## MANY ATTRACTIONS FOR POLITICIANS IN POSITION OF UNITED STATES SENATOR.

J. INGALLS, of Kansas, once stated that the office of United States Senator was the most attractive post under the government-sthe su-

preme prize of American politics the Presidency not excepted. Mr. Ingails was not the only man who held that opinion. In the closk-of the Senate a few days ago the reasons why the office of Senator was such a desirable position were subject of an animated discussion between a group of Scuntors.

"One of the reasons that the office is so much sought after," said a Western Senator, "Is that its comparative faity of tonure gives service in the upper branch of Congress a powerful charm for men of ambition. Its desirability may be inferred from the action of many of the Legislatures in the last few months which have had Senators to elect. Within the last few weeks Platt, of New York; Pairhanks, of Indiana; Spooner, of Wisconsin; Teller, of Colorado; Platt, of Connecticut, and Allison, of Iowa, were reelected for the term beginning this year.

The only instance known of a man resigning his sent in the Senate to enter the House was that furnished by Henry Clay. The relative attractive-ness of the two branches of Congress has radically changed since that time, iowever, and there are several reasons why the post of a Senator is far more desirable than that of a Representative, although the salary is no greater.

"The post of Senator carries with it a social prestige which is wanting in that of a Representative. The term is much longer, the chamber is smaller, and, therefore, each of its members is able to command a greater share of the country's attention than fails to the lot of the average Representative. In addition to this the scope of the Senate's activity because of its power over treaties and Presidential nominations is broader than that house; it has been able to mourp, through its power of amendment, the pre-rogative primarily belonging to the House of originating revenue bills, and the freedom of debate which it enjoys gives a chance for all of its members to assert themselves. Perhaps this is one of the reasons why lawyers of the first runk, like Senator Daniel, of Virginia, and Spooner, of Wisco enjoying a incrative practice in their respective States, have been willing to give up their large private income to accept a sent in the Senate, which pays but a small fraction of the money they could undoubtedly earn on the outside.

"It may also account for the fact that men of the very highest talent and reputation have been anxious to accept Senatorial honors in cases where their private income is sufficient to place them above the ordinary struggles of life."-Louisville Courier-Journal.

A MINGLING OF DELICATE AND AUSTERE EFFECTS IN THE HIGH TURN-OVER COLLARS.

A mingling of delicate and sustere effects shows in the new high turnover linen collars which are ornamented with embroidered or woven-in dots n white or color and a single or double row of herustitching about the edges Other linen turnover collars come in uncompromising plainness. Some of the models have a perpendicular buttonhole near the edge of each flap in front. Through these buttonholes a link clasp is slipped. Low rolling Byron collars are popular for sporting costumes, as they permit perfect freedom for the throat and at the same time have a next, trim appearance. A linen collar which has attained popularity in Paris is a stiff, clerical band, fastening with two studs at the back. The scarf is tied about the base of the collar. the which is, as a rule, worn with the stiff linen collar is the long scarf of soft silk crape or the new linen gauze. Long scrafs are the prevailing neckties. There are, indeed, comparatively few stiff mannish ties to wear with linen
