

Devoted to the Mining, Lumbering and Farming Interests of this Community, to Good Government, and Hustling for a Grub Stake.

VOL. V

COTTAGE GROVE, OREGON, FRIDAY, JULY 31, 1903.

NO. 27

ON THE RIGHT-OF-WAY

The Right-of-Way for the O. & S. E. from the Red Bridge to Warehouse is now being cleared.

STEAM SHOVEL BOUGHT.

The Musick Mine Continuing in Good Ore—Machinery to arrive.

Work is going on with all possible speed at the front on the O. & S. E. The company is now pushing the right-of-way clearing from the Red Bridge to the Warehouse, and already about two and one-half miles of the distance has been covered. The depot at the Red Bridge has been completed and the yard looks neat and attractive. Several yard tracks have been laid and the conveniences for handling freight have been greatly improved. The track, taking into consideration that the road is hardly a year old and that the major part of the track has been laid this season, is in remarkably good shape, and a tide over it is one of pleasure.

Manager Pearson informs a Nugget man that the company has purchased outright for its special use a steam shovel, which will be on the ground in the course of two weeks, when ballasting will commence again. The survey for the new track on the east side of the depot which will be known as the passenger track, has been completed and as soon as possible it will be laid. The interior of the depot will be completed in a few days, and the company will then take up its quarters there. The depot is modern in every respect.

Speaking of the work of the Oregon Securities Co.'s mines, Mr. Pearson, who visited the district last week states that the work is going on as rapidly as could be expected. Concentration of machinery at the head of Champion canyon is being effected in a satisfactory manner, and work is going on with all possible dispatch on the big tunnel connecting the Musick with the Champion. The new road now completed up Champion canyon is very satisfactory to Mr. Pearson, and it will take a comparatively easy haul for machinery, and its tendency to lessen freight rates to miners, notwithstanding that the haul by rail can only be made to the red bridge, is already marked and commented on.

At the Musick the company is still driving on the rich ore in tunnels Nos. 2 and 4, and it is estimated that the company will break through on the east side of the mountain on level No. 2 in about 135 feet more driving. The water power machinery which will be installed above the Warehouse will arrive this week from San Francisco. The company's saw mill which has been set up just below the Warehouse for the purpose of sawing the flume lumber, is now ready to run and only awaits an order to that effect from the department of the interior. A force of men are already at work drilling post holes and setting the posts for the electric line up the Champion creek road, and the heavy timbers for the flume are being gotten out.

MOVING PICTURE MACHINE.

The Lebanon Express-Advance has the following to say concerning the moving picture entertainment to show in Cottage Grove on the evening of Aug. 5.

The Edison Moving Picture and Illustrated Song Co., under the management of J. W. Cook, gave an exhibition in this city Tuesday evening. A large audience was present and they were well entertained for two hours. The company have one of Edison's latest moving picture machines and it does splendid work, reproducing scenes of activity with life-like exactness. Each of several pictures that were shown was alone worth the price of admission. This was Mr. Cook's fourth visit to this place and he has drawn full houses on each occasion. Will be at Cottage Grove Aug. 5.

IMPROVEMENTS AT FAIR GROUNDS.

The State Board of Agriculture are making a number of needed improvements at the state fair grounds this year. A new water system costing \$5000 is being put in which will add much comfort to the exhibitors and campers. More new stalls are being built to better accommodate the large number of exhibitors that are preparing to come to the fair. A large amphitheater is being built, where visitors can be seated and witness the live stock judging under cover. Many minor improvements are being made on the grounds, and everything is being done to make a visit to the fair a pleasant event and a joy forever.

STOLE NUGGETS.

