Kruger, ex-champion long maturity in the early summer. This is true of rye, some varieties of wheat and some of the grasses.

An important class of pastures, especially where land is relatively valuable and a more intensive system of agri-culture is employed, is that of temporary or annual pastures. Temporary pastures are used for two purposes (1) To extend the pasture senson over a greater portion of the year than can

be done with ordinary permanent pas-ture. For this purpose wheat or ryc Newport on Yaquina Bay is the ideal seasile resort of the North Pa-cific Coast. Round trip thekets at greatly reduced rates on sale from all Southern Pacific points in Ore-gon, on and after June 1st. Ask Agents for further information and a handword: Unstructed convente gives early and late pasture, and cer thin summer annuals can be used to supplement the permanent pastures during the dry summer season, which usually occurs in July or August (2) By successive sowing of the proper plants succulent feed may be provided through the season so as to yield a nandsonnely illustrated souvenir booklet, or write to Edwin Stone, $\xi \in E, R, R, Abany, Ors, or W, E. Coman, G, P. A., S, P. Co., Port$ maximum crop from each area. This is particularly applicable to dairy dis-tricts. It is often convenient and conomical in growing a succession of succelent crops to cut the green feed and supply the stock either in the permanent pasture or in the stalls or yards, as in the soiling system.

1NG. "I wish to say a few words in phrase of Chamberlain's Cole, Cholera and Diarrhoea Kemedy, "says Mrs. Mattie Barge, of Martineville, Va. "I suffered from chronic diarrhoea for ter years and during that time tried carious melli-chese without obtaining any permanent relief. Last summer one of my children was taken with cholera morebus, and procured a tottle of this remedy. Only two doses were required to give ber en-tire relief. Their desiried to try the medicine myself, and did not use all of one hottle before I was well and I have rever since been troubled with the new states of that wonderful medicine."

In dairy farming it may be solvan-SOTICE FOR PUBLICATION. incrous to adopt solling as a definite Department of the Interior. system in order to obtain a toavillui yield of succulent forage from a small

Department of the Interior. Land Office at Roseburg, Oregon, July 12, 1994. Notice is hereby given that the fol-fowing-maned settler has filed notice of his intention to make final proof in support of his chaim, and the for-said proof will be made before E. F. Lee tounty Clerk at Eugene, Oregon, on Soptember 26, 1994. Viz. William H. Griffin on his H. E. No, S861, for the NE § Sec. 54 Tp 19.8., R. I West. He names thefollowing witnesses to prove his continuous residence upon area. For this purpose it is least t plitura series of grops which will form a succession through the growing se son: Besides the small scalar and co-mentioned there are several oils plants that can be disid for solling pens, soy beans and rape. The latte is not so well adapted to milk cows. Be thinks continuous residence upon a distribution of sold land, vig: Alfalfs and clover cm bs seed, but in mad cultivation of said land, vig
