If won out to Relateration to visit a friend. He found the young man in the barn about to begin the day's miking. His friend is a civil engineer, but ir spending the summer at his country home, in Baltimore county, and dec if nights in the simple occupations of the farm. One of his hobbles is milking the rows, and he was about to hegin on a very ladylike old brindle Mr. James climbed the fence and call ed out to him.

Mr. R., the gentleman of bucolic tastes, came to meet him, and the two shook hands and chatted for a few

minutes. "Excuse me, old man," he said to Mr. James, "while I milk the cow.", "Go shead," the latter repfied. "I'd

like to watch you do iti" Thereupon Mr. R. put his stool in since, arranged his legs as long-limited milkmen have to do and proceeded. Mr. James walked to the cow's and gently stroked her neck, saying appropriate and endearing things the while. He had his pipe in his hand and held it moder the cow's nose;

She sniffed, looked about, sniffed, ed. She seemed to like it, Mr. Jam began to laugh, but in a few minutes Mr. R. got up in disgust. He said a

odor of the smoke that she forgot all about giving milk as menal.

Mr. James thought it was a joke on a suitable occasion. But the funniest part of the joke didn't seem to appeal to him so much the morning following the incident, when at breakfast coffee had to be drunk with out cream, as it did the afternoon be-

Useful Bowline. The bow and knot is one of the most pseful knots we have, and one which emparatively few can tie. It is a not sailors use constantly. The illustration will show exactly how it is tied. Lay the parts together as in the first figure, b crossing over a. Then bring a over b, bringing the end up

through the loop as in the next fig Now carry b around and under n, museling it down through the loop as in the final figure. It is impossible for this knot to slip when properly tied. It is useful to all sorts of emergencies. In a loop thus made a man can safely be hoisted to any height with no danger of the knot slipping. It is especially useful for the farmer. An animal can be led by means of it with so danger of the knots slipping and choking the animal, to matter such it may plunge or pull.—American Agriculturist.
