BOHEMIA NUGGET PUBLISHING COMPANY.

Make all checks payable to Nugget Pub. Co.

Entered at the postoffice at Cottage Grove, Oregon as second class mail matter.

SUBSCRIPTION RATES.
6 months.....\$1.00
1 year.....\$1.50
18 months.....\$2.00
If paid in advance.

Clubbing Rates.

The Bohemia Nugget one year with any one of the following publications one year for amount set opposite:
Pacific Monthly \$2.00
Weekly Oregonian (Portland) \$2.50
Weekly Journal (Portland) \$2.00
Daily Mining Record (Denver) \$5.50
Weekly Mining Record \$2.25

This paper is kept on file by THE AMERICAN MINING CONGRESS, Chamber of Commerce Building, Denver, Colo., where our readers will be welcome to the use of the leading papers from the various mining sections of the West, a scientific library and mineral exhibit.

THIS PAPER is kept on file at E. C. Drake's Advertising Agency, 64 and 65 Merchants Exchange, San Francisco, California, where contracts for advertising can be made for it.

WEDNESDAY, SEPTEMBER 27, 1905

Cottage Grove is to have many new enterprises ere long, so report has it. Every new legitimate enterprise is to be welcomed—the more the merrier.

Elsewhere will be found the announcement of the Annual Loran Agricultural and Stock fair to be held in Oct. Loran is ahead of many small towns in being able to have such a fair. They prepare good prizes for exhibits and have a first class fair on a small scale, and are to be patterned after.

The Eugene Guard is to be commended for its attitude regarding the permitting of prizefighting or sparring exhibitions in that town. Such exhibitions are of no value to a town, and are not only a menace to the welfare of the community but a detriment to the standing of the town, and exert a harmful and degrading influence on every person that witnesses them.

There are three candidates now before the public for the Republican nomination for Congress in the first district, who seem to have gone to the head of the struggle, all others seeming to have dropped back. Prominent among these three is Chas. B. Moores of Salem, who makes a strong and forceful plea for the support of loyal republicans on the grounds of his faithful service in the past and his standing as a good citizen. The first district covers the counties of Benton, Clackamas, Coos, Curry, Douglas, Jackson, Josephine, Klamath, Lake Lane, Lincoln, Linn, Marion, Polk, Tillamook, Washington and Yamhill.

We have heard it said that there were a lot of empty houses in Cottage Grove, and to such statements we are now ready to object. We have been pretty busy the past week trying to find a house fit to live in. There are possibly a dozen fairly good houses, and possibly half a dozen still better houses that are unrented, the balance in the town unrented would probably not draw \$50 a month altogether if they were rented every one. The fact is that nine tenths of the houses that are not occupied at present are not rentable except under conditions, when nothing else can be had. When such is the case, no one has a right to say the town is full of empty houses, there are a few houses unrented, and plenty of sheds.

It is reported that Sakhalin, the recent bone of contention between Russia and Japan contains extensive deposits of coal of a high quality and also "naphtha," and that gold was discovered in the central part of the island in 1898. The coal has been in control of a company since 1875, but the annual output at the present time does not exceed 20,000 tons. The gold deposits have not been worked in any systematic manner. Judging from the experience with Formosa it may be expected that the Japanese will make an extensive investigation of these natural resources, in the part of the island which has come into their possession, and proceed to development along modern lines, and Sakhalin may be a name of importance in mining literature as well as in the story of diplomacy.

J. H. Bartels has let the contract for the construction of his new market building to S. E. Wallace, the building to be completed in 30 days under penalty, for overtime. The contract and bond were signed Monday. A cement floor laid on he solid earth will make the floor.

SMELTING BY ELECTRICITY

The report of the commission appointed by the Dominion government to investigate the different electric furnace processes employed in the iron or steel industries, or in process of development, in France, Italy and Sweden, while not conclusive, is encouraging to a marked degree. The commissioners seem to have done their work thoroughly. Their report is voluminous, and contains many photographs and diagrams which assist the uninitiated in understanding the excellent descriptions of the various processes. The work of the commission was to establish facts as to the processes investigated, and these are described in great detail, embracing the original tests made in several cases, giving particulars of the raw materials used, the expenditure of energy, the output and the results of the extended analysis and mechanical tests of the products.

The tests demonstrated that steel of any composition can be obtained in electric furnaces of different designs. That is the most important point. Having established that electric furnaces will produce any kind of steel, the all important fundamental question of cost had to be considered. In the end the commercial test is applied, and any process that fails there must be rejected. On this point the commissioners make the following division of their subject: First, the production of high grade steels of crucible steel quality; second, the production of structural steel to compete with Bessemer and open hearth steel; third, the reduction of iron ore to pig iron. The conclusion reached by the commission with respect to the manufacture of crucible steel is that "steel equal in all respects to the best Sheffield crucible steel can be produced at a cost considerably less than with the old crucible process."