Last Thursday night some one with a passion for gold nuggets, not his own, broke a glass in the rear door of the Modern Pharmacy drug store on Main street and started on a crawl through the store. When Doc Patterson arrived at the store in the morning, he discovered the cash register open, but as the usual amount of small change was not disturbed through nothing of it until he passed into the office room, when he found the back door ajar, and a glass broken. Doc got it into his head that there had been something "doing." He called Mr. Griggs, the proprietor, who was about to set down to his breakfast, and told him of the conditions. A hasty examination revealed nothing startling, and Mr. Griggs, feeling the juncture of danger, took a turn to his boarding house. After breakfast and a general round up of the store, and many speculations why the house breaker did not empty the till after opening it, it suddenly dawned upon Mr. Griggs that he had forgotten to take the nuggets, belonging to James Jennings, which had been on exhibition in the show windows for some time, out of the window the night before and deposit them in the customary depository. Going to the window the handsome nuggets were no where to be found. On the window curtains were found spots of blood which indicated that the thief had run his hand when he broke the glass in the back door and reached in to turn the key in the lock. The nuggets, however, were gone and the thief (this far in the game) has not been apprehended. The nuggets contained between \$99 and \$200 in gold, and Mr. Griggs, the proprietor of the Modern Pharmacy, being somewhat fond of gold nuggets, anyway, immediately purchased them from Mr. Jennings.

WEEKLY CROP REPORT.

The weather during the past week has been excellent for haying and for maturing grain. Haying has been pushed in all parts of the state, and the crop is of good quality and the yields are unusually satisfactory, except in the southern sections, where previous dry weather caused some shortages, which has been made up by cutting grain for hay; consequently, the farmers will have feed enough for stock, but grain yields in this locality will show a still greater reduction from former estimates. Spring and fall wheat continue to fill and ripen nicely; the heads are full and the berry is plump, and if it were not for the stand being thin the crop would be up to the average. Harvesting will become general this week. Oats are unusually promising in all sections, except about Cottage Grove, in Lane county, where for some unknown cause a number of fields have stopped filling and the plant has suddenly turned a light color. Full reports from the hop sections indicate a fairly good crop, which, taking into consideration the increased acreage, will fall but slightly below that of last year. There are many stunted hills, probably caused by frost in March, but those that come up are in as thrifty and promising condition as could be wished for. Minor crops, such as corn, potatoes, onions, sugar beets and garden, are doing nicely. Fruit also continues promising, and a large crop of peaches and plums is now almost a certainty.

GRIFFIN BODY FOUND.

Last Sunday morning some little boys playing in the neighborhood of the Eugene saw mill, near the river bridge on the Coburg road, discovered the body of Chas. Griffin, who had been missing from his home in Eugene since the Monday before. The body was lodged against a cable and it is supposed that it was floated the day before when heavy charges of dynamite were used, in the hopes of dislodging the body. When last seen Mr. Griffin was sleeping under a tree near the swimming pool, and owing to the fact that he had been for some time addicted to morphine, and that an empty bottle was found on his person, it was thought that he had administered the deadly drug while suffering extreme pain from his rheumatism, and had fallen into a deep slumber. When he awoke in the middle of the night it is presumed that he misdirected his steps and fell into the river. Deceased was a member of the Knights of Pythias and of the Elks, and was buried under the direction of the last named body. Charley was a young man of many commendable qualities and made friends wherever he went. He was a veteran of the Spanish war, and while in service contracted sciatica, which has made life a burden since his discharge and return home.

SUNRISE MINING GROUP

President E. S. Lovelace of Ft Ransom N. D., leaves for San Francisco Where he goes to purchase Machinery.

