

DOINGS UP THE LINE.

Ballasting going steadily on the O. & S. E.—Yards greatly improved—Bridge soon to be built.

VALUABLE WORK.
Being Done by Long & Bingham Lumber Co.—Increase of Mill Capacity—Additional Territory Acquired.

There is something doing every minute on the O. & S. E. these days. The new gravel bed has been thoroughly opened up, and hundreds of car loads of the finest kind of gravel has already been dumped on the roadbed and is now practically in place. The road is now all ballasted with the exception of about one mile between this city and Mosby Creek bridge and a quarter of a mile on the other end. The yards in this city have received splendid treatment, the grade having been raised to a level with that established by the Southern Pacific and the tracks are now being rapidly ballasted to that grade. Last year the yards were in a very unsatisfactory condition, owing to the looseness of the tracks. This has now been overcome, and both railroads are making proper arrangements for drainage. At the new bridge site across Row river, work is going on in good shape the false work is up and the main cords of the bridge are in place. As fast as material can be secured the bridge will be completed. As soon as this is done, track laying will again be commenced on the grade already completed on the other side. It now looks as though the heavy work will all be comfortably taken care of before severe weather. The O. & S. E. Co. is also taking much pains in putting the wagon crossings in good shape.

LONG & BINGHAM LUMBER CO.
There is a spirit of hustle and bustle at the grounds of the Long & Bingham Lumber Co. in this city. For some time, owing to the shortage in cars for shipping, the mill has not been running steadily, but no time has been lost to the company. New territory to the east of the mill was secured, the grounds cleared and the erection of a dryer 20x88 feet in the clear was commenced. The frame work for this building is now up and the receiving and delivery decks are rapidly being completed. In connection with these improvements, the company will also increase the capacity of the mill to 50 or 60 thousand. The company will also install a track to the east of the new dry kiln connecting with the O. & S. E., which will place their grounds in the best of working advantage. Drain ditches are also being dug and flumed which will connect with the drain work of the O. & S. E. and Southern Pacific. The management will this week commence running the mill again on regular time and it is expected that the new machinery, among which is one 100 horse engine and two 300 horse boilers, will be in working position some time in December.

A TRIP TO BOHEMIA.

Continued from First Page

as mammillary incrustations, or they have been partially filled with very finely crystallized iron pyrites which look like a mass of semicircular concentrates dropped in and dried out. Slaty looking fragments occur, pale yellow or white in color, but these may be derived from the thin bedded material previously described and probably talc. On one or other wall there is often an accumulation of quartz, which at one time evidently carried considerable iron pyrites, but is now thoroughly carious and oxidized. This type carries free gold and hitherto has furnished the bullion of the camp, and not infrequently is present to a considerable thickness, and to date has been found to a depth of 400 feet. Such ore occurs at the 4000 foot horizon in the Hiawatha gulch, or 1200 feet below the Musick tunnel, and in the same gulch the similar ore are found as low down as 3500 feet. At the 4000 foot horizons in the Champion gulch we find, so far as I know, only sulphuretted ore. Since the formation of the veins there has evidently been considerable motion for the talcose walls show both vertical and horizontal slickensides, so that the question of permanence in depth and the presence of ore for some 2500 feet at least, seems to be assured.

As an illustration of continuity in length, the two following examples may be quoted. They include only a small fraction of the camp, but happen to be the only ones with which I became familiar. With more time it would be possible to trace out many others, but there is no good map of the district, on which to call for assistance. Starting at the lowest point examined, the following claims occur in the sequence named and probably on the same zone. Helvetia, Hiawatha, Ajax, Stocks & Harlow, Veavrus, Amocanda, ———, Broadway, Champion, Knott; on the second series to the south, and diverging slightly going east, we have the Helvetia, U. S. A., Fracton, Jones, Musick and Royal group. From enquiry, I learned that the

railroad rates on concentrates from the mines to Cottage Grove would be about \$3 to \$4 per ton, so that by opening the mines on the western slopes at low altitude, it looks as though the drawbacks which have hitherto beset the district are likely to be overcome in the near future.

MARRIED.

EBY-SHULL.—In the city of Portland, Oct. 28, 1903, at 3 p. m., Rev. W. B. Hollingshead officiating, Mr. G. Eby, of this city, and Miss Tola Shull, of Portland. The groom is the well known attorney who located in Cottage Grove in May, 1900, and who was associated with Attorney C. Johnson in the practice of his profession. Mr. Eby was in the city this week making his library and other effects preparatory to taking up his permanent residence in Portland, where he will engage in the practice of his profession, making a specialty of mining law, having established offices at 223, Chamber of Commerce building. During his residence here he has been a foremost worker in mining enterprises, and is a gentleman of much public spirit and enterprise. He is a lawyer of exceptional ability and his name will be speedily added to the list of bright legal lights in the metropolis. The Nugget extends congratulations and wishes Mr. and Mrs. Eby a happy life. His son Earl accompanies him to the new home in Portland.

QUESTION ANSWERED.

