A good many conscientious people, in looking about them and seeing the evil that abounds, are actuated with a sincere desire to fight these evils. The shortest way, many think or rather are misled to think, is by taking recourse to law. Now, nothing is better for a nation or a community than are good, wise laws and the proper observance of the same. But before we make a subject the concern of law, it is always in place to have a clear understanding as to what are proper subjects for human legislation.

The thing, which above all others cannot and must not be controlled by human law, either directly or indirectly, is the individual conscience. The most dire calamity has always followed every attempt to harness the conscience of man.
