The Bohemia Nugget one year with any one of the following publications one year for amount set opposite:
Pacific Monthly \$2.00
Weekly Oregonian (Portland) \$2.50
Weekly Journal (Portland) \$2.00

THIS PAPER is kept on file at E. C. Drake's advertising agency, 84 and 85 Merchants Exchange, San Francisco, California, where contracts for advertising can be made for it.

WEDNESDAY, AUGUST 23, 1905

Thompson Sees Bohemia.

Continued from 1st page.

erty of F. J. Hard, known as the Riverside. This mine is located on what is known as Horse Heaven Creek and is in one of the best mineralized portions of the district. Here we find a tunnel penetrating the mountain along the main ledge for a distance of 1200 feet at a depth of 800 feet. A greater portion of this tunnel is in excellent ore, a cross-cut had just been started and showed the ledge to be 17 feet wide and they had at this width neither wall.

This is a beautiful body of ore one of the largest I saw in the entire camp, copper predominates in this ore with good values in silver and gold. When this tunnel reaches the apex of the Mt. it will have attained a depth of 2000 feet and approximately 4000 feet in length. You may figure this body of ore for yourselves and then see if we can furnish ore for Bohemia mines for a smelter.

From this point we traveled on to the Oregon-Colorado, which is also one of Mr. Hard's properties, there as in the Riverside, we find about 1200 feet of tunnel work in level one. We also find that a great body of good ore is exposed.

The ore in this mine I would say is much like that of the Riverside. There is all told on this property about 2500 feet of tunnel. In crossing this property I followed the surface cropping of the ledge for a distance of 2000 feet which is certainly inducements enough to warrant the development that has been done on this property. No stoping has been done in this mine, but many tons of good ore on the dump is sufficient evidence as to what the mine contains. Air is being supplied to these mines by means of small water wheels to which is attached a fan of sufficient size to furnish ample air. From this mine we traverse 4 miles of mountain road back to the Vesuvius, built at a cost of \$5000.

My next stop was at the Crystal Consolidated. Here I found many good and staple improvements consisting of a large boarding house, a saw mill for supplying lumber to the mine, a 5 stamp mill, blacksmith shop, etc. The upper tunnel is in the mountain a distance of 428 feet; the lower, 614 feet following the ledge the entire distance at a depth of 375 feet, 60 feet of which passes through an ore body 40 feet wide. I was told that this ore carries values to the amount of \$20 per ton. This ore body amounts to 900,000 cubic feet, taking 13 cubic feet to the ton we find we have in sight here at this point 70,000 tons of good ore.

I next visited the North Fairview, a group of 14 claims, the Golden Slipper and others. But owing to the lack of time, did not stop, though in examining the rock at the mouth of the tunnel I noticed very fine specimens.

My next stop was at the Oregon Security Co. property. Here I find the nucleus of a great mine. A great deal of work has been done and much fine machinery installed. They have a 30-stamp mill, air compressor, etc., all operated by electric power. The ore from the mine is conveyed to the mill from an elevation of 900 feet by means of a cable railway, passing through 1100 feet of cross tunnel, the nucleus of connection for the lower portion of the Music group, cutting it at a depth of 1000 feet. There is 800 feet of drift on the Champion ledge at a depth of 410 feet, 610 feet of this drift is in a rich shoot of free milling ore. Numerous other levels, winzes, and upraises are under way. There is a large supply of mining timbers on the ground for winter use.

A tunnel driven 300 feet lower than the present workings of the Champion, would cut a body of base ore in what I would consider, owing to its central location the

mother lode of the district and is known as the Excelsior and traverses the property to the west, I am told, to Mr. Hard's Vesuvius and to the east through the old Knott Mine and Noonday, on beyond for a distance of 5 miles. This ledge I should judge is 60 feet wide, other main ledges parallel the Excelsior with many diagonals tying from one to the other, all of which carry high surface values and great bodies of rich base ore are known to exist at a greater depth.

I should say that the Champion Mine had enough free milling ore in sight for a two years run of their 30 stamp mill to say nothing of the great body of ore in the Music group, from which a surface tram is now surveyed and staked to a point directly above the present workings of the Champion down through which the ore will be dropped to the lower tram and conveyed to the mill, the length of this surface tram will be 6800 feet when completed, which is very apt to be accomplished before snow flies.

In conclusion I would say, that no camp boasts of so great a supply of fine timber and water, which makes it possible to work the mines 25 per cent cheaper than in those camps where these items do not exist. I find in traveling the district that wherever an attempt has been made to build a road, the same has been accomplished and a very good grade obtained, many dollars have been expended along these lines, first the Noonday road was built at a cost of \$20,000, next the Music \$9,000, then the Oregon Securities Co. \$18,000, the Crystal at \$7,300, Hard's Oregon-Colorado \$5,000, Trails probably \$5,000, total \$64,300. The next move is to induce the O. & S. E. R. R. to push on to the heart of the district, get a smelter and prepare to take out the great bodies of base ore that are deposited in the main ledges. This is essential for it is necessarily a base ore camp.