An opposite conclusion is arrived at with respect to structural steel to compete with Bessemer and open hearth steel. The commissioners find that "it could not be economically produced in the electric furnace." The Electro-chemical Industry, discussing the question, says this conclusion agrees exactly with the status of the industry, since the electric furnace is nowhere employed to compete with Bessemer or open hearth processes. F. W. Harbord, the metallurgist of the commission, says that furnaces of ten to fifteen tons should give satisfactory results, but he hesitates to recommend larger furnaces, and does not believe that the small furnaces could compete with the gas-fired furnaces of forty or fifty tons capacity. On this point, however, the report is not altogether satisfactory.—Rossland Miner.

The great amount of travel to the Western slope this summer is bound to have a lasting effect upon the trend of mining investments from the east. The visitors, as a rule, are interested in the possibilities of money making, in mining or any other proposition, and will either invest on the strength of what they have seen of the undeveloped resources, or go home to dream about it a while, and then take their luck. As a rule the Eastern man that invests knows more about his business than he used to do, and when he has been on the ground, he is a more intelligent investor, he understands and can appreciate the difficulties surrounding the operator and that an investment of today can not be a dividend payer tomorrow. The travel from the east will bring all kinds of investments, it will instill in the minds of the easterners a better idea of our country and widen them out, it will bring us new industries, more money to develop and operate mines, and tend to make the western section a still greater producer.

To show the prestige of the United States Steel corporation it is worthy of remark that in 1904 it reported 53.8 per cent of the iron ore shipped from Lake Superior, and 38 per cent of the total production in this country; 36.6 per cent of the coke made; 43.3 per cent of the pig iron; 70.5 per cent of the spiegel iron, ferro-manganese and ferro-phosphorus; 69 per cent of the Bessemer steel ingots and castings; 50.4 per cent of the open-hearth steel ingots and castings; 57.2 per cent of the Bessemer steel rails; 55.1 per cent of the structural shapes; 58 per cent of the plates and sheets excluding nail plate; 71.3 per cent of the wire rods; 28 per cent of the bars, skelp, nail plate, open-hearth and iron rails, and 67 per cent of the wire nails.

Foresters Attention.

The Senior and Junior Foresters of America will meet at I. O. O. F. hall Monday night, Oct. 2 for a social good time. Everybody come. By Order of Committee.

BRITONS LIKE MINES.

ROADS for mining districts are too often forgotten in American commonwealths. Custom seems to have fixed the duty upon the mining population of this country, of building their own roads. This duty where borne by a mining community is not usually distributed so as to make the burden even, and operators are not hearty in undertaking the work.

Britain and her dependencies are much keener in fostering the industry, by extending aid to mining men, especially in the early days of development. Yukon territory has been thriving for some time under beneficial road regulations, while the American side of Alaska is just beginning to take up this all-important work. In Australia the government is aggressive in its efforts to have prospectors enter new territory, and capital to develop mineral in a district where the surface has promise.

In many American states a mining district has to do practically all of its road building and improvement, and frequently an individual company, already heavily burdened by preliminary improvements must build its own roads and maintain them. Farmers in adjacent sections as a rule are hostile to mining, fighting strenuously any appropriation for road work, and granting it only after the mines have been developed sufficiently to employ a large number of men who will consume the farmer's products. There is little state road work for the miner, while the assessor is prodded to hunt out his isolated property, for the heaviest tax that it will bear.

British people seem more sympathetic with the mining industry, which no doubt explains that some of the greatest metal producing districts of the earth are controlled by Britain.—Pacific Miner.

WASHINGTON SCHOOL OF MINES NEW BUILDING READY FOR USE

Among the improvements to meet the eyes of returning University of Washington students this fall will be the new School of Mines building. This structure, 40x110 feet, is situated next to the power house and will contain forges and foundry a three-stamp mill and feeder, ore bins, crusher and concentrating plant complete. The work of the state school of mines is distinctly practical in its nature, the students having an experimental mine on the campus. A winter school for prospectors is one of the features. Inquiries indicate a largely increased attendance.

Kicked Anarchist Out of Town.

Eugene, Sept. 21.—An Italian anarchist who made himself noticeable on the streets this forenoon by his cursing the country, the law, the officers and almost everything else, was ordered out of the city by Chief of Police Stiles. He didn't leave when told to, but instead went to the depot, where he continued his bad talk. Chief Stiles again told him to leave and emphasized the order with a swift kick. The dago left up the railroad toward the south with the officer following ten feet behind till a point near the university was reached. When it was seen that the fellow was well on his way out of town the chief returned.

Married.

Tuesday, the 19th inst., at the Imperial hotel, this city, James Hemenway, of the Garman-Hemenway Company, Grants Pass, was married to Miss Carrie Northway. The bride has been a resident of Portland for the past three years, and has a wide circle of friends and acquaintances. The groom is a well known business man of Grants Pass, in which town Mr. and Mrs. Hemenway will reside.—Oregonian.

Want to Close Early.

