READY MADE CLOTHING
 The laying of the sewers throughout the city is progressing and it will be but a few weeks until the proper and necessary sewerage will be had. The determination of the people last Spring to have this done is highly commendable. The next important move is to enlarge the pipe line which brings the supply of water from the reservoir to the city, so that the people may all be supplied with water and ample provisions be made to protect the city from a disastrous fire.

FRIDAY, AUGUST 19, 1904.

The Denver Evening Post in a recent issue quotes Mayor Robert W. Speer on the subject of mining. The suggestion might apply equally as well to the residents of Cottage Grove. The Mayor said: "Every man in Denver should be a miner."
 "I do not mean that every man here should take a pick and a shovel or a hammer and a drill and go into the mining camps and work for a day's pay, but every man should be interested in mining according to his financial ability."
 The mayor was in earnest as he spoke, and the force of his words took hold of his hearers.
 "Not every man can own a mine," the mayor went on to say, "because if they were a mine for every man gold would be so plentiful as to be of little or no value but every man may own part of a mine or part of a prospect and can put a little—be it ever so little—into the development of the ground."
 "Denver does not mine as she should," the mayor persisted. "Of course, a lot of mining is done here and, with very few exceptions, all the big fortunes have been made in mining. Some of the shrewdest business men realized early in their career that mining has unlimited possibilities. They went at it energetically and great fortunes have resulted."
 "The mayor named a dozen such men and could have gone on indefinitely."
 "Mining is a business, not a speculation, and the element of luck, if there be such a thing as luck, does not enter into it to any greater or less degree than in any other legitimate business, and the man who puts his brain and energy to mining will succeed. When we reflect on the interesting fact that after fifty years of uninterrupted mining in Colorado new ore shoots are still being discovered in Russell gulch, where the first gold was found, we are bound to conclude that mining is just in its infancy."
 "I do not mean to encourage indiscriminate mining, and the huncus stock broker should be given the cold shoulder, but there are many ways that a man can invest a little or a big sum in prospecting or mining where he can see that it is honestly spent."
 "Mining is the greatest business on earth, and every dollar that comes out of a mine helps everybody. It is the cleanest money that can be made, if we include the returns from the soil. No one lost that you might gain."

On last Saturday Mr. Ed G. Reinert, general manager of the Daily Mining Record of Denver, and the Nugget man drove up the Coast Fork of the Willamette river.
 We arrived at the Oregon Mineral Springs for dinner and after drinking a sufficient amount of the carbonated water and partaking of a dinner prepared by Mrs. James Hart, who is now in charge of the culinary department, continued the journey some miles above. A couple of hours were spent in fishing. At night accommodations were secured at Wm Witte's farm. Just why so pleasant a gentlemen with such a fine farm well stocked with cattle, some 50 Angora goats and good buildings, has been allowed to remain a bachelor was not learned.
 In the morning the drive was continued to Lane Shortridge's home, where the road ends, here the horses were cared for, a supply of grasshoppers secured and the journey farther up the stream resumed where it was said many trout did dwell. This was the canon down which Fred Wertz was brought a few weeks ago by his friends after having accidentally shot himself and who died on the way. What that journey of miles meant through such a country can only be appreciated by a trip over the route. With a fairly good catch of trout in the baskets, the return home began. A good supper at the Springs, the twelve mile drive was soon made to Cottage Grove.
 Mr. Reinert was much pleased

with the country visited. On Monday morning he left for Bohemia where he will examine the mines of the district and probably have something to say concerning them in his paper in the near future. He will attend the Mining Congress to be held next week in Portland.