I might add that iron ore exists to a considerable extent in portions of this district.

H. O. THOMPSON.

Boston Man Sees Bohemia.

Continued from 1st page

gent, conservative, and honorable. Our two weeks in this mining camp have passed altogether too quickly, and we shall always hold this experience in pleasant remembrance and feel under great obligations to Mr. and Mrs. F. J. Hard for the kind hospitality shown us in their neat little cottage on Mt. Fairview, Bohemia, Oregon.

W. H. MARBLE.

UNHEALTHY KIDNEYS

Dr. Darrin Says that "Thousands Have Kidney Trouble and Don't Know it."

"Yes," said Dr. Darrin to our reporter, "kidney and bladder diseases are more prevalent than most people suppose. The symptoms are so numerous and different that thousands suffer and do not discover the real cause of their trouble until they are in the fatal grip of Bright's disease or diabetes.

"The warning of kidney trouble is backache, aching pain over the hips, swollen ankles, sediment or deposit in urine, blood or highly colored and milky white urine, frequent desire to urinate, scanty urine, voracious appetite, thirst, mouth dry, tongue furred and swollen, weakness and wasting of flesh, skin pale, waxy or dry, bad odor of perspiration and puffiness under the eyes.

"Advice and treatment should not be neglected by those having any of the above symptoms, which can be easily cured, otherwise will result in a fatal malady.

"I have for years continued the doctor, 'made a specialty of successfully treating all forms of bladder and kidney diseases, and will be pleased to talk with any one regarding their case, and give my candid opinion or render any service they may require."

Another Salem Testimony.

Mr. Editor:—Thirteen years ago Dr. Darrin visited Salem and cured my daughter, Martha Dove, of diabetes. She was unable to retain urine and had to get up many times, night and day. Dr. Darrin cured her so she never had any return of the symptoms. My daughter resides in West Salem, Oregon.

G. B. DOVE.

Dr. Darrin's Place of Business.

Dr. Darrin can be consulted free at the Smoedee Hotel, Eugene, Oregon, until October 1, from 10 o'clock to 5 daily, evening 7 to 8, Sunday 2 to 4.

The doctor makes a specialty of all the diseases of the eye, ear, nose and throat, catarrh, deafness, bronchitis, lagrippe, heart, liver bladder and kidney diseases, or those who suffer from apathy and indifference, also genito-urinary and skin diseases in either sex, such as blood taints, seminal weakness and lost vigor, varicocele and stricture.

Circulars and question blanks sent free to any address and correspondence solicited. Many cases can receive the home treatment after one visit to the doctor's office. Batteries and belts furnished with full instruction for their use. Eyes tested and proper glasses fitted.

Frankie McCord of Albany is visiting Mrs. Staudacher for a few days.

WANT MINING MAN IN CABINET.

PRESIDENT Edward H. Benjamin of the California Miners' association, spoke at the Trans-Mississippi congress meeting Friday on the subject of a department of mines in the president's cabinet.

In a historical way, he reviewed the nation's political career, showing that the president's cabinet had but four members at first, and since then secretaries had been added as industries or departments required.

"The mining industry at that time," said he, "was comparatively unimportant. The lawmakers at Washington knew little of the mineral resources of America, gave them scant attention and at the time of the creation of the interior department it was not intended to be of any special benefit to the mining industry. But since then mark the change! From a small, unimportant industry, that of mining has become of the great wealth producing factors of the nation. From an annual yield of 50 years ago so modest that the public mind scarcely gave it a thought, the annual mineral production of America has long since passed the billion dollar mark."

INCREASE IN MINING

"The annual yield of coal has increased from less than 4,000,000 tons in 1849 to 350,000,000 tons in 1903. Iron has increased from 600,000 tons in 1850 to 20,000,000 tons in 1904. Lead from 18,000 to 280,000 tons in the same period of time, and copper from less than 1,000 tons to over 700,000 pounds annually, and the demand is increasing so rapidly that the large manufacturers of copper utilities are seeking their own mines for a source of production.

"So it has been throughout the long line of mineral products of this wonderful country, in which is mined and marketed 63 commercial mineral substances, besides gold and silver. And when we come to those precious metals, we have a story equally as marvelous. The annual yield of gold has advanced from under \$5,000,000 in 1848 to over \$80,000,000 in 1904. The production of silver in commercial quantities began within the memory of the present generation, yet its output in 1904 was \$70,000,000 from mines that are seemingly inexhaustible. When we view the mining industry of our county as a whole, our amazement grows intense and statistics become almost incredible and bewildering. The miners themselves have not fully appreciated the stupendous magnitude of the industry in which they are engaged, or the important part it plays in our national affairs; nor has the public realized its marvelous growth and value.

