

FEEDING THE HOGS.

Rude Table Manners and the Waste of Food Prevented.

One of the greatest troubles with the hog is that he is so irrepressibly hogish. When you feed him he apparently feels it his inherent duty to crowd every other hog as far and forcefully away from the feed as possible. When fed grain on the open floor he takes it upon himself to cover as much as he can, to keep nosing and pushing his fellows, often to his own loss of food, since more or less is wasted by his rude "table manners." When fed slop in the trough the biggest hog will invariably work his way through or over the jam and get his carcass into the trough, where he complacently stands lengthwise and if not satisfied with that lays himself down, gulping in his own and the smaller ones' share until too full even to grunt, when he will stretch out for a snooze if the trough is big enough.

To avoid the waste of feed and to give all an equal chance to secure their share I have a number of schemes and devices, but I consider the one shown in the illustration to be as good as if not better than any, says a writer in Farm and Fireside.

The first requisite is a good sized, well constructed trough built preferably in V shape, as shown by A. The width of the side boards will depend

A GOOD TROUGH GUARD.

upon the size of the hogs to be fed. A small trough, with six inch side boards, may be used for the wee pigs and twelve or sixteen inch stuff for the large sows and breeding sows. The size of pieces C and D should depend upon the weight of the animals and the strain likely to come on the frame. For hogs of ordinary weight a piece 2 by 4 inches should be used for the ridgepole, C, and pieces 1 by 3 or 2 by 2 inches for the guard bars, D. These should be securely nailed to the side of the trough and, if a permanent trough in the hog house, spiked to the floor to prevent breaking off. The upright, E, firmly spiked to B, should be amply stout to secure endwise rigidity.

For delivering slop to the trough a spout or small trough should be arranged to enter at the end of the feed trough.

Fall Seeding of Alfalfa.

The ground for alfalfa should be well settled before seeding and only the surface made loose. Alfalfa will freshly fall if seeded in the fall on newly plowed ground, according to H. M. Cottrell of Kansas, who says: Well cultivated cornfields, with the stalks cut and drawn off, give ideal conditions. Such fields should not be plowed, but harrowed only before seeding. Wheat, oats, flax and millet stubble ground plowed shallow, harrowed thoroughly and allowed to settle before seeding furnishes good conditions for alfalfa. If such ground is mellow plowing may not be necessary, as the land will only need to be disked and cross disked.

The best time to sow is in the last half of August. It is safe to sow as late as Sept. 15 if conditions are good. The ground must be well settled, with a loose mulch on top, and well saturated with moisture so as to bring up the seed quickly and force the fall growth. If either of these conditions is lacking it will not pay to sow.

A Catch Crop of Turnips.

"Do not leave your land bare" seems to be the motto of farmers in Flanders. As soon as the first wheat, barley and rye are cut the sheaves are left in the middle of the field, and a very superficial plowing is given, with applications of chemical manures, and the land is then immediately sown to turnips. It is not rare to see some fields cut, plowed and sown on the same day. While the turnips are growing two or three hoeings are given, and liquid manure is applied. At the end of a few weeks the farmer has a crop of turnips which are consumed on the land or siloed.

Dutch Cattle in Belgium.

A great many Dutch cattle are imported into Belgium, as a number of farmers find it advantageous to buy certain classes of these Dutch animals rather than to breed them at home. Belgian farmers have given up breeding the Shorthorn race for twenty years past.

Home Grown Crops For the Dairy.

At the New Jersey experiment station home grown crops—alfalfa, crimson clover, oats and peas, cowpeas and soy beans—which are rich in protein have been utilized in the dairy to a greater profit than could have been realized by selling them at the market price.

Agricultural Schools For Girls.

In Belgium high schools of agriculture are established for young girls who want an education in agriculture complete enough to enable them to undertake the management of large farms or to teach in agricultural schools.

CURRENT DEVELOPMENTS.

News and Notes of Interest in Various Lines of Agriculture.

