MINING EXCHANGES.

From our exchanges it is learned the various mining stock ex-changes, operated in different cities are being revived and a great amount of interest is being mantfested by the investing public.

It would seem that Portland is well located for an Exchange, there size and allowed to cool. Later are many stocks which might be dealt in if properly placed before pleted, they should be reheated to redness and then quickly plunged Stock Exchange already organized and in running order could easily be brought up to an interesting and also be drawn by first plunging the profitable position. IT IS A NATTER OF HEALTH

A Free-Trade Hallucination, nights

There is a Free-Trade hallucinaof foreign trade and that they seek to rear a Tariff wall which will exclude all foreign goods from their country. But when they begin to examine the American Tariff they will discover that out of a total importation of \$1.025 751,438 in 1903. goods to the value of \$425,181,9 were admitted free of duty. This means that proper discrimination was shown and that the framers of the Dingley Tariff did not make the blunder of making difficult the importation of those things which we cannot ourselves profitably produce. If Great Britain works along these lines no other country will have occasion to find fault with her and none will be likely to do so. It is only the silly Free Trader who commits the absurdity of contending that it is wise and economical for people to buy from others that which they may with ease produce for themselves. Sensible men take the other tack and plant themselves on the proposition that the proper thing for a country to do is to utilize its resources -San Francisco Cascade Camp No. 66. Meets "Chronicle".