PAST DEVELOPMENT AND FUTURE GROWTH

"In no other industry of the world has there been such rapidity of development, and in no other are future possibilities greater. When other industries have failed mining has plodded along. It has been the mainstay of hard times and the backbone of industrial energy. It has quickened every avenue of trade and raised our nation to a degree of independence unparalleled in the world.

NOTICE TO CONTRACTORS

Notice is hereby given that the Lane County Commissioners Court will receive sealed bids for the furnishing and construction of a bridge across the Coast Fork of the Willamette river about two and one-fourth miles south of Cottage Grove. Said bridge to consist of a covered truss span 96 feet long with 64 feet of approach at each end. The timber and material used in said bridge will be delivered free upon the ground, the contractor paying the costs of timber and material only, with the exception of the main upper and lower cord sticks, which will be furnished upon the ground free of cost.

Said bridge to be constructed in accordance with the plans and specifications now on file in the Clerk's office.

Said bridge to be completed on or before the 15th day of October 1905. Each bid must be accompanied with a certified check in a sum of at least five per cent of amount of bid. The bids to be opened on the 24th day of August at two o'clock p. m. The Court reserves the right to reject any and all bids.

By order of the Court this 4th day of August 1905.

E. U. LEE, County Clerk.

New Features At Phone Office

The Pacific States Telephone Company will have a new feature in its Oregon system of lines. It is a telegraph system. The local office will soon be arranged for the desk and instruments, which will be in charge of a young lady operator. It will be used for general business as well as in connection with orders in the telephone department.

FORCED TO STARVE.

B. F. Leek, of Concord, Ky, says: "For 29 years I suffered agonies, with a sore on my upper lip, so painful, sometimes, that I could not eat. After vainly trying everything else, I cured it, with Backlen's Arnica Salve. It's great for burns, cuts and wounds. At Benson's Pharmacy, Only 25c."

CONSUMPTION'S WARNING

Inside facts soon become evident in outside symptoms.—Dr. G. G. GIERER.

The aid of scientific inventions is not needed to determine whether your lungs are affected. The first symptoms can be readily noted by anyone of average intelligence.

There is no disease known that gives so many plain warnings of its approach as consumption, and no serious disease that can be so quickly reached and checked, if the medicine used is Dr. Roscher's German Syrup, which is made to cure consumption.

It is in the early stages that German Syrup should be taken, when warnings are given in the cough that won't quit, the congestion of the bronchial tubes and the gradual weakening of the lungs, accompanied by frequent expectoration.

No matter how deep-seated your cough, even if dread consumption has already attacked your lungs, German Syrup will surely effect a cure—as it has done before in thousands of apparently hopeless cases of lung trouble.

By using 5/8-inch piston drills on the Henderson Point rock work in Portsmouth harbor, New Hampshire, holes were drilled in hard trap to depths varying from 50 to 79 feet. The drills were operated in series, seven machines being bolted to a frame of heavy timbers, set in the bottom of a pit behind a coffer dam. Two hundred and three lifting holes were thus drilled, which were 6 inches diameter at the start, decreasing to about 2 inches diameter at the bottom of the deepest hole. Thirty-eight tons of dynamite were used in exploding the entire series of holes bored, there also being numerous down holes. The blast dislodged 35,000 cubic yards of solid rock. The sticks of powder used were made to order and ranged from 2 to 4 inches diameter and 24 to 30 inches in length. About one-half the powder was 60 per cent or somewhat stronger than the ordinary No. 1 powder. Nine hundred exploders were required for the work.

Something for Your Eastern Friends.

The 1905 issue of the publication "Oregon Washington and Idaho and Their Resources," issued by the Passenger Department of the Oregon Railroad & Navigation Company, is now ready for distribution. If you have friends in the East who are interested in the Pacific Northwest, a copy of this publication would be a welcome visitor to their homes. This publication will be mailed to any given address upon receipt of four cents in stamps to pay postage.

PUBLIC IS AROUSED

The public is aroused to a knowledge of the curative merits of that great medical tonic, Electric Bitters, for sick stomach, liver and kidneys. Mary H. Walters, of 546 St. Clair Ave., Columbus, O., writes: "For several months, I was given up to die. I had fever and ague, my nerves were wrecked; I could not sleep, and my stomach was so weak, from useless doctors' drugs, that I could not eat. Soon after beginning to take Electric Bitters, I obtained relief, and in a short time I was entirely cured." Guaranteed at Benson's Pharmacy. Price 50c.

A TOUCHING STORY

Is the saving from death, of the baby girl of Geo. A. Eyer, Cumberland Md. He writes: "At the age of 11 months, our little girl was in declining health, with serious Throat Trouble, and two physicians gave her up. We were almost in despair, when we resolved to try Dr. Klug's New Discovery for consumption, coughs and colds. The first bottle gave relief; after taking four bottles she was cured, and is now in perfect health." Never fails to relieve and cure a cough or cold. At Benson's Pharmacy, 50c and \$1. guaranteed. Trial bottle free