THE GOLDEN RULE IS ACTIVE

Sunrise will put in Mill—Golden Rule Will Patent—Champion Basin Looks Good

E. S. Lovelace, of Fort Ransom, N. D., who is principal owner of the Sunrise Mining Company, owning nine claims, the Sunrise, May, Homestake, Dakota, Winchester, Camp, Boomer and Giant, returned to this city last week, after an inspection of the property, well pleased with the condition in which he found his mine and the district generally. Mr. Lovelace's property is located on Adams mountain, and is conveniently reached by way of the Warehouse. The company has gone to considerable expense the last year in constructing a private wagon road from the Champion canyon road from a point about one and one-half miles above the Warehouse to the mill site. The road is one of the best the writer, who accompanied Mr. Lovelace last week, has ever been over. The grade is less than eight per cent, and very little rock was encountered. This road is now nearly completed there being about a half mile on the Warehouse end yet to finish, and then a few finishing touches at different points to the mill site. The Sunrise has about 3000 feet of development work done, which has uncovered some excellent free milling ore in large quantities, as well as showing up some very rich base ore. Splendid trails have been built, the mill site has been cleared and general preparations for the installation of a reduction plant have been commenced. A fine cabin has been erected and the property is supplied with a well equipped blacksmith shop and necessary mining tools. Mr. Lovelace left here last Saturday for San Francisco, where he will make diligent inquiry as to the best kind of reduction plant, and it is more than likely that the erection of a mill of the most modern type will be taken up this summer. He is also at the present time perfecting his arrangements for the installation of a 3000 foot tram from the upper works to the mill site. Mr. Lovelace states that the company has now sufficient free milling ore of high grade on the dump to pay for the proposed improvements, and is of the opinion that it is high time to place his

property on a milling basis. The assays from the different ledges on this property are very flattering, running from \$4.88 to \$108.65, from samples across the ledges, while one picked sample, which was taken more from curiosity than otherwise, gave a return of \$307.06 per ton. The officers of the Sunrise Mining Co. are: Officers, E. S. Lovelace, pres. and treas.; N. G. Eggen, vice pres.; R. S. Adams, sec.; J. B. Eggen, asst. sec. Directors, E. S. Lovelace, B. Holm, J. E. Ostrander, J. B. Eggen, W. D. Sweet, Mayor, Fargo, N. D.

Golden Rule.

C. L. Johnson, secretary of the Golden Rule Mining Co., with head office at Salem, Oregon, arrived in the city last Monday evening en route to the company's property in Bohemia. Mr. Johnson is highly pleased with the affairs of his company, and states that development with the view of securing a patent, is going rapidly on. The company is making considerable external improvements this year as well. The Benson hotel, which is owned by the company has been refurnished inside and out and new furniture added, while the new store building which will be under the management of Doc LeRoy, is now nearly completed. A fine new barn has also been erected. The annual development work on the lower claims has been done, and now the company will direct its attention to its upper claims where active work will be done from now on. The company's first object is to secure a patent to its groups, and then, probably next year a reduction plant for the treatment of its ores will be placed.

Champion Basin.

W. W. Masterson is down from the Champion Basin Mining Co. and reports having driven fifty feet on a vein of splendid free milling ore. The company is well pleased with the prospects now confronting it and probably will take steps this fall to place a mill upon the ground. The property consists of three claims, and is located directly on the new road built by the Oregon Securities Co., and therefore is one of the most admirably located properties in the district.

W. W. Cochran spent the latter part of last week in this city, returning Monday to his mining property in Bohemia. Mr. Cochran has some good property in the district.

NO PITY SHOWN.

"For years fate was after me continuously" writes F. A. Gullidge Verbena, Ala. "I had a terrible case of Piles causing 24 tumors. When all failed Bucklen's Arnica Salve cured me. Equally good for Burns and all aches and pains. Only 25c at Morgan & Brelant's Drug Store."

TEN DOLLARS FREE

Advertising Space to this Amount Will be Given to the Merchant Composing the Best Ad. During the Month of August.

TO BE PUBLISHED IN BOHEMIA NUGGET

This paper will give to the merchant writing and publishing in Bohemia Nugget during the month of August the best composed advertisement ten dollars worth of free advertising. Merchants entering the contest must carry advertising during the entire month beginning with the issue of August 7th. We will make no difference as to the amount of space used by any merchant as we charge the same rate to all whether the advertisement is large or small. This contest will be decided by the readers of the Nugget. A voting coupon will be published in the paper and each subscriber or some member of the subscriber's family will be entitled to one vote each week—voting for the merchant whose ad they consider the best composed—the most convincing as to why buyers should patronize their store. Besides the ten dollars worth of advertising given to the merchant we will also give a present of \$5 worth of goods to the voters in this contest. To the lady who voting in this contest writes the best reason for casting her vote as she does will be given \$5 worth of goods.