Yes, August Flower still has the largest sale of any medicine in the civilized world. Your mothers' and grandmothers' never thought of using anything else for indigestion or biliousness, Dizziness, headache, and they seldom heard of Appendicitis, Nervous Prostration or Heart failure etc. They used August Flower to clean out the system and stop fermentation of undigested food, regulate the action of the liver, stimulate the nervous and organic action of the system, and that is all they took when feeling dull and bad with headaches and other aches. You only need a few doses of Green's August Flower in liquid form, to make you satisfied there is nothing as serious the matter with you. You can get this reliable remedy at Garman & Heinenway Co. Price 25c and 75c.

OREGON SECURITIES.

George W. Crosby Tells What He Saw while in the District—Realizes Great Value of the Mines.

GREATLY IMPRESSED.

In a recent interview, George W. Crosby, of New York, president of the O. & S. E. R'y., has the following to say regarding the Oregon Securities holdings, the O. & S. E. R'y. and the district in general:

"Went up to Cottage Grove on Thursday, and spent the afternoon looking about the depot and grounds. Next morning we started for the mines, and on the way up saw the power plant, flume and dam. We arrived at the mines on Saturday morning; after looking the new mill over, we inspected the Champion and the Broadway, and from there went through the Musick. I stayed with Supt. Mattheus over night and returned to Cottage Grove on Sunday morning. The weather could not have been finer than it was while I was there.

"Regarding the improvements, would say that they are very extensive and substantial, and will result in great profit to the Company. Eastern people have no realization of the great value of these mines. We certainly have a prize, and in less than two years the stock of the Oregon Securities Company will be worth par or more.

"I think the railroad is working itself out nicely. Manager Pearson and Engineer Wood are two invaluable men in the management of the road, and there is no question as to its success under their care. As I had walked myself lame, I gave up the journey over the hills to see the timber, but was greatly impressed with what I saw of it along the road.

"I had a long talk with Mr. Alexander, of the Pacific Timber Co., who seems to be well posted on timber matters. I also had an interview with Judge Ryan, of Oregon City, who knows all about that country, its timber resources, mines, etc.

"I was treated royally by the people out there and enjoyed the visit very much."

AT THE CRYSTAL.

Activity is the Word—A Large Force of Men Employed—Preparations For the Twenty Stamp Mill Almost Completed.

NEW ROAD FINISHED.

Advices from the Crystl Consolidated Mining Co. are to the effect that the saw mill recently installed is now running on full time saving out bills of lumber for the mill building, new bunk and cook house, office and assay office.

The underground work for the time being has been suspended and the force put on the outside work, with the view of rushing the mill to completion as early a date as possible. The grounds for the new mill are being cleared and terraced, and the foundation made with all speed. The mill machinery arrived at the depot in this city Tuesday and Wednesday was transferred to the O. & S. E. line, and is now at the Red Bridge depot awaiting the teams of the Pitcher Bros., who have been engaged to convey the heavy machinery to the mine. The mill when completed, which will be at the earliest possible date, will have a capacity of 25 tons per day. The haul at this season of the year is more or less slow and burdensome, but when compared with what it was in former years it is an easy task. The machinery will be taken in over the new Champion canyon road to the head of the canyon and then up the new Crystal road, which has just been completed, to the site. Altogether twenty-five men are now employed at the mill and as fast as they can be worked to advantage the force will be increased. Owing to the weather conditions always to be taken into account at this season of the year, Manager Lloyd can not state positively when the mill will be ready for operation, but not a day will be lost in an effort to have it pounding rock at the earliest moment. Many tons of rich ore are in readiness for treatment.

A BACHELOR'S HONEYMOON.
Last Friday night the Clement-Keeley Dramatic Co. presented to the public for the first time the clever little farce comedy "A Bachelor's Honeymoon." The players were greeted with a crowded house and every minute of the time was enjoyed by the audience. The play was clean, well acted and full of laughable news from start to finish. Particular credit is due Clifton E. Lloyd, the leading man of the company. Mr. Lloyd is certainly a finished actor and is well on the pathway to stardom. The company as a whole is well balanced and has few equals on the coast. C. B. Clement, the manager, is certainly to be congratulated on his cast and "A Bachelor's Honeymoon" can be cited as a criterion by which the other plays reproduced by the company may be judged. The Clement-Keeley Co. will meet with financial success, and can play returns as often as profitable.

PURCHASED PROPERTY

Phillip Hohl Purchases the Interest of Chapman and Son in the Hohl, Chapman and Sons Lumber Co. at Divide.

MAIN OFFICES HERE

"This week Phillip Hohl, the senior member of the firm of Hohl, Chapman & Son Lumber Co., with mill at Divide, four miles north of this city, absorbed the interest of his partners and is now sole owner of the stock. The main office will be in this city, occupying rooms at the Hohl Block, north of the First National Bank. Under the new management Chas. Mosher has been installed manager of the mill and that gentleman has already taken up his duties. At present the mill is 20,000 capacity, but Mr. Hohl expects to add sufficient power and saws to make it 35,000 capacity in the spring. At present the mill is paying particular attention to the local trade, and to heavy timbers and railroads. In conversation with Mr. Hohl he said to a Nugget man: "I feel confident of success. We have a good class of timber behind us, and there is no reason why we should fail. I took hold of this proposition for the benefit of myself and the community at large, and I would like to have the public take sufficient interest in an enterprise that employs from twenty to thirty men, with a daily payroll of \$80 and upwards, to give me a share of its patronage, and I feel, by present indications in the matter of orders already placed with us, that they will do so."