Washington.—The new white potato from Uruguay, Solanum commersonii, which has attracted considerable attention as grown in France, is the subject of some information supplied to the state department by the United States consul at Rouen, who says:

"The leaves are small and slender, somewhat like those of the Irish potato, and the flowers are abundant, of a pale violet color and very odorous. After one planting the plant perpetuates itself from the broken roots left in the soil. The vegetable proper weighs from one to two and a half pounds and has a yellowish wrinkled skin, covered with lentils, which disappear after culture. The pulp when cooked has a slight greenish color."

It further appears that as grown in France in 1901 all of a certain number of tubers taken from the crop by random and cooked with the skin on were very bitter, but under cultivation this characteristic has greatly diminished. Feeding also takes away much of the acidity. In spite of the bitter taste animals are fond of them. "In the same soil," says Mr. Haynes, "the yield is greatly superior to that of the ordinary potato. The Early Rose in one instance gave 3,000 pounds to the acre, the American Marvel 3,000 pounds and the Solanum commersonii 8,500 pounds."

Not Turning to the Farm.

With the apparent great increase of interest in agricultural matters it is somewhat surprising to learn, from a special report to the census bureau, that in 1900 agriculture showed a diminishing proportion of workers, while the numbers in professions, manufactures, trade and transportation was on the increase. However, agriculture still makes a good showing, as almost 40 per cent of all the men workers in the total population was engaged in agriculture, with 24 per cent in manufacturing and mechanics, 18 per cent in trade and transportation, almost 15 per cent in domestic and personal services and 3 1/2 per cent in professional service.

To Be Tried on a Bigger Scale.

The remarkable intensive farming of J. D. Detrich of Pennsylvania has become a familiar story during the past two years. Mr. Detrich brought up a run down farm of fifteen acres to the point where it supports more than two cows to the acre, nothing being bought except bran and cottonseed meal. Agricultural experts reason that the Detrich methods of intensive farming if applied by dairy farmers throughout the United States would be worth \$40,000,000 a year to the dairy interests.

The question having been raised whether what has been done on fifteen acres would result equally well on a larger scale, it is said that Mr. Detrich is to try to prove the proposition on a new farm of 300 acres which he has purchased in Chester county, Pa. On his fifteen acre farm every bit of space was devoted to crops, none to pasturage. The animals were kept in the stable or barnyard the year round.

Grain Weevils.

The two forms of grain weevils most in evidence are the common grain moth and the black weevil. In either case the most ready method of their destruction is the employment of carbon bisulphide, one pound at least of the liquid to 100 bushels of grain, or 1,000 feet of space. In ordinary cribs and bins the most important provision is to make the room as nearly as possible gas tight, in order that the gas may remain in all parts of the space in full strength and for the required time. It must enter, by diffusion, all cracks and crevices, even those between the grains of corn in the ear, and must penetrate the burrow of the individual weevil or its grub in the wheat berry. This thorough diffusion will only occur after some time, even in a saturated atmosphere. Twenty-four hours is short enough for certainty, even where the gas can be kept full strength in the bin.—E. A. Pope, nec.

Harvesting the Sugar Beet.

The time of sugar beet harvest is usually indicated by the agriculturists of the sugar factory for which the beets are destined, and notice is given to the grower to deliver his beets to the factory. An expert in sugar beet growing can readily discern when beets are ripe. The leaves droop and take on a yellow cast. The sooner they are harvested after this the better, as they have reached their maximum of sugar content and purity. Warm fall rains are liable to start a new growth of the beets, causing them to send out a fresh supply of rootlets. This has a tendency to lower the purity and sugar content of the beets. If it is apparent that the crop cannot be received at the factory at some time in the near future, the beets should be harvested and siloed.

A great many Dutch cattle are imported into Belgium, as a number of farmers find it advantageous to buy certain classes of these Dutch animals rather than to breed them at home. Belgian farmers have given up breeding the Shorthorn race for twenty years past.