Eugene, Or., Sept. 21.—A movement is on foot among the members of the Merchants' Protective Association of this city to induce all stores in this city to close at an early hour each evening. At present the dry goods stores close at 6 o'clock and the grocery stores at 7. Hardware stores, meat markets and stores in other lines have no regular hours for closing, often remaining open till a late hour. A committee has been appointed to arrange a uniform hour for closing, and it is thought that all will agree to it.

A young girl near Portland recently stood guard the best part of the night on a bleak mountain trail, guarding an old man who was injured by his horse slipping from the trail. Her courage and kindness are enough to cheer ones heart.

A MATTER OF HEALTH

DR. DARRIN WILL REMAIN

In Answer to Urgent Appeals He Will Remain Until Nov. 12

Those who have been treated by Dr. Darrin, or have any disease whatever will herald with delight the announcement that he has at last consented to listen to urgent appeals and remain a while longer at the Hotel Smeedle, in Eugene. The reputation of the doctor is such, and the success of his cases has been so marked as to give him an international reputation and the people of this section should feel flattered to have so eminent a physician in their midst.

Owing to "harassment" Dr. Darrin has reduced his professional fees to half his former charges. All who have applied and not taken treatment or new cases to come the remainder of the stay will be still monthly, or in that proportion as time required. The afflicted will do well to make a note of this generous offer, and apply at once, as these rates will only last for a limited time. The doctor's liberal offer and fall in price is not a boon to the poor, but will be appreciated by thousands unable to pay large fees.

That Dr. Darrin has effected extraordinary cures, after all efforts elsewhere have failed, is a strong fact, supported by the strongest evidence. The following are a few extraordinary cures that can be recalled by James F. Ames, 206 West Seventh street, Eugene, Oregon, cured.
H. S. Tilton, Pleasant Hill, Or., deafness and noises in head, cured.
J. L. Oxford, Brownsville, Or., deafness, restored to perfect hearing.
Miss Anna Anderson, Hoffman House, Eugene, deafness, cured.
J. E. Montgomery's boy, Emily, Or., discharging eyes, deafness, cured.
Mrs. Louis Reimling, Marsola, Or., entarrinal deafness, noises in head, cured.
Mrs. Ed Crawford, Springfield, Or., stomach trouble and weak heart and cramps; restored to health.
Mr. Edlin—For six years before going under Dr. Darrin's electrical and medical treatment I had been greatly troubled with granulated eyes and catarrh of the head, throat and bronchial tubes. I am happy to say Dr. Darrin has cured me since his journey in Eugene. Refer your readers to me at Leaburg, Or.
W. F. DEARSONG.

Scholl will have a complete line of holiday stock this year.

CURED OF LAME BACK AFTER 15 YEARS OF SUFFERING.

"I have been troubled with lame back for fifteen years and I found a complete recovery in the use of Chamberlain's Pain Remedy," says John G. Bisher, Gilham, Ind. This Remedy is also without an equal for sprains and bruises. It is for sale by The Modern Pharmacy.

A REMEDY WITHOUT A PEER.

"I find Chamberlain's Stomach and Liver Tablets more beneficial than any other remedy I ever used for stomach trouble," says S. P. Klote, of Edna, Mo. For any disorder of the stomach, flatulency or constipation, these tablets are without a peer. For sale by The Modern Pharmacy.

A GOOD NIGHT'S REST

"Speak for it!" she cried to Joseph. "That German Syrup, home's a great treasure. Good health and joy impart."

The greatest tonic on earth is a good night's rest. Restless nights and the terrible exhaustion of a hacking cough are dread dangers of the poor consumptive. But why this fear of the night when a few doses of Dr. Boschee's German Syrup will insure refreshing sleep, entirely free from cough or night sweat? Free expectation in the morning is made certain by taking German Syrup.

We know by the experience of over thirty-five years that one 75-cent bottle of German Syrup will speedily relieve or cure the worst cough, cold, bronchitis or lung troubles—and that, even in bad cases of consumption, one large bottle of German Syrup will work wonders. Two sizes, 25c and 75c. All druggists. Benson's Pharmacy.

Cottage Grove Flour Mills

MAKING PURE OF

Flour and Feed

Remember that the Cottage Grove Flour is sold at its lowest price. We use 25 per cent hard wheat in our Flour of Oregon brand. This Flour will produce more bread per sack than the cheap varieties now offered. Try it once and be convinced and at the same time encourage a home enterprise.

THREE JURORS CURED

Of Cholera Morbus With The Small Bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy.

Mr. G. W. Fowler of Highways, Ala., relates an experience he had while serving on a jury July 20, 1894, at Edw.sville, county seat of Cherokee county, Alabama. He says: "While there I ate some fresh meat and some some meat and it gave me cholera morbus in a very severe form. I was never sick in my life and sent to the drug store for a certain cholera mixture, but the drug got sent me a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. Instead, saying that he had what I sent for, but that this medicine was so much better he would rather send it to me in the box I was in. I took one dose of it and was better in five minutes. The second dose cured me entirely. Two fellow jurors were afflicted in the same manner and one small bottle cured the three of us." For sale by The Modern Pharmacy.
