CHILDREN'S INSTINCTS.

Where Appetite is Concerned They Should, is a Measure, Be Respected. Many ways of infatey and childhood seem to adults unnatural; and if children chance, as they frequently do, to exhibit tendencies animal rather than esthetic, we are opt to consider them such as to be properly frowned upon Yet it might often contribute to one's equanimity if it were borne in mind that child instinct, more frequently, than reason, is in the right.

For example, the lusty fit of crying lucident to the baby's bath, although it may prove annoying to the mother, is one of the best possible tonics for the infant. The vigorous respirations and increased activity of the muscular tis-

sues conduce even more than the fric-tion of the bath towel to a healthful glow of the skin. The infant that is obstreperous enough to resent with it, until it is sgain in finniels, is not likely to take cold from its bath. Again, in the matter of eating, the child sometimes exhibits singular teudencies. From the time a child begins to come to the table until the period of

youth he often shows strong likes and dislikes. Just how much tendencies may be combated is perhaps of little moment, but in the quantity of food desired each child should be a law unto himself. To bribe or coax a child to est more than he wants is certainly not commendable. Many who, as children, are extremely "dellcate" in their enting, develop in later life digestive organs of superior ability. Overfeeding is never so fraught with

dangers as in childhood, and in those numerous cases in which the child in-

dicate that it is common to have three one other concurrent symptoms will or four hands dealt around,"-Chicago be so evident as to lead to consulta-

tion of a physician. Glowing cheeks and sturdy limbs are admirable and a delight to the fond parents, but to many children they are simply not natural, and no amount of food car produce them.

In many children nature exhibits conservative tendency, and the scraw-ny limbs and sallow cheeks may be an indication of conserved energy, by vir ue of which some organ or organs

The diseases of childhood often re-

which time and a following of the instincts of observation which nature meanwhile improves may entirely ov ercome. Thus it is that man children regarded throughout child

hood as delicate and not likely to win vive till adult life not only reach man heed and womanhood, but attain qual ities of extraordinary physical or mental vigor. It is well to realize that very rare-

'y are there two children even in the same family similar in their physical equipments, and that, therefore, no 'rule of thumb" method of rearing

them is ever eminently successful. Wanted to See Grandma. Master Ross Edwards, 4 years of sge, living in Irvington, N. J., was very fond of his grandmother, and spent most of his time at her home,

Fibroid Tumors Cured.

A distressing case of Fibroid Tumor, which baffled the skill of Boston doctors. Mrs. Hayes, of Boston, Mass., in the following letter tells how she was cured, after everything else failed, by Lydia E. Pinkham's Vegetable Compound.

Mrs. Hayes' First Letter Appealing to Mrs. Pinkham for Help:

"DEAR MRS. PINEMAS: -- I have been under Boston doctors' treat-ment for a long time without any relief. They tell me I have a fibroid tumor. I cannot sit down without great pain, and the soreness extends up my spine. I have bearing-down pains both back and front. My ab-domen is swollen, and I have had flowing spells for three years. My ap-petite is not good. I cannot walk or be on my feet for any length of time. "The symptoms of Fibroid Tumor given in your little book ao-curately describe my case, so I write to you for advice."-(Signed) Mrs. E. F. HAYES, 252 Dudley St., (Rothury) Boston, Mass.

Note the result of Mrs. Pinkham's advice-although she advised Mrs. Hayes, of Boston, to take her medicine-which she knew would help herher letter contained a mass of additional instruc-

tions as to treatment, all of which helped to bring about the happy result.

⁴ DEAR MRS. PINEHAM: - Sometime ago I wrote to you describ-ing my symptoms and asked your advice. You replied, and I followed all your directions carefully, and to-day I am a well woman. "The use of Lydia E. Pinkham's Vegetable Compound entirely

expelled the tumor and strengthened my whole system. I can walk " Lydia E. Pinkham's Vegetable Compound is worth five dol-

lars a drop. I advise all women who are afflicted with tumors or female trouble of any kind to give it a faithful trial."—(Signed) Mna. E. F. HAYES, 252 Dudley St., (Roxbury) Boston, Mass.

Mountains of gold could not purchase such testimony -or take the place of the health and happiness which Lydia E. Pinkham's Vegetable Compound brought to Mrs. Hayes.

Such testimony should be accepted by all women as convincing evidence that Lydia E. Pinkham's Vegetable Compound stands without a peer as a remedy for all the distressing ills of women; all ovarian troubles; tumors; inflammations; ulceration, falling and dis-placements of the womb; backache; irregular, suppressed or painful menstruation. Surely the volume and character of the testimonial let-ters we are daily printing in the newspapers can leave no room for doubt. Mrs. Hayes at her above address will gladly answer any letters which sick women may write for fuller information about her illness. Her gratitude to Mrs. Pinkham and Lydia E. Pinkham's Vegetable Compound is so genuine and heartfelt that she thinks no trouble is too great for her to take in return for her health and happiness. Truly is it said that it is Lydia E. Pinkham's Vegetable Com-Such testimony should be accepted by all women as convincing

The Innocent With The Guilty

The world to-day is full of innocent sufferers from that most loathsom The world to day is full of innocent superior from that most joansome disease. Contagious Blood Poison. People know in a general way that it is a bad disease, but if all its horrors could be brought before them they would shun it as they do the Leprosy. Not only the person who contracts it suffers, but the awful taint is transmitted to children, and the fearful sores and eruptions, weak eyes, Catarrh, and other evidences of poisoned blood show these little innocents are suffering the awful consequences of some baddee in . Ca bloch contarious is this form of blood poison that one may body's sin. So highly contagious is this form of blood poison that one may be contaminated by handling the clothing or other articles in use by a person afflicted with this miserable disease. There is danger even in drinkfrom the same vessel or cating out of the same tableware, as many pure and innocent men and women have found to their sorrow. The virus of

and innocent men and women have found to their sorrow. The virus of Contagious Blood Poison is so powerful and penetrating that within a short time after the first little sore appears the whole system is infected and every drop of blood in the body is tainted with the poison, and the

skin is soon covered with a red rash, ulcers break out in the mouth and throat, swellings appear in the groins, the hair and eyebrows fall out, and unless the ravages of the disease are checked at this stage, more violent and dangerous symptoms appear in the form of deep and offensive sores, copper colored splotches, terrible pains in bones and muscles, and

general breaking down of the system. S. S. S. is a specific for Contagious Blood Poison and the only remedy that antidotes this peculiar virus and makes a radical and complete cure of the disease. Mercury and Potash hold it in check so long as the system is under their influence, but when the medicine is left off the poison breaks out str?" again as bad or worse than ever. Besides, the use of these minerals bring on Rheumatism and stomach troubles of the worst kind, and frequently pro-duce bleeding and sponginess of the gums and decay of the teeth. S. S. S. cures Blood Poison in all stages and even reaches down to hereditary taints

and removes all traces of the poison and saves the victim from the pitiable consequences of this monster scourge. As long as a drop of the virus is left in the blood it is liable to break out, and there is danger of transmitting the disease to others. quences of this monster see can be taken without any injurious effects to health, and an experience of

nearly fifty years proves beyond doubt that it cures Contagious Blood Poison completely and permanently. Write for our "Home Treatment Book," which describes fully the different stages and symptoms of the disease,
