat Grampus discharged a torpedo at a range of 350

Young Mr. Hopkins, aged 32, with \$275,000 to his inside pocket in the shape of letters of credit, left the other day for a journey of 25,000 miles. Mr. Hopkins represents a Western jobbing use. Although be takes his wife along with him, be is not traveling en-tirely for pleasure. He is going over to China and Japan to buy ten. This man has learned about all there is to be known concerning ten. The head of his jobbing house knows more about the finances of the firm, the credit man more about the retail trade and the nd bookkeeper more about the books, but Mr. Hopkins knows more about ten than all of them put together. The firm wanted to buy heavily of tea. The pert to the places where it is grown. Hopkins was the expert. There is a lesson in this incident for young men, because it is typical of the modern fessions, is coming more and more to be specialized. The man who knows how to do one thing better than any-one else in his firm is the man who is selected to do that thing. And the pay is adequate because there is little or no competition. However-this fact must not be lost sight of: No man can well informed on other things. Hop-kins must know ten better than the others. But he must also know other things connected with the jobbling business. To know a part one must know the whole in relation to its parts, and the part in relation to the whole. Since the Epanish-American war such thought has been given by those directly interested to the fraining of our citizens in the militia. This awakoning of interest on the part of the public as well as of the military auhorities has probably been greater on account of the war in South Africa, which demonstrated clearly that citizen troops, with the right sort of training, and on the defensive, could hold their own against a vasily superior at-tacking force for a long time. It proved lso that the war of the future is likey to bear a much stronger resemslance to guerrilla or frontier conflict than to the great wars of the past True, nobody can tell what the erratic course of history may be, but this much seems certain, that if the United which produced this race of fighting their excursion. their lives depending on their skill with the rifle. Perhaps the most curious wreck in the history of railroad disasters curred some time ago in Arlzona. The Markopa and Phoenix train was ushing acress the Tempe Bridge, eight miles from Phoenia, when a span of the bridge gave way, hurling the engine and three cars to the dry, sandy bed below. It was a mixed train, the first three cars being freight cars and the rest passenger carriages. The fourth car, filled with passengers, bung poised over the edge, testering apparently in a shiver of doubt. Had it it must have dragged the next car with it, and the occupants of both would have been crushed in the debris. It hung, however, batf on and half off the bridge, as ready to jump time space, tipped down at quite an angle toward the ground. The passengers all got out safely. The only fatality in this accident was that of a Pinia Indian who was stealing a ride and got caught in the debria.