The foregoing article was published last week, but as there has been a call for extra copies which were unable to supply, it is reprinted in this number.
 To the Nugget—
 The Bohemia mining district of central Oregon (known and worked in a desultory and spasmodic manner for many years) is now attracting the attention of the mining public, not those who mine the public but the energetic, practical investors who run tunnels, sink shafts, build mills and run them for the profit gained from the production of precious metals.
 This district is situated partly in Lane and partly in Douglas counties in the Calapoia Mountains, which form the divide between the Umpqua and the Willamette rivers and is one of the numerous ranges forming the inter-mountain country of Western Oregon, connecting the Cascade and Coast range.
 The district centers about the three peaks of Bohemia, Fairview and Grouse mountains. A gigantic uplift or overflow of Andesitic rocks, but good finds are being made as far south as the Umpqua river and there is a continuous belt of mineral as far as Blue river, forty miles to the north.
 What has attracted the greater attention, however, is the field on and about the three peaks heretofore mentioned where veins of from four feet to thirty and forty feet wide are exposed and have produced some fabulously rich ore from shallow workings.
 These veins are true fissures, most of them lying along dykes of trachyte, diorite and diabase, and can be traced for miles across the mountains and there can be no question of their permanency in depth.
 The ores are complex in their character, and are a replacement of the dyke material forming the original fissure, it being very easy to trace the transition from original rock to the silicious oxides and sulphides of iron, copper, zinc and which carry the gold and silver values.
 In many places on the surface the ores are very thoroughly oxidized and the gold is free milling, being easily saved by amalgamation, but the chief value will be found in the sulphides as depth is attained and concentration, with a subsequent treatment of sulphides, according to their physical and chemical properties, will be the metallurgical problem. This will not be difficult to solve, as part of the mines have copper as a base for smelting, others have lead, copper and zinc as a base, which can be worked in a lead furnace, after magnetic separation, giving as a by-product a clean, high-grade zinc concentrate, which metal is becoming more valuable as the years roll by. Still another part of the veins are comparatively free from either copper, zinc or lead, and such concentrates can be treated by chlorination or cyanidation, after roasting, as they consist of iron sulphide.
 The topographical features are of the best for easy and economical mining, the mountains are high and steep and the mines can all be worked through tunnels to a depth of from one thousand to three thousand feet and that by comparatively short tunnels.
 The district is well watered, large streams flow south, west and north which carry sufficient volume of water to furnish a surplus of electrical power easily transmitted where wanted; while near the mines there is sufficient water to supply mills of any size.
 One feature that plays an important part in mining is the timber used in mines, mills, and for fuel and here is to be found such an abundance of it that the supply can never be exhausted, and the quality is of the very best, consisting as it does of red, yellow and white fir, sugar pine, cedar, larch and hemlock. There are single acres that will cut 300,000 feet of good lumber, and, as an example, at the Vesuvius mine a saw-mill set at the mill site has cut enough lumber to

with the country visited. On Monday morning he left for Bohemia where he will examine the mines of the district and probably have something to say concerning them in his paper in the near future. He will attend the Mining Congress to be held next week in Portland.

The laying of the sewers throughout the city is progressing and it will be but a few weeks until the proper and necessary sewerage will be had. The determination of the people last Spring to have this done is highly commendable. The next important move is to enlarge the pipe line which brings the supply of water from the reservoir to the city, so that the people may all be supplied with water and ample provisions be made to protect the city from a disastrous fire.

SEES A GOOD FUTURE
 What a Mining and Milling Man of Experience Thinks of Bohemia.

erect a ten-stamp mill and yet has not used more than one half the logs that are actually in the way of the mill.
 Geographically the district has many advantages, being only thirty five miles from the Southern Pacific Railroad at Cottage Grove and half of this distance is now covered by the O. & S. E. R. R., from that point, and is only two hundred miles from deep sea transportation which ensures cheap supplies, and transportation of product.
 There are many promising mines in the district. The Helena and Musick owned by the Oregon Securities Company have produced well. The Golden Slipper owned by Eugene and Cottage Grove people shows well as development progresses.
 The Riverside Group owned by the Riverside Mining and Milling Company, F. J. Hard, manager, is showing large bodies of fine milling ore, and will soon be among the producers.
 The LeRoy group on Champion creek has a large amount of development.
 The Crystal is another promising property with stamp-mill about ready to run.
 The Glenwood group below the Vesuvius is among the promising prospects and the Baltimore group on Sharp's creek is showing well.
 The Oregon-Colorado group owned by a company of that name and the Vesuvius group owned by the Vesuvius Gold Mining Company Mr. F. J. Hard, manager, are coming to the front rapidly.
 The Oregon-Colorado is a copper mine with good values in gold and silver. The vein is opened by two tunnels. The upper tunnel is 450 feet long and attains a depth of four hundred feet from the surface and shows from four feet to fifteen feet of ore, assaying from 3 per cent to 7 per cent copper and is adapted to concentration.
 The lower tunnel has a length of eight hundred feet, and nearly all in fine ore, and there are several hundred tons on the dump ready for the mill.
 This tunnel attains a depth of over nine hundred feet from the apex of the vein, at which depth the ore is from two feet to twenty feet wide and will concentrate about six to one making from \$75 \$100 concentrates.
 A wagon road has just been completed to this property and a short time will see one of the finest reduction plants in the state in active operation.
 The Vesuvius is one of the best free milling and concentrating mines in the district, and is opened by two tunnels three hundred and fifty feet apart vertically, connected by an upraise, from which some drifting has been done, disclosing large bodies of good milling ore.
 No. two level is in on the vein 765 feet and discloses continuous ore of good grade from two feet to nine feet wide.
 Another tunnel, partly a cross-cut is being driven about one thousand feet lower than No. 2, and will soon reach the vein, but in the upper workings there is enough ore in sight to keep the ten-stamp mill at work for years.
 A new stamp-mill is about com-

pleted on this mine which will be a model in every respect and under the able and careful management of Mr. Hard a glorious future is promised to the fortunate owners.
 W. W. HOOPER.

