Clubbing Rates.

The Bohemia Nugget one year with any one of the following publications one year for amount set opposite:
Pacific Monthly \$2.00
Weekly Oregonian (Portland) \$2.50
Weekly Journal (Portland) \$2.00

WEDNESDAY, MAY 3, 1905

Shall Cottage Grove have a creamery where the great amount of butter used in the city, the mining district of Bohemia and surrounding towns, can be purchased and the money now being paid out for this commodity and sent to other sections, be kept at home and our farmers have the benefit to a great extent at least, is the question that is just now of paramount interest.

For a long time the question of the establishing a creamery here has been under consideration which has finally resulted in calling a meeting for the purpose of forming an organization that will place the affair in a more definite shape.

There have been a sufficient number of farmers to signify their willingness to supply cream to justify this movement and it is to be hoped that the meeting to be held tonight at the Commercial Club rooms will result in a permanent organization that will put a creamery into operation within the next few weeks. If anything is to be done in this direction this year, now is the time to act so the farmer can prepare for his winter's feed.

GOOD ROADS CONVENTION.

On Saturday the 13th inst there will be held in Eugene a good roads convention. Prof. Hyde of the Oregon University has been actively at work for some time in making arrangements for the meeting.

All those who can spare the time should attend the convention, especially those whose duties it is to improve the roads.

Some of the best informed gentlemen on this subject in the state will deliver addresses, besides a general discussion will occur.

For Larger Appropriation

On Friday last upon the receipt of a communication from Eugene setting forth the fact that a large number of the citizens of that place had petitioned the county court to appropriate a further sum of \$2,000 making \$2,500, in all for the purpose of making a proper display of the products of Lane county and requesting similar action to be taken in this city, the following resolution was passed:

COTTAGE GROVE, MAY 5th '05.
Whereas: It is important that every county, village and hamlet in the State of Oregon should be well represented at the Lewis and Clark Exposition to be held in the city of Portland and believing it is the duty of each county in the state to make an appropriation from the public funds to defray the expenses of such exhibit providing the same is properly and judiciously expended. Therefore be it;

Resolved, by the Commercial Club of Cottage Grove Oregon in convention assembled, that we heartily endorse the work and action of the committee of Eugene, in their endeavors in that direction and most respectfully and urgently ask the county court of Lane county to make an appropriation of the sum of \$2,000 the same to be used in the collection of an placing on exhibition at said exposition a creditable exhibit of the products of Lane county.

Commercial Club of Cottage Grove Ore:

THOS. K. CAMPBELL, Pres.
H. O. THOMPSON, Sec.

We, the undersigned citizens and taxpayers of Lane county, State of Oregon, hereby endorse the above resolutions and respectfully petition the said county court to make the above appropriation.
(Signed by many citizens.)

University Alumni Register.

Number 3, Volume 2, of the new series of the University of Oregon Bulletins has just been issued. This number is a General Register of

the officials and Alumni of the University compiled by J. A. Gamber Registrar. It is the first General Register to be published by the University of Oregon, and gives a history of the personnel of the University, as to officers, faculty and graduates, from the date of organization, October 19, 1872, to July 1, 1904. A short historical sketch gives the principal events in the growth of the institution. This is followed by a list of the officers of the Board of Regents, and the names of the men who have served on the board with addresses, dates etc.

A complete list is given of the officers of administration and instruction with degrees, dates of service, and changes in titles. The larger part of the Bulletin is devoted to the Alumni Association. This includes the officers of the Association, the honorary Alumni and the graduates of all departments, including the School of Music, Law, and Medicine. The graduates are listed by classes, and the data concerning each includes present address and occupation, degrees received, and principal position held since graduation. A summary gives the number of graduates from each department; and the name Index makes the information readily accessible.

The total number of graduates from all departments of the University is 905. Of this number 389 are graduates of the literary, scientific and engineering department; 24 completed the old normal course, abolished in 1884; 6 finished a short course in pedagogy in 1897, and were given the degree of B. S. D. The School of Music has 12 graduates, the School of Medicine 184, and the School of Law 281.

It is worthy of notice that almost without exception the men and women who have graduated from the University are holding important positions in the lines of employment they have selected. The greater portion of them are located in the Northwest, many are in the East, some in the South, while Alaska, Japan, China and the Philippines are not without representatives of the University.

The Register is timely, and the data well arranged; while the record it gives of the results accomplished during the short history of the institution in an honor to the University of the state.

RHEUMATIC PAINS QUICKLY RELIEVED

The excruciating pains characteristic of rheumatism and sciatica are quickly relieved by applying Chamberlain's Pain Balm. The great pain relieving power of the ointment has been the surprise and delight of thousands of sufferers. The quick relief from pain which it affords is alone worth many times its cost. For sale by The Modern Pharmacy.

Radium Cure For Cancer.

Brooklyn Eagle.