In the Poultry Yard.

The hens that pass their molt early are the ones to keep for early winter layers.

In selecting breeders for market stock only broad, full breasted birds should be chosen.

Sunflower seed will help to hasten the molting of fowls. Linseed meal is also useful for the same purpose.

Ducks are not subject to cholera or roup, and lice do not trouble them at all.

Geese are adapted to wet lands and do well if supplied with good pasturage and plenty of water.

FOUR DOCTORS FAILED

Medford Exchange.

Dr. Darrin has been so thoroughly heralded by the press of Oregon that there are none who are not aware of his presence or conversant with the many hearty endorsements that come to him from every section of Oregon. Many of these are from well-known and prominent persons—persons whose word is unquestioned by their friends and neighbors, whose veracity is recognized far beyond the community in which they live, and whose endorsement carries with it more than ordinary conviction; yet even the testimony of those of more than local reputation fails to carry with it quite the degree of conviction that is borne by that of the testimonial, relating to facts personally known to the reader; Mr. A. Pool, of Eagle Point, a well-known resident of Jackson county, of many years' standing, submits over his signature what he knows of Dr. Darrin's professional ability in a complicated case in which four doctors had previously failed, and tells of a neighbor who is also able to bear splendid evidence of the doctor's curative powers. He writes as follows:

Mr. Editor:—I hold it my duty, as well as pleasure, to help to make known any means of relieving the suffering of humanity. Ten years ago I was taken with trouble and pains through my chest and body. I had then been under the care of four doctors and they gave me up as incurable. I was so weak and run down that I could scarcely walk across the street. All my friends and neighbors thought my days on earth were nearly spent. I visited Dr. Darrin in Portland ten years ago and was cured by him in two months. I have never been ill since, and feel well and able to work.

My neighbor, Mr. Matthews, of Eagle Point, visited Dr. Darrin the same year and was cured of lung trouble, called consumption, and a large tumor in his side. Refer to me at Eagle Point, where I reside and have for twenty years. A. POOL.

LANE COUNTY TESTIMONY.

To the Editor:—I am glad to sign my name to a statement that Dr. Darrin has cured me of eczema, piles and a generally run down condition of the whole system. I reside at Vida, Lane county, Oregon. L. M. HARTWIG.

DR. DARRIN'S PLACE OF BUSINESS.

Dr. Darrin can be consulted free at the Smeed Hotel, Eugene, Oregon, until October 1, from 10 o'clock to 5 daily, evenings 7 to 8, Sunday 2 to 4. This doctor makes a specialty of all diseases of the eye, ear, nose and throat, catarrh, deafness, bronchitis, lagrippe, heart, liver, bladder and kidney diseases, or those who suffer from apathy and indifference. Also genito-urinary and skin diseases in either sex, such as blood taints, seminal weakness and lost vigor, varicocele and stricture. Circulars and question blanks sent to any address and correspondence solicited. Many cases can receive home treatment after one visit to the doctor's office. Batteries and belts furnished with full directions for their use.

OLIVER VEAUGH.

ATTACKED BY A MOB.

and beaten, in a labor riot, until covered with sores, a Chicago street car conductor applied Bucklen's Arnica Salve, and was soon cured and well. "I use it in my family," writes J. G. Welch, of Tekonsha, Mich., "and find it perfect." Simply great for cuts and burns. Only 25c at Benson's Pharmacy.

Beginning with Sept. 1st the Southern Pacific will sell round trip tickets, Cottage Grove to Portland and return for \$4.85 good for 30 days. This arrangement is made in order to give all a chance to visit Portland and the fair, and to stimulate the attendance upon the Exposition. While the trains are now loaded heavily arrangements have been made so that much larger travel can be accommodated.

GOT OFF CHEAP.