The Expert and His "Ites."
 I am a bold and valiant knight
 Of mineralogy,
 I am especially bright
 In Adamite and Alkinitite,
 And rhombite and anovite;
 And if I happen to be right,
 I have considerable light
 On Azurite and malachite,
 And apatite and albionite.
 Now when it comes to castillite,
 And chalcocite and buedenite,
 I'd rather buck an Israelite,
 Or Dowdelle or Campbellite,
 And then I do not mind the sight
 Of Cuperite and Cubanite,
 And energetite and eucandrite.
 Within my eyes a happy light
 Shines forth by day, also by night.
 The while I think of Londonite,
 And nantokite and "mixite."
 And then with all my mortal might
 My aspirations take a flight,
 And from a most tremendous height
 I am confronted with the sight
 Of acrochroite and moseonite,
 Careering through the gloom of night
 While sturdruffite and spangolite,
 And tallingite and tenorite,
 And whitite and ankerite,
 And sinkavite and forbesite,
 And tryolite and valalrite,
 And stibnite and stibnite,
 Are sailing higher than a kite.
 I say, ain't this a holy sight?
 —Mescal.
 In the Tombstone Prospector.

Oregon State Fair PROGRAM.
 MONDAY, SEPT. 12—Opening Day. In the evening addresses will be made by prominent men of the State on up to date topics.
 TUESDAY, SEPT. 13—Woodman of the World Day. This entire day will be devoted to the Woodmen and their sister order the Ladies of Woodcraft in their drills and sports. It is expected that at least a dozen Drill Teams will be present in Uniform to contest for the \$500 in prizes.
 WEDNESDAY, SEPT. 14—Salem Day. This will be a great day for Salem. Business is practically suspended and everybody goes to the Fair. This will also be the day for the Greater Salem Stake, a \$2000 purse for 216 pacers in which there are 31 entries.
 THURSDAY, SEPT. 15—Portland Day. Usually the biggest day of the Fair as the S. P. R. R. runs an Excursion from Portland and \$1.50 pays a round trip and admission to everything on the Fair Grounds that the Board has anything to do with. On this day will come off the Lewis and Clark Stake for \$2000 purse for 217 trotters.
 FRIDAY, SEPT. 16—Children's Day. When all the children in Marion county, including the Indian Training School at Chenawee, the Reform School and school children, will be admitted free.
 SATURDAY, SEPT. 17—Closing Day. The Rural Spirit Stake \$1000 purse for 211 trotters; also the consolation race in Lewis and Clark Stake will be run off. Premiums will be paid in the evening a good program will be on in the pavillion.
 McElroy's Band, of Salem, has been engaged and good music is assured.
 The Evening Entertainment during the week will be the best money can purchase and a good time is guaranteed all who may attend.

TAKEN WITH CRAMPS.
 Wm. Kiemer, a member of the bridge gang working near Littleport was taken suddenly ill Thursday night with cramps and a kind of cholera. His case was so severe that he had to leave the members of the crew wait upon him and Mr. Gifford was called and consulted. He told him he had a medicine in the form of Chamberlain's Colic, Cholera and Diarrhoea Remedy that he thought would help him out and accordingly several doses were administered with the result that the fellow was able to be around next day. The incident speaks quite highly of Mr. Gifford's medicines.
 —Elkader, Iowa, Argus.
 This remedy never fails. Keep it in your home, it may save life. For sale by the New Era drug store.

SUICIDE PREVENTED.
 The startling announcement that a preventive of suicide had been discovered will interest many. A run down system or dependency invariably precede suicide and something has been found that will prevent that condition which makes suicide likely. At the first thought of self destruction take Electric Bitters. It being a great tonic and nerve will strengthen the nerves and build up the system. It's also a great Stomach, Liver and Kidney regulator. Only 50c. Satisfaction guaranteed by Morgan & Brehaut Druggists.

SICK HEADACHE.
 For several years my wife was troubled with what physicians called sick headache of a very severe character. She consulted with several eminent physicians and at a great expense, only to grow sicker until she was unable to do any kind of work. About a year ago she began taking Chamberlain's Stomach and Liver Tablets and today weighs more than she ever did before and is real well," says Mr. Geo. E. Wright of New London, New York. For sale by New Era Drug Store.