A few days ago it was announced that violets had been discovered as sovereign in cancer. A little before that confidence was expressed in the curative properties of the X-ray. Now it comes to pass that radium is effective, and if the incident is correctly reported, the results of its use justify the continuation of experiments. It is told that a woman of 82 in the Flower Hospital has been restored to health by the use of a radium solution which attacked a cancer on her foot so vigorously that it sloughed off, carrying the roots with it and revealing the healthy flesh beneath. Others have shown improvement under similar treatment. The ejection of diseased tissue through the action of biting chemicals is no new thing, although the patient of ten suffers as much in their action as he would under the knife, or even more; but radium is a different kind of material—or property—and what ever effect it has on other substances would seem to be actinic rather than corrosive.

The Lieber method comprises the use of plates of celluloid, on which the radium preparation is spread and the substance is then put in direct contact with the foreign growth so that its rays and emanation shall be unhindered. It is hoped that the discovery will result in gain for a large and almost despairing class of sufferers, and that a disease which has baffled science for centuries will at last succumb to the art of medicine. At the same time so many extravagant things have been told and promised of radium that there will be many doubters until these newer claims are established. We may be sure that they will be put to the test in the leading hospitals, and in much of private practice, and that whatever is beneficial in the discovery will come into general use within the year if those claims are proved.

Every lady likes to have a nice hat and one that becomes her. A call upon Miss Bartels will insure both, and at a reasonable price.

INFORMATION FOR YOUNG WOMEN

At the time of the Centennial in Philadelphia, in 1876, the Young Women's Christian Association, then six years old, sent out circulars to warn girls against coming to see the Exposition with the idea of getting work. Notwithstanding this there were hundreds of girls stranded who exhausted their small savings in three or four days and found no work; how to protect them was a problem which is well remembered by those who were managers of the Association at that time.

Desiring to meet these conditions we make the following suggestions:

1. See to it that you have money enough for an emergency and for your return home.

2. See to it that before leaving home you learn from a reliable source that your destination in Portland is a safe one.

3. See to it that you accept no directions from either men or women on trains, if unknown to you, and that you report to the conductor any advances made. You must depend upon yourself and the railroad officials for information concerning trains. Any questions will be answered by the Traveller's Aid Agents to be found at the stations on the way. They will be women with badges.

4. See to it that you have an authorized Traveller's Aid card of identification.

5. See to it that you apply for the cards to your Organization, Society or Guild.

6. See to it that before accepting employment in Portland, through advertisement or otherwise, that the Exposition Traveller's Aid Committee endorses it.

7. See to it that before going to any lodging house that the Exposition Traveller's Aid Committee recommends it. The address of the Portland headquarters of this committee is 312 Oak street, Portland, Ore.

TRUSTEED WEALTH

A PREACHER in Trinity church this week, chose as his theme the idea that every man is a steward or trustee for others and must be judged according to the faithfulness of his trusteeship.

He could scarcely have said anything more appropriate to the time and place in which he spoke. In Wall street and in 1905 there is no other subject more practical than that of the trusteeship of wealth.

Even now we could scarcely appreciate the size or trusted wealth. The \$10,000,000,000 deposits in the banks, the \$12,000,000,000 capitalization of the railroads, the \$11,000,000,000 of life insurance in force, the billions of dollars represented by the industrial and miscellaneous corporations of the country, these are suggestive figures that disclose the enormous extent of trusted wealth. The bulk of our national wealth is administered by a few trustees for the benefit of many.

This fact calls for a higher morality, a stricter sense of honor, than in the case of business carried on for and by individuals. The man who accepts the position of director or trustee of other people's property is held to a stricter accountability than he would if acting entirely for himself. He has taken upon himself a sacred trust.

There are two things that need to be thoroughly learned by the business world:

First.—That corporations are not private; they are creations of law and have certain important public relations and accountability.

Second.—That a trustee or director is serving, not for himself, but for others; he is, in a mea ure, a public servant, and he has no right to abuse his power of trusteeship in order to enrich himself.

Failure to recognize these truths will eventually make a colossal wreck of the corporation system.—Wall Street Journal.

Keep your bowels regular by the use of Chamberlain's Stomach and Liver Tablets. There is nothing better. For sale by The Modern Pharmacy.

Dr. Darrin

An Eminent Physician in Eugene—His Success in Treatment of Diseases is Simply Marvelous

We are pleased to announce that there is a physician in Eugene, not simply a medical practitioner, but a physician of very high order of merit—a scientist, whose years of close study, close observation, close practical experience, has enabled him to draw not only testimonials but highest personal endorsements from the leading men of the country—congressmen, judges, etc., and whose success in the medical field is today without a parallel. We allude to Dr. Darrin, who has offices in the Hotel Smoed and will remain until July 1.

Dr. Darrin has an enviable rank in the profession as a wonderfully successful physician. He is essentially original in his method of practice, and those who have been under his treatment are surprised at the newness and novelty of his system of practice by electricity. His honesty and straightforward advice has won for him the confidence of his patients as well as the general public. The doctor is a gentleman of genial nature, and his private practice is marked by the formation of a close personal friendship with whom he comes in contact. He is without doubt one of the most thoroughly qualified physicians now before the public, as his wonderful cures of chronic diseases can testify. The doctor not only treats chronic and acute diseases, but is prepared to test the eyes and fit glasses to any defect in eyesight.

10-1