He may well think he has got off cheap, who, after having contracted constipation or indigestion, is still able to perfectly restore his health. Nothing will do this but Dr. King's New Life Pills. A quick, pleasant, and certain cure for headache, constipation, etc. 25c at Benson's Pharmacy; guaranteed.

Save Money by buying this reliable, honest, high grade sewing machine.

STRONGEST GUARANTEE.

FACTORY AT BELVIDERE ILL.

LIKE FINDING MONEY.
Finding health is like finding money. So think those who are sick. When you have a cough, cold or sore throat or chest irritation, better promptly like W. C. Barber, of Sandy Level, Va. He writes: "I had a terrible chest trouble, caused by smoke and coal dust on my lungs, but after finding no relief in other remedies, I was cured by Dr. King's New Discovery for Consumption, Coughs and Colds." Greatest side of any cough or lung medicine in the world. At Benson's Pharmacy; 50c and \$1.00, guaranteed. Trial bottle free.

Round Trip for One Fare
The Southern Pacific railroad has decided to make a rate of one fare for the round trip from Portland to all points in Oregon to as far south as Ashland, for visitors from the East to the Lewis and Clark Exposition, to enable them to look over western Oregon, that they may have an opportunity to locate or invest.

The tickets will be good for 15 days, with stop-over privileges. Holders of Exposition round trip tickets from the east can purchase these tickets at this rate, it will depend upon the energy shown by the community as to the number of visitors secured.

ARE YOU ENGAGED?
Engaged people should remember, that after marriage, many quarrels can be avoided by keeping their digestions in good condition with Electric Bitters. St. A. Brown, of Bonnetsville, S. C., says: "For years, my wife suffered intensely from dyspepsia, complicated with a torpid liver, until she lost her strength and vigor, and became a mere wreck of her self. Then she tried Electric Bitters, which helped her at once, and finally made her entirely well. She is now strong and well. Benson's Pharmacy sells and guarantees them at 50c a bottle."

ABSCISS.
Abscesses, with few exceptions, are indicative of constipation or debility. W. H. Harrison, Cleveland, Miss. writes, Aug. 15, 1902: "I want to say a word of praise for Ballard's Snow Liniment. I stepped on a nail, which caused the corbs in my leg to contract and an abscess to rise in my knee and the doctor told me that I would have a stiff leg, so one day I went to J. E. Lamb's drug store (who is now in Denver, Colo.) He recommended a bottle of Snow Liniment. I got a 50c size, and it cured my leg. It is the best liniment in the world. Sold by The Modern Pharmacy."

BEAUTIFUL WOMEN.
Plump cheeks, flushed with the soft glow of health and a new complexion, make all women beautiful. Take a small dose of Herbine after each meal. It will prevent constipation and help digest what you have eaten. Mrs. Wm. M. Sargent, Midlothian, Tex. writes, May 21, 1901: "We have used Herbine in our family for eight years, and found it the best medicine we ever used for constipation, bilious fever and malaria. Sold by The Modern Pharmacy."

Surest and Quickest Cure for all THROAT and LUNG TROUBLES, or MONEY BACK.

CAUSE OF INSOMNIA
Indigestion nearly always disturbs the sleep more or less and is often the cause of insomnia. Many cases have been permanently cured by Chamberlain's Stomach and Liver Tablets. For sale by The Modern Pharmacy.

WOMEN WHO SUFFER FROM Sick Headache SHOULD USE

HERBINE

For Permanent Relief

HERBINE acts directly on the Liver. It will cure CONSTIPATION, DYSPEPSIA, MALARIA AND CHILLS. Is entirely free from all poisonous mineral substances, and is composed solely of LIFE-GIVING HERBS. Especially adapted for weak and weary constitutions; strengthens the weakened glands and organs; it checks all derangements of the human body.

CURED HER SICK HEADACHE
Mrs. Josie Cameron, Centralia Avenue, Temple, Texas, writes: "I find HERBINE gives me quick relief, and take pleasure in recommending it to all women who suffer from sick headache."
