Regarding Misquotations.

One of the rules that even young retters and readers should bear in aind is this: "Verify your quotations." The harples of the shore shall pluck And, if possible, go to the original source rather than to rely on other auhority. The reason for the rule is O, better that her shattered hulk thority. The reason for the rule is easy to see. Usually a quotation be comes popular because it is worth while and to misming is often to loss. while, and to misquote is often to lose the value of the words. Thus people fren sny, "A little knowledge is a dangerous thing." But that is not true. All knowledge is worth having, even s little. They mean "half-knowledge." or incorrect knowledge, which is not really knowledge at all. What Pope wrote was: "A little learning is a dingerous thing," and what he meant was that a little learning makes one presumptuous, while thorough learning gives humility-an idea likewise set orth in the saying that wisdom begins with the feeling that one is ignorant. So, verify your quotations for fear on may put into currency a counterfeit note.

At the same time it is to be rememare that some few quotations have ered that some few quotations have ered inproved by changes introduced that seems to show any particular enupovements are rare, however, and it
